COMMISSIONER

January 10, 2025
Subject: Safety Improvements
State WIN:025329.00
Location: Dover-Foxcroft
Amendment No. 2

Dear Sir/Ms.:

The following questions have been received:

Question: For the ATC cabinet and mast arm/poles - is any paint required? Or just natural finish?

Response: No additional finishes such as paint are required. The cabinet shall match the latest repair spec requiring stainless steel and the mast arms/poles require galvanized steel.

Question: On page 120 of the spec it states that the ATC controller is to be installed in an existing or repurposed cabinet. Is it intended for a 2nd controller to be provided for the North Street intersection to allow for communications?

Response: The intention is to utilize existing equipment for the North Street intersection. The only modification to the intersection is to allow for and provide coordination with the South Street intersection and updated signal timing as shown in the plans.

Consider these changes and information prior to submitting your bid on **January 15, 2025.**

Sincerely,

A handwritten signature in blue ink that reads "George Macdougall".

George M. A. Macdougall P.E.
