COMMISSIONER

February 13, 2024
Subject: Replacement of Traffic Signals
State WIN: 022885.00
Location: Houlton
Amendment No. 2

Dear Sir/Ms.:

The following questions have been received:

Question: Polycarbonate signal heads are specified on sheet 7, note 9. The MaineDOT standard specifications call for aluminum. Which is required here?

Response: Signal heads shall be polycarbonate. Reinforcing plates shall be used for all signal heads to reinforce the housings at the point of attachment.

Question: ATC controllers are specified in the plans and specifications. In other recent work MaineDOT has required Econolite's EOS software in order to connect to the Glance network. Is this a requirement of this project?

Response: The system shall provide connectivity to MaineDOT's cloud-based Central Management System. Use of Econolite EOS software/Glance or approved equal is required.

Question: Individual approach video detection is specified on the plans. Will MaineDOT accept a 360 degree camera system as indicated in the specifications?

Response: Use of a 360 degree camera system that meets specification requirements is acceptable.

Consider these changes and information prior to submitting your bid on **February 14, 2024**.

Sincerely,

Kevin Hanlon for

George M. A. Macdougall P.E.
