Subject: Approval of **Maine 2026-2029 Statewide Transportation Improvement Program (STIP)**

Dear Commissioner Doughty:

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) have completed our review of the Maine Department of Transportation's (MaineDOT) May 15, 2025, request for approval of the 2025-2028 Statewide Transportation Improvement Program (STIP). A Notice of Availability for review and comment of Maine's 2026-2029 STIP was originally published on MaineDOT's website beginning April 14, 2026, and the comment period closed on April 26, 2026. The draft STIP was then reposted for a second public comment period through May 12, 2026.

The Environmental Protection Agency (EPA) Region 1 has reviewed the air quality conformity analysis contained as part of the 2026-2029 STIP. EPA concurrence for a positive transportation conformity determination for the STIP was received via email dated June 24, 2026.

Therefore, in accordance with 23 CFR 450.220(b), and based upon the MaineDOT and metropolitan planning organization (MPO) self-certifications of their statewide and metropolitan transportation planning processes and federal agency routine involvement in the transportation planning processes, FHWA and FTA offer the following comments/recommendations for your consideration:

1. The projects in the 2026-2029 STIP are based on a transportation planning process that substantially meets the requirements of Title 23, U.S.C. 134 and 135, 49 U.S.C. Section 5303 – 5304 and 23 CFR Part 450 Subparts A, B, and C.

2. We find that each regional Transportation Improvement Program (TIP) is based on a continuing, comprehensive, cooperative transportation planning process carried on cooperatively by the State, the MPOs, and the transit operators in accordance with the provisions of 23 U.S.C. 134 and 135, and 49 U.S.C. Section 5303 – 5304.

3. As of the date of this letter, the MPO TIPs within the Portland and Midcoast maintenance areas are found to be in conformity with the goals of the State Implementation Plan (SIP) and are consistent with the Clean Air Act and the EPA conformity regulations in

accordance with 40 CFR Parts 51 and 93. The conformity determinations of the TIPs will remain in effect until a new determination is required by 40 CFR 93.104.

In support of our determination, enclosed is the approved joint FHWA/FTA planning finding on the transportation planning process found in 23 CFR 450. Pursuant to the regulations, the requirements for Federal Planning Finding applies to both the STIP (23 CFR 400.220(b)) and MPO TIPs (23 CFR 450.330(a)). The Statewide and MPO planning finding is based on a continuing, comprehensive, cooperative transportation planning process and the self-certification statements submitted by MaineDOT and the MPOs under 23 CFR 450.220 and 23 CFR 450.336 respectively. It is also based upon documentation of routine FHWA/FTA involvement in the statewide and metropolitan planning processes, public involvement, and fiscal constraint determination.

Approval of the STIP does not constitute project or grant approval. Both agencies may need additional information on some of the projects in the approved STIP when a project agreement or grant submission approval is requested. If you have any questions regarding this approval and determination, please contact Jennifer Williams, FHWA, at (207) 512-4920, or Brandon Burns, FTA, at (617) 494-6310.

Air Quality Conformity Determination

Errata Sheet

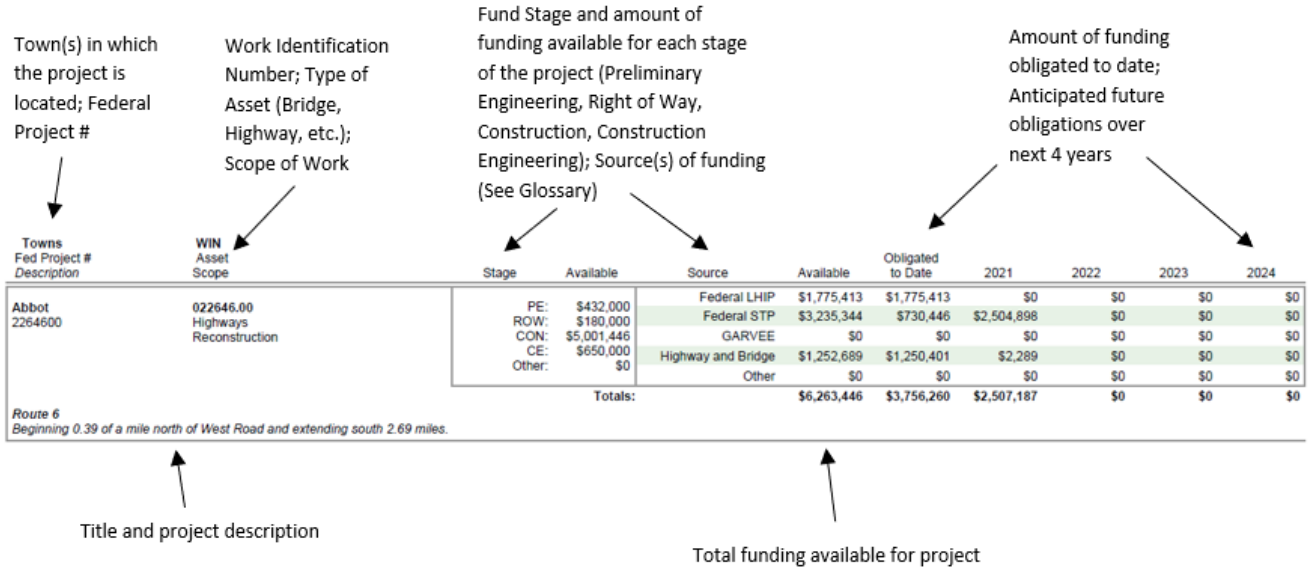
Preface: What is the STIP?

The *Statewide Transportation Improvement Program (STIP*) is a four year, federally required, transportation capital improvement program. The *STIP* must be approved by federal agencies for Maine to expend Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) funding. Federal regulations related to the *STIP* apply equally to all 50 states and do not consider individual states' sizes, legislative processes and/or budget cycles. Those regulations require each state to produce a *STIP* that identifies federal funding by year for scheduled transportation projects that may be receiving FHWA or FTA funding. MaineDOT produces a *STIP* to meet the following principal requirements:

- The State of Maine must show fiscal constraint by not scheduling more transportation projects for construction, per year, than it can reasonably expect to receive in funding.
- To certify that the State's transportation program conforms to Federal air quality regulations.
- To provide all interested parties a reasonable opportunity to comment on the proposed *STIP*.

The *STIP* is a fiscally constrained document that is formally submitted to the FHWA and FTA for review and approval and includes capital projects identified in MaineDOT's State-initiated Calendar Year *Work Plan* and, capital projects under construction. The *Work Plan* lists projects to be worked on over the next three calendar years, beginning with the present year. The majority of the capital projects listed in the *Work Plan* are eligible for FHWA and FTA funding.

How to Read the STIP Project Listings



A. Introduction

The Maine Department of Transportation (MaineDOT) Results and Information Office coordinated the development and preparation of this document with support from other bureaus and offices throughout MaineDOT. The Maine *Statewide Transportation Improvement Program* (*STIP*) is prepared annually, complying with Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) requirements. This document encompasses a four-year timeframe spanning the years 2026, 2027, 2028 and 2029.

The *STIP* is a multimodal document that includes investments in various modes of transportation infrastructure, including but not limited to pedestrian, bicycles, highways, and transit services. The *STIP* identifies MaineDOT's mutually agreed upon investment goals and objectives, as well as the established performance measures and targets, and balances transportation needs with available funding. MaineDOT develops the *STIP* in cooperation with the four Maine Metropolitan Planning Organizations (MPOs), Maine municipalities, public transportation providers, and in consultation with Regional Planning Councils. To better represent the geographic areas of the state, the *STIP* contains the four MPO TIPs as their own sections and a non-MPO section to represent the rest of the state. Additionally, this *STIP* has been developed based on the Clean Air Act and subsequent amendments and all regulations issued pursuant thereto, and the terms and provisions in the *Infrastructure Investment and Jobs Act (IIJA)*. If a future funding act is significantly different than the *IIJA*, or significant changes are made to the *IIJA*, MaineDOT may need to revise the *STIP* accordingly.

B. Performance Measures and Project Selection

MaineDOT and Maine's four MPOs signed cooperative agreements in 2018 regarding the coordination of establishing both FHWA and FTA performance measures/targets, which formalized ongoing processes. Statewide targets are listed in this STIP, while targets for individual MPOs may be found in their respective TIP documents.

FTA Project Selection and Performance Targets:

On July 26, 2016, the Federal Transit Administration published the final rule on Transit Asset Management (49 CFR 625). This final rule defines "the term *state of good repair* and to establish minimum Federal requirements for transit asset management that will apply to all recipients and subrecipients of chapter 53 funds that own, operate or manage public transportation capital assets." (See Federal Register, Vol, 81, No. 143, pp. 48890 to 48970, https://www.gpo.gov/fdsys/pkg/FR-2016-07-26/pdf/2016-16883.pdf)

The rule requires targets for Transit Assets to be developed by January 1, 2017 for the following fiscal year. The targets deal with 4 broad areas of interest/asset categories; Equipment, Rolling Stock, Infrastructure, and Facilities. As a sponsor of a Tier 2 plan, the Maine Department of Transportation (MaineDOT) will develop statewide targets collectively for 5311 subrecipients. At this time, all 5310 subrecipients are 5311 subrecipients as indicated below. (See Page 4)

The Bipartisan Infrastructure Law, enacted as the Infrastructure Investment and Jobs Act (IIJA), continues, without change to the Transit Asset Management (TAM) Program as enacted under 49 USC Section 5326.

Targets

The following table shows the targets for the State of Good Repair performance measures for Transit Assets that are anticipated to be included in MaineDOT's Transit Asset Management (TAM) Plan for assets purchased with federal and/or state funds as well as local funds only:

Asset Category*	Performance Measure	Asset Class	2024 Actuals	2025 Target Beyond Useful Life	2025 Actuals	2026 Target Beyond Useful Life
Rolling Stock	Age - % of revenue vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)	Class 1 Class 2 Class 3 Class 4 Class 5 Class 6	63% 36% 33% 100% 25% 56%	70% 56% 11% 100% 14% 33%	73% 63% 13% 100% 25% 56%	60% 60% 48% 100% 25% 44%
Equipment	Age - % of non-revenue vehicles that have met or exceeded their Useful Life Benchmark (ULB)	Automobiles Service Truck	100% 33%	100% 33%	100% 33%	100% 50%
Facilities	Condition - % of facilities with a condition rating below 3.0 on the FTA Term Scale	Support (Main. & Admin.) Passenger	0%	0%	0%	0%

Note: **(See Attachment 1, List of 5311 Subrecipients)**
Note: Class 1 has four categories (minivans, vans and Autos and SUVs) and 2025 performance separately reported as 71% and 81% with targets of 55% and 87% for vans and minivans respectively as well as separately reported as 50% and 0% with targets of 33% and 0% respectively.
Note: Class 3, 4 and 5 were combined and reported under Bus for NTD reporting purposes for 2025 performance at 40% with target of 48%.
Note: Combined rescue boats with service trucks under Truck & Other Rubber Tire Vehicles.
See Attachment 3 for history of targets

Target Development

Developing the targets involves accounting for existing inventories as well as anticipated additions and replacements. Targets for rolling stock and equipment are determined using assets stored in MaineDOT's asset inventory (and the inventory list from the subrecipients relating to locally purchased vehicles) and the remaining Useful Life Benchmark methodology. Targets for facilities are determined

for assets anticipated to be included in the Transit Asset Management (TAM) plan using the Transit Economic Resource Model (TERM) qualitative scale of condition (5 = Excellent; 4 = Good; 3 = Adequate; 2 = Marginal; 1 = Poor).*

Per Federal ruling, targets must be based on realistic expectations and the best available data. Descriptions of each methodology are listed below.

_____
*(See FTA's Guidebook on Facility condition Assessment)

Rolling Stock and Equipment Methodology

The acquisition dates stored in MaineDOT's asset inventory and anticipated service lives are used to determine ages and whether assets are over or under their Useful Life Benchmarks (ULB). Anticipated service lives are documented in the State Management Plan and are primarily determined from the minimums set forth in FTA Circular 5010.1F (effective February 13, 2017)

Classification	Vehicle or Equipment Type	Useful Life (years)
Class 1	Minivan, van, sedan, SUVs	4
Class 2	Light-duty small bus, minibus, small body-on-chassis, cutaways	5
Class 3	Medium-duty transit bus < 30', trolley-like bus	7
Class 4	Medium Size Heavy duty transit bus 30'	10
Class 5	Heavy duty transit bus 35'; Commuter Coach	12
Class 6	Ferry Boats	40

(See Attachment 2 for MaineDOT's Useful Life Standards, State Management Plan 2017, p. 34)

$$\textit{2024 Target} = \frac{\textit{Actual Assets in Class under ULB on October 1, 2025}}{\textit{Total Assets in Class on October 1, 2025}}$$

$$\textit{2025 Target} = \frac{\textit{Actual Assets in Class under ULB on October 1, 2026}}{\textit{Total Assets in Class on October 1, 2026}}$$

Facilities Methodology

Targets for facilities are developed by applying the Transit Economic Requirements Model (TERM) scale to facilities used in the provision of public transportation. The TERM scale is a 5-point scale ranging from poor condition (1.0) to excellent condition (5.0). The performance measure is the number of facilities with an overall condition below a 3.0, which means adequate. The inventory includes facilities that are owned by the State (leased to a subrecipient) and are included in the TAM plan. They are further categorized by the asset classes (Administrative, Maintenance or Passenger).

The baseline for all classes is 0% because all transit facilities in Maine that are anticipated to be included in the TAM plan are in good or excellent condition. The target for all facility classes is 0% because the conditions of facilities change much more slowly over time than equipment and rolling stock.

Vehicle Disposition

The Bureau of Planning implements its own disposition procedures to ensure that vehicles are used until the end of their useful lives, to ensure that vehicles that are no longer needed by a subrecipient can be transferred to another subrecipient, and to ensure that proceeds are used for transit purposes.

In the event that a vehicle must be disposed of before the end of its useful life, MaineDOT will send a written request to FTA requesting disposal before the end of the vehicle's useful life, with an explanation of why the disposal is justified. In the event of a systemic problem such as corrosion, MaineDOT can give permission to dispose of vehicles prior to the end of their useful lives with FTA concurrence.

Disposal of all property titled to the State of Maine is done through the Surplus Property Office of the State and follows their procedures.

FHWA Project Selection and Performance Targets:

All FHWA projects listed in the *STIP* have been ranked, prioritized and selected based upon MaineDOT's own Highway Corridor Priorities (HCPs) and Customer Service Levels (CSLs), as well as the recently established performance measures required by FHWA per 23 U.S.C 135(h), all of which is included in MaineDOT's Transportation Asset Management Program (TAMP) published in 2022. To date, performance measures and targets have been established for 2026 for HSIP and Safety (PM1) (to be revised and adopted annually), as well as for Pavement and Bridge Condition (PM2) and System Performance/Freight/CMAQ (PM3) (both targets to be revised and adopted every two and four years). Analysis of 2024 HSIP data and 2025 PM2/PM3 data is ongoing to determine if performance targets have been met.

23 U.S.C 135(d) requires each State shall carry out a statewide transportation planning process that provides for consideration and implementation of projects, strategies, and services that will:

(A) support the economic vitality of the United States, the States, nonmetropolitan areas, and metropolitan areas, especially by enabling global competitiveness, productivity, and efficiency;
(B) increase the safety of the transportation system for motorized and nonmotorized users;
(C) increase the security of the transportation system for motorized and nonmotorized users;
(D) increase the accessibility and mobility of people and freight;
(E) protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
(F) enhance the integration and connectivity of the transportation system, across and between modes throughout the State, for people and freight;
(G) promote efficient system management and operation;
(H) emphasize the preservation of the existing transportation system;
(I) improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
(J) enhance travel and tourism.

These planning efforts are completed by cooperating with nonmetropolitan areas, Indian tribal governments, and Federal land management agencies within the boundaries of the state.

The *IIJA* requires long-range statewide transportation plans and statewide transportation improvement programs (STIPs) to provide for the development and integrated management and operation of transportation systems and facilities that enable an intermodal transportation system, including active transportation facilities. It adds to this list other facilities that support intercity transportation (including intercity buses, intercity bus facilities, and commuter vanpool providers). [23 U.S.C. 135(a)(2)]. The *IIJA* continues the requirement that public ports and certain private providers of transportation (including intercity bus operators and employer-based commuting programs) to the list of interested parties that the State must provide with reasonable opportunity to comment on the proposed *STIP* and long-range transportation plan. [23 U.S.C. 135(f)(3)(A)(ii) & (g)(3)]

MaineDOT, FHWA, and FTA must work together to ensure that the National Environmental Policy Act (NEPA) Process is complete before a project is constructed or implemented. Importantly, before FHWA and/or FTA can provide the final NEPA decision (i.e., ROD, FONSI, or CE) the proposed project must:

Before a Final Environmental Decision (ROD, FONSI, CE) is Approved In:	Fiscal Constraint must be demonstrated by:
Metropolitan Areas	• At least one subsequent phase of the Project is in the TIP (more if within TIP timeframe) • Full funding is reasonably available for the completion of the entire project.
Non-Metropolitan Areas (Outside MPO)	• At least one subsequent phase of the Project is in the STIP (more if within STIP timeframe) • Full funding is reasonably available for the completion of the entire project.

C. *STIP* Public Involvement Plan

The *STIP* document is published as a stand-alone federal document and contains projects that are FHWA funded, FTA funded, or completely State funded that are eligible to receive federal funding. Most projects listed in the *STIP* have been through or are involved in a public involvement process specific to the individual project and are closely linked to the preparation of MaineDOT's State-initiated Calendar Year *Work Plan*. Additionally, a systematic documented approach to soliciting public input/comments is ongoing for not only projects but the process itself. For more information on MaineDOT's public involvement process, please use the following link: https://www.maine.gov/mdot/planning/docs/2021/pip0321.pdf

In support of MaineDOT's biennial budget request, prior to preparing a *STIP*, MaineDOT submits the *Work Plan* to the Maine State Legislature. Most projects that are included in the *STIP* have been represented in a MaineDOT *Work Plan* and/or have received federal approval through inclusion in a prior *STIP* or as an amendment to a prior *STIP*.

To obtain public input on the document, the *STIP* is placed on the MaineDOT website for 10 days and accompanied by an errata sheet if necessary. During that time, the public can submit comments on the document through various means and review the errata sheet (containing all corrections, omissions, public comments, responses, etc.) as it is updated. Methods by which the public may comment include:

- Phone
- E-mail
- Website

After the 10-day public review and comment period, and after all corrections, omissions, public comments, and responses have been addressed and incorporated into the errata sheet, the *STIP* is submitted for review and approval to FHWA and FTA. Upon approval, the document becomes the *STIP* of record. The errata sheet is incorporated into the approved *STIP* document, and the complete document is posted to the MaineDOT website, alongside a dynamic listing of approved *STIP* changes.

D. *STIP* Finances

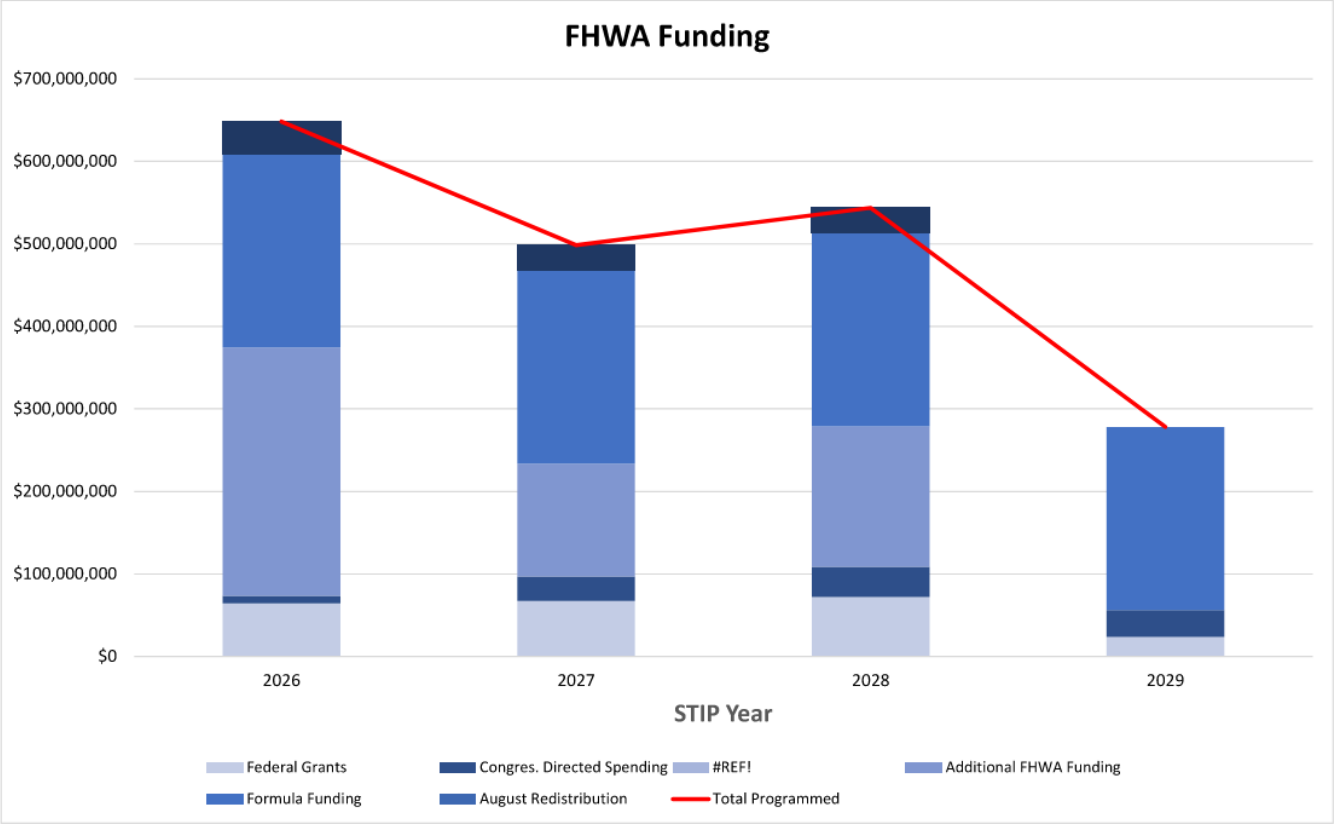
There are three main sources of funds for transportation programming, which are discussed in more detail in *MaineDOT's Work Plan: 2026 Edition* available at https://www.maine.gov/dot/sites/maine.gov.dot/files/inline-files/2026_Work_Plan.pdf

The three sources of funding are:

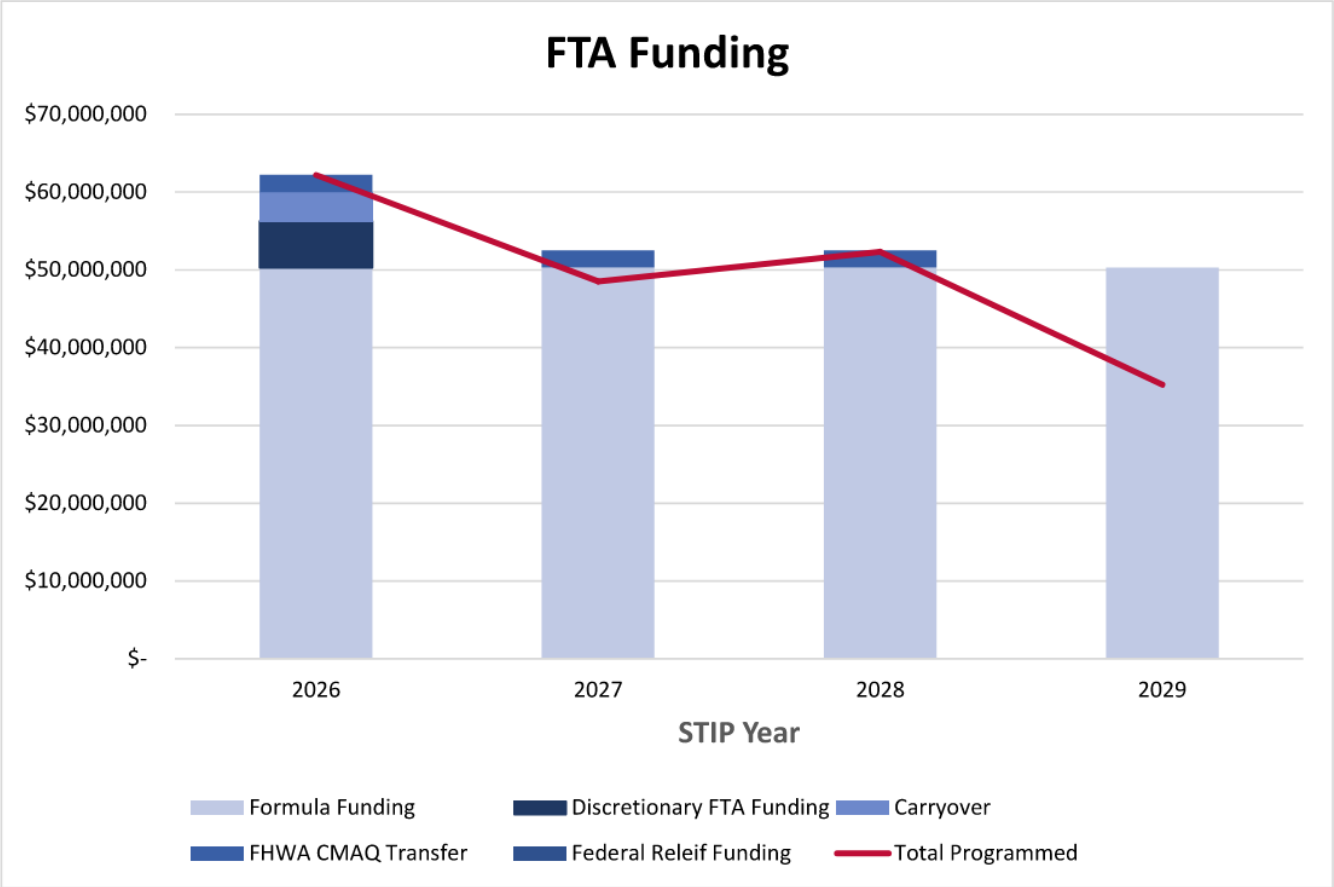
- Federal transportation funding/grants
- State transportation funding (including approved bonds and GARVEE)
- Municipal and/or private funding

The *STIP* provides the estimated utilization of federal funding, by fund source, for each one of the four years of the *STIP*. For FHWA funded projects, MaineDOT does not adjust for inflation. Instead, it adjusts all project costs on an annual basis to reflect the latest bid tab information. The chart below

shows an estimated obligation limit (89.0% of the apportionment) of FHWA formula funds, including an assumed $30 million for August redistribution in 2026, $30 million in 2027, and $30 million in 2028 and Congressional Directed Spending (CDS) funding, both awarded and assumed in comparison to the amount programmed by MaineDOT. The fourth year of the *STIP* assumes 89% of the core FHWA formula funds shown in the IIJA funding tables for Maine. To meet the remaining obligations, MaineDOT may request transfers between apportioned highway programs, authorized under statutes; 23 U.S.C. 104 (g), 126 (a) (b) and (c) and 144 (e). This *STIP* demonstrates fiscal constraint for the FHWA program.



The chart below shows the projected FTA funding over the next four years. MaineDOT has utilized the IIJA Maine FTA formula funding tables, while also including carryover (unexpended funds) from previous years, anticipated federal relief funding, and discretionary FTA funding (grants). This helps to explain the higher amounts in the first year(s) of the *STIP*. The available funding vs programming leaves additional work to be programed. This *STIP* demonstrates fiscal constraint for the FTA program.



If MaineDOT receives more federal resources than what is currently proposed in this *STIP*, MaineDOT will request *STIP* amendments to add new projects or add new stages to current projects in the *STIP* document. If MaineDOT receives fewer resources than proposed, MaineDOT will delay or cancel projects. State transportation funding is based upon approved non-federal capital transportation resources in *MaineDOT's Work Plan: 2025 Edition*. MaineDOT has sufficient funds to match all anticipated resources from FHWA and FTA.

Toll Credits

Federal regulations (23 USC §120) allow a State to use toll credits toward the non-federal match requirement of a project, provided that the project is listed in the *STIP*. These credits are based on toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi-public, or private agencies shall have built, improved, or maintained such facilities without federal funds.

To receive these toll credits, a State shall show that it has maintained its non-federal transportation capital expenditures in accordance with FHWA's requirements. MaineDOT has shown that they have met these requirements to match federal funds. Consistent with existing practices, the *2026-2029 STIP* identifies the use of toll credits by project and accounts for the use as part of the financial constraint information.

E. Maintenance and Operations

FTA and FHWA regulations require the *STIP* to demonstrate that appropriate funds are available for adequately operating and maintaining the state transportation system. Maine's Governor's budget includes $204.7 million in State Fiscal Year 2026, $207.9 million in State Fiscal Year 2027, and $207.9 million in State Fiscal Year 2028 for operating and maintaining Maine's transportation system. Most funds used to pay operating and maintenance costs are State funds, which are included in the State of Maine's current biennial transportation budget for State Fiscal Years 2026 and 2027 and the biennial transportation budget for State Fiscal Years 2026 and 2027. Additionally, FTA funds are used for transit system operations and maintenance of facilities, as well as maintenance of equipment/rolling stock.

The Bureau of Maintenance and Operations has 5 Regional Offices that are responsible for all state transportation infrastructure including the highway and bridge system, and each region has adequate resources to accomplish this mission. The headquarters office, in Augusta, includes the Divisions of Fleet Services, Traffic Engineering, Highway Maintenance, Bridge Maintenance, Community Services and Multimodal Maintenance. Fleet Services manages and maintains all equipment owned by MaineDOT. Traffic Engineering establishes statewide traffic standards, reviews, and recommends speed limits for Commissioner implementation, maintains traffic signals, highway lighting, signing, striping and pavement markings. Bridge Maintenance provides technical oversight and statewide strategies for bridge operation and maintenance activities and provides statewide structural engineering and bridge inspection, including state-owned rail bridges. Highway Maintenance develops statewide standards for highway operation and maintenance activities, utility permitting, asset management and work reporting standards, maintenance contracting and highway maintenance engineering. Multimodal Maintenance has responsibility for inspection and maintenance of state-owned rail lines, inspection of all private rail lines, traveler facilities, facility management, and the operation of the Maine State Ferry System.

The Bureau of Maintenance and Operations has included all maintenance work items for Calendar Years 2026, 2027, and 2028 in MaineDOT's current *Work Plan*.

2025 Project Detail Report

(STIP Design and Construction Activities)

Maine

TTP Transportation Improvement Program (TTPTIP)

25 CFR 170.424

(a) Each year, FHWA will compile the approved TTIPs for all of the Tribes into one document called the TTPTIP. This document will identify all expected projects and activities over a four-year period and will be organized by fiscal year, State, and Tribe.

(b) FHWA and BIA will post the approved TTPTIP on their respective Web sites. A subset of the TTPTIP that identifies only design and construction activities will annually be provided to the pertinent FHWA Division office for further transmittal to each State Transportation Office/Department for inclusion in the STIP without further action per 23 U.S.C. 201(c)(4).

The TTPTIP is a financially constrained prioritized list of transportation projects and activities eligible for TTP funding covering a period of four years that is developed by BIA and FHWA based on each Tribe's submission of their TTIP or Tribal priority list. It is required for projects and activities to be eligible for funding under title 23 U.S.C. and title 49 U.S.C. chapter 53. The Secretary of Transportation reviews and approves the TTPTIP and distributes copies to each State for inclusion in their respective STIPs without further action.

Air Quality Conformity Analysis

Introduction

This report documents the air quality conformity determination for the 2026-2029 Statewide Transportation Improvement Program (STIP). The report was prepared by the Maine Department of Transportation (MaineDOT) in coordination with the Maine Department of Environmental Protection (DEP), Portland Area Comprehensive Transportation Committee (PACTS) Metropolitan Planning Organization (MPO) and Kittery Area Comprehensive Transportation System (KACTS) Metropolitan Planning Organization.

Transportation conformity is required under the Clean Air Act (CAA) and the Clean Air Act Amendments of 1990 (CAAA). The purpose of the transportation conformity process is to ensure that federally funded or approved transportation projects, programs and plans are reviewed and evaluated for their impacts on air quality. Specifically, the projects and other federally funded activities contained in the Long-Range Transportation Plan (LRTP) or STIP may not cause or contribute to new violations, exacerbate existing violations, or interfere with the timely attainment of air quality standards. The transportation conformity process requires the active participation of all agencies (federal, state, and local) that implement federally funded transportation projects and programs within the Portland and Midcoast areas.

This report demonstrates transportation conformity to the 8-hour ozone National Ambient Air Quality Standards (NAAQS) for Maine's two ozone maintenance areas. This analysis has been prepared in accordance with U.S. Environmental Protection Agency's (EPA) final conformity rule. The following sections of this report briefly discuss Maine's air quality designations, identify the applicable transportation plans/program in the conformity analysis, describe the interagency consultation process, highlight the methodology used to perform the current analysis, and present the final conformity determination.

Maine's Air Quality Designations

The CAA requires EPA to set NAAQS for pollutants considered harmful to public health and the environment. The CAA established two types of national air quality standards. Primary air quality standards set limits to protect public health, including the health of "sensitive" populations such as asthmatics, children, and the elderly. Secondary air quality standards set limits to protect public welfare, including protection against decreased visibility, damage to animals, crops, vegetation, and buildings.

The EPA Office of Air Quality Planning and Standards (OAQPS) has set NAAQS for six principal pollutants, which are called "criteria" pollutants. The six criteria pollutants are carbon monoxide, lead, nitrogen oxides, particulate matter, ozone, and sulfur dioxides. Areas that do not meet the NAAQS are designated as nonattainment areas and, as a result, are subject to transportation conformity. Maintenance areas are geographic regions that were previously designated as nonattainment, but are now consistently meeting the NAAQS. Transportation conformity requires nonattainment and maintenance areas to

demonstrate that all future transportation projects will not hinder the area from reaching and maintaining its attainment goals.

Maine previously had two regions (Portland and Midcoast) designated as maintenance areas for the 8-hour ozone standard and one small area (downtown Presque Isle) was designated as a maintenance area for PM_{10}. The 20-year maintenance period for the Presque Isle PM_{10} maintenance area expired on October 30, 2015. Therefore, Maine is no longer required to demonstrate transportation conformity for the Presque Isle PM_{10} maintenance area. No carbon monoxide, lead, nitrogen oxides, or sulfur dioxide nonattainment areas have been identified in Maine.

On February 16, 2018, the U.S. Court of Appeals for the District of Columbia vacated major portions of the 2015 rule that established procedures for transitioning from the 1997 ozone NAAQS to the 2008 ozone NAAQS. As a result of this decision, the State of Maine is once again subject to transportation conformity requirements for the Portland and Midcoast 8-hour ozone maintenance areas established under the 1997 ozone NAAQS. Orphan maintenance areas were defined in the court decision as areas that were maintenance areas for the 1997 ozone NAAQS at the time of its revocation and were designated attainment for the 2008 ozone NAAQS in EPA's original designations. The Portland and Midcoast areas of Maine fall into the category of orphan areas.

Figure 1 shows the boundaries of Maine's two 8-hour ozone maintenance areas and their relationship to the two metropolitan planning areas. The Portland 8-hour ozone maintenance area encompasses portions of four counties and includes 55 municipalities. The Portland ozone maintenance area also encompasses the transportation planning jurisdictions of the KACTS and PACTS MPOs. The Midcoast 8-hour ozone maintenance area encompasses portions of four counties and includes 54 municipalities. Table 1 describes each ozone maintenance area by county and municipality.

Conformity Analysis

Based on EPA's "Transportation Conformity Guidance for the *South Coast II* Court Decision" (EPA-420-B-18-050, November 2018), transportation conformity for the 1997 ozone NAAQS can be demonstrated for a non-exempt FHWA/FTA project in an orphan area by showing that the following criteria have been met:

- **Use of the latest planning assumptions.**

  Use of the latest planning assumptions, per 40 CFR 93.110. These criteria generally apply to regional emissions analyses. In orphan areas, ensuring the latest planning assumptions are used applies to information about TCMs in an approved State Implementation Plan (SIP) (40 CFR 93.113); at this time, no TCMs are specifically identified in Maine's SIP. Therefore, this condition is met and will not be addressed further.

- **Interagency consultation requirements.**

  Transportation conformity is a collaborative process among federal, state, and local agencies. Every three months, MaineDOT convenes an interagency consultation committee meeting with representatives from the following agencies:

  - MaineDOT
  - Maine DEP
  - Maine Turnpike Authority (MTA)
  - PACTS
  - KACTS
  - Androscoggin Transportation Resource Center (ATRC)
  - Greater Portland Council of Governments (GPCOG)

- Southern Maine Planning and Development Commission (SMPDC)
- FHWA
- FTA
- EPA

The meetings are generally well attended by all parties and are conducted by teleconference. The consultation meetings have been held regularly since 1992. The general purposes of the interagency consultation meetings are to:

- Provide a forum for discussion and decision making regarding all areas of transportation conformity including, but not limited to, the development of the SIP, MVEBs, transportation plans, STIPS/TIPs and associated conformity documents
- Evaluate events that will trigger new conformity determinations
- Determine latest planning assumptions and emission models
- Identify projects requiring a regional emissions or hot-spot analysis
- Develop a format for presenting the transportation conformity determination
- Establish a public participation process for the conformity determination

The conformity analysis is prepared by MaineDOT with assistance from DEP under the guidance of the interagency consultation committee. The decisions made by the consultation committee serve as the basis for the conformity analysis and the ultimate conformity determination. The conformity analysis and the applicable transportation plans and programs are made available for public review and comment.

The specific purposes of the interagency consultation meetings and the roles and responsibilities for the agencies (DEP, MaineDOT, PACTS, and KACTS) responsible for performing the conformity analysis are established in Section 4 of Maine's transportation conformity regulation. As part of the SIP, the interagency consultation procedures contained in Maine's transportation conformity regulation are federally enforceable.

- **Timely implementation of any approved SIP transportation control measures (TCMs).**

  The plan or program must provide for the timely implementation of any transportation control measures (TCM) specifically identified in the State Implementation Plan (SIP) (40 CFR 93.113). At this time no TCMs are specifically identified in Maine's SIP. Therefore, this condition is met and will not be addressed further.

- **Fiscal constraint.**

  Transportation plans and TIPs must demonstrate fiscal constraint consistent with DOT's metropolitan planning regulations. For more information on fiscal constraint please see the introduction section of the STIP.

Conclusion

The preceding pages demonstrate that all the required conformity tests were satisfied in the Portland and Midcoast maintenance areas. A regional emissions analysis is not required in the orphan areas so the remaining criteria were evaluated and satisfied. Since a PM_{10} hot-spot determination is no longer required, the conditions for the Presque Isle PM_{10} maintenance area have also been satisfied. Therefore, the 2026-2029 STIP, and the 2026-2029 PACTS and KACTS TIPs, conform to the current SIP and satisfy the conformity requirements of the Clean Air Act Amendments of 1990.

Errata

Maine Department of Transportation
Statewide Transportation Improvement Program
2026-2027-2028-2029

2026 - 2029 - FHWA Errata

Purpose of the Errata: The purpose of the Errata is to provide a mechanism for MaineDOT to communicate changes that have occurred between the time the new STIP project listings are pulled from the system (typically at the beginning of Jnuary) and the time it is approved (typically in April or May) by FHWA/FTA. During this time, changes to existing projects warranting disclosure and the addition of new work must be communicated to ensure that proper approvals are in place when the new STIP is approved. It should be noted that most items listed on the Errata reflect Administrative modifications/Amendments to the current STIP that must be in place for a smooth transition to the new STIP when approved. Without this document, prior FHWA approvals in the previous STIP will not carry over.
