026219.00B
Location: **Enfield & Jonesboro**
Amendment No. 2

Dear Sir/Ms.:

Please make the following changes to the Bid Documents:

In the Bid Book:

CHANGE on pages 90-91, SPECIAL PROVISION - SECTION 815 - Buildings, the section "Warranty", to read:

"The Contractor unconditionally warrants and guarantees that the project will be free from Warranty Defects for one year from the date of Physical Work Complete.

If the Department discovers any Warranty Defects during the warranty period, the Contractor agrees to perform all remedial Work at no additional cost or liability to the Department within thirty days, unless a more immediate response is required for safety or convenience, as determined by the Department. Warranty Defects are conditions that result from Material, manufacture, or workmanship and that are not in conformity with the Contract or with industry standards applicable to the Work prevailing at the time of submission of the Bid. Warranty Defects do not include (A) normal wear and tear, and (B) conditions caused by occurrences clearly beyond the Contractor's control and not attributable to material, manufacture, or workmanship. Examples of such excepted occurrences might be fires, floods, abnormally poor weather for the site of work, accidents, improper use, improper maintenance, vandalism, or acts of God.

The Contractor shall furnish satisfactory evidence that the materials and equipment incorporated into the project comply with the specified requirements of the contract. Such evidence may include certifications, warranties and other data from the manufacturer(s).

For a related provision, see Section 107.9.3 – Notices / Final Inspection / Physical Work Completion and 106.9 Warranty Provisions. Make this change in pen and ink.

The following questions have been received:

Question: Under the General Requirements section number 20. reads "Each gable end will have a clear Plexi-glass panel in lieu of steel, trimmed out with wood trim covered with aluminum, white in color." The metal roofing supplier offers a polycarbonate panel with the same profile as the "Everlast II or similar". These polycarbonate panels are offered in clear and opaque and could be installed in congruence the metal panels, maintaining a water-tight envelope while eliminating the need for the trim covered with white aluminum. Would this be acceptable?

Response: Yes.

Question: warranty on pages 90 and 91 of the bid book states contractor instead of manufactures warranty my bonding company is questioning to the extent of warranty and how it is written is this going to be changed.

Response: See the changes made above to the Contractors warranty obligation.

Consider these changes and information prior to submitting your bid on **July 15, 2020**.

Sincerely,

George M. A. Macdougall P.E.
Contracts & Specifications Engineer
