Subject: Bridge Joint Replacement
WIN: 029627.00A
Location: **Auburn, Lewiston**
Amendment No. 1

Dear Sir/Ms.:

Please make the following changes to the Bid Documents:

In the Bid Book:

REMOVE pages 14-21 “**CONTRACT AGREEMENT OFFER & AWARD**”, two copies, and **REPLACE** with the attached revised “**CONTRACT AGREEMENT OFFER & AWARD**”, two copies, 4 pages each, dated March 3, 2025.

REMOVE page 53, “**SPECIAL PROVISION, SECTION 107, TIME**”, and **REPLACE** with the attached revised “**SPECIAL PROVISION, SECTION 107, TIME**”, 1 page, dated March 3, 2025.

The following questions have been received:

Question: Due to the extended lead times required for Joint Fabrication and delivery, would the Department consider extending the completion date for the project until December 1st 2025, and include Special Seasonal Paving Specifications that have been used on recent projects allowing paving to be done after the typical Standard Specifications paving dates so long as temperatures can be achieved?

Response: The project completion date has been extended to October 17th, 2025, but can be extended no further due to wintertime operations. Due to the limited amount of anticipated pavement removal and replacement as well as the new project completion date a Special Seasonal Paving Specification will not be allowed for this project. Please refer to Special provision Section 521 “Any excavation into existing HMA or gravel borrow required for new concrete placements shall be treated as part of the removal limits, replaced in kind, considered incidental to pay Item 521.23, and completed in accordance with the Standard Specifications”.

Question: Required phasing for the joint replacement requires a significant amount of field welding. We have experienced requirements recently on MDOT projects requiring an independent certified weld inspector be present during all superstructure field welding and nondestructive testing requirements for all superstructure welding, which has been very time consuming and expensive and never been required in the past.

Will a CWI be required onsite during all welding and will NDT for QC inspection of the welding be required and will an NDT technician for magnetic particle testing of the welds be required?

Response: No, a CWI will not be required onsite during welding, NDT for QC inspection of the welding will not be required, and an NDT technician for magnetic particle testing of the welds will not be required.

Consider these changes and information prior to submitting your bid on **March 12, 2025**.

Sincerely,

George M. A. Macdougall P.E.
