Re: Federal and State Allocation for FFY2025 – Full Apportionment

The following tables depict the apportionment of the FFY2025 Federal Transit Administration and state allocation for public transportation programs in Maine. The federal data is from the FY2025 full-year apportionments for grant programs.

The package:

- Uses a 50/50 split between the state's urban and rural areas for the state operating funds rather than the previous 50.1% urban/49.9% rural split
- Uses updated data for the square miles, road miles, and population metrics
- Uses updated Census data for all distributions
- Continues the existing population-based split of 5303 funds
