Subject: Highway Lighting  
State WINs: 022871.00 & 023014.00  
Location: **Freeport & T2 R8 NWP**  
**Amendment No. 1**

Dear Sir/Ms.:

The following questions have been received:

**Question:** After reviewing the site conditions would it be acceptable to adjust some of the circuit/conduit routings? Specifically, in Freeport, from the junction box to light #2, could the bore go directly to the east side of Mallet drive, vs. the west side and then trenched over to the east as shown on the plans?

**Response:** It would be acceptable to bore from the junction box located at about I-295SB Station 227+30 LT behind the southbound outside guardrail to about I-295SB Station 229+50 LT, then bore across under the I-295 southbound and northbound lanes to Pole #2.

**Question:** Looking at the constructability of the pinned drilled shafts, would it be acceptable to install a rock socket, with a 4' diameter, 2'10" into the ledge, vs. as shown on the plans?

**Response:** Yes.

Consider these changes and information prior to submitting your bid on **June 13, 2018**.

Sincerely,

George M. A. Macdougall P.E.
