Supplemental Question(s) for 105.00 Intelligent Transportation Systems (ITS)

1. List representative ITS projects your firm has worked on, including a brief description, a contact person and phone number at the sponsoring agency (that the project was done for), and a contact person and phone number at your Firm. In addition, please provide information on the role your firm played in relation to the projects described (lead role, support role, etc.).

Consultant Name: ______

2. Describe the Firm's experience with ITS project planning, deployment, integration and ITS project management. Provide up to 3 project examples that your firm was <u>the prime consultant</u> within the last ten (10) years. Only include information on work **by your firm**. 3. Please describe your experience with communications infrastructure serving ITS devices. Include any wireless, wireline, or network communication system experience.

4. Does your firm have staff with experience in the current Systems Engineering process as outlined by the FHWA. Yes No If so, please provide a short description of one or two projects detailing how the systems engineering process was implemented.

Supplemental Question(s) for 210.20 Traffic Data Collection, Processing & Analysis

1. Submit, as a separate attachment, copies of studies you have developed.

 Detail your ability to collect 1,000 to 2.000 short duration volume and vehicle classification counts per year; include types and quantities of equipment available. Data must be collected between April 15th and November 15th; specific timeframes are summarized in the attached document, "Data Collection Guidelines MaineDOT."

3. Outline the training provided to your data collection staff; include the years of experience with both data collection in the field and data analysis.

4. List the types of data your staff are familiar with collecting (TMs, queue studies, SDCs, vehicle classification, speed, headway), and provide examples of reports for each type.

5. Provide a detailed description of your standard procedures for data collection and safety.

6. Describe your equipment testing and calibration.

Supplemental Question(s) for 210.50 Lighting Design

1. Describe your firm's designs capabilities for interchange lighting, intersection lighting and specific crosswalk lighting. What has your firm done to ensure that a lighting design meets desired lighting standards but is cost effective (number of light poles and fixtures, wattage of fixtures, pole heights, etc.)?

2. Describe your firm's experience with photometrics. What design software does your firm use for lighting design? And what have you done with vertical illuminance?

3. Does your firm have electrical engineers/electricians that review the electrical design of the lighting project and what have they designed to mitigate electrical safety issues such as arc flash? If so, what is their design/field experience related to lighting?

4. What has your firm done to mitigate light trespass issues on projects and to what end?

1. Describe your firm's employees experience in Traffic Engineering Services, specifically the items listed under the Traffic Engineering Services Service Number write-up.

2. This work will be task order type work on an as needed basis. What protocols does your firm have in place for cost control on individual projects?

3. Submit, as a separate attachment, a traffic related policy developed by your firm and who you developed it for.

Consultant	Name:
0 0110 0110 0110	

4. Submit, as a separate attachment, a set of Traffic Control Plans developed or reviewed by your company, including feedback to the owner/contractor.

5. Submit, as a separate attachment, plans for Traffic Calming devices designed and implemented by your company.
