Message from State Fire Marshal Joseph E. Thomas

Welcome to the 2020 Maine State Fire Marshal Annual Report.

2020 was a very challenging year for the FMO. With the COVID-19 pandemic raging, this agency was called upon to assist other state agencies, healthcare facilities, educational facilities and businesses in meeting alternative means of code compliance in order to allow these facilities to still provide essential services and maintain fire and life safety measures.

Each and every member of the Office of State Fire Marshal stepped up and met each and every challenge head on with professionalism, critical thinking skills, creativity and compassion. One example being emergency rule making that permitted temporary structures such as tents be used for periods beyond the 180 day period established in normal times to 364 days. The emergency rule gave restaurants, bars, schools and other establishments additional time to avoid indoor crowds exceeding gathering limits and therefore to comply with the Governor's Office Executive Order #14 "An order to Implement Phase Four of the Restarting Maine's Economy Plan."

This report will provide you with data on 119,434 valid fire incidents reported to our office by 274 Maine Fire Departments in 2020. Fires that took the lives of 17 individuals and brought about \$37,704,421 in total loss to Maine homeowners, businesses and institutions throughout Maine.

We hope this information will assist the fire service, educators, policy makers and other interested in finding effective approaches to reducing the loss of lives and property to fire in Maine. I would like to thank my staff for making this report possible and wish them all and you the public we serve, a safe and happy 2021.

Sincerely,

Joseph E. Thomas, State Fire Marshal

State Fire Marshal Office History

The Division of State Fire Prevention was created in 1937 to combat an increasing number of fraudulent insurance claims resulting from intentionally set fires. The State Fire Marshal Office replaced the Division of State Fire Prevention in 1972. The scope of statutory authority has broadened over the years to include:

1. Investigation of the cause and origin of fires and explosions;
2. Arson investigation, evidence gathering and case preparation for possible prosecution;
3. Regulate, permit and inspect for the use of explosives, fireworks and certain flammable liquids;
4. Inspect approximately 25 distinct types of buildings and facilities to enforce life safety codes and standards;
5. Review plans for issuing permits for construction and alteration of public buildings, handicap accessibility, installation of fire alarm and fire sprinkler systems; installation of aboveground fuel storage tanks, amusement rides, and self-service gas stations;
6. Conduct and offer specialized training for trade professionals, care givers, code enforcement officials, and fire and law enforcement professionals;
7. Coordinate specialty subject areas such as the State of Maine Juvenile Fire Safety Collaborative that was created by a Governor's Executive Order.

The following people have served in the role of State Fire Marshal:

Director Joseph A.P. Flynn	1939 to 1965
Director and Fire Marshal Charles F. Rogan	1965 to 1975
Fire Marshal Don Bissett	1977 to 1991
Fire Marshal Dennis Lundstedt	1992 to 1995
Fire Marshal Ladd Alcott	1995 to 1998
Fire Marshal John C. Dean	1998 to 2012
Fire Marshal Joseph E. Thomas	2012 to present

State Fire Marshal Office Divisions

Investigations Division

Lieutenant Troy Gardner oversees the Fire Investigation Division of the State Fire Marshal's Office. The Investigation Division employs 12 sworn fire investigators, 3 fire investigation sergeants, and 2 accelerant detection K-9s: Deacon and Harry. These personnel are spread out equally across three areas of Maine: Northern, Central, and Southern. Deacon and Harry assist the investigator with identifying the location of ignitable liquids present in a scene. Fire investigators are tasked with a wide variety of duties specializing in fire and explosion investigations to determine the origin and cause of those events. In each of these investigations, if the cause is accidental, a report is generated. However, if the investigation reveals a criminal law violation, the case continues as the investigator attempts to identify the person(s) responsible and submits the concluded case for prosecution. At trial, our Fire Investigators testify as expert witnesses in the science and methodology of fire development and dynamics.

For those most unfortunate times of fire fatalities, the Investigation Division is the State Attorney General's investigative representatives taking the lead role in finding the facts and circumstances of a fire death. Adding to this role, Fire Investigators work closely with other law enforcement investigative agencies, fire departments, the Medical Examiner's Office, financial institutions, professional, medical, and legal representatives.

Fire Investigators work closely with Federal Investigative agencies most often with the Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF&E). On occasion investigations may also dictate we work with the US Postal Inspectors (USPIS), Federal Bureau of Investigations (FBI), and the Federal Emergency Management Agency (FEMA).

Along with the obvious fire and explosion scene investigations, Fire Investigators handle a wide variety of other duties. They include fireworks site inspections before every show, explosive storage magazine inspections for the safe storage of explosives, mechanical ride inspections each year before the first setup, pick up expired marine flares in the spring and fall of each year, and they conduct hundreds of hours of lectures and training on fire related subjects to civic groups, police and fire departments, and to students at the Maine Criminal Justice Academy and National Fire Academy.

In 2020 the Investigation Division handled complaints that resulted the classification of 154 accidental fires, 109 incendiary fires, and 162 undetermined fires. A classification of Undetermined is derived from the lack of proof to classify a fire as incendiary or accidental. They also conducted 10 illegal explosives, and 6 fireworks investigations. Investigators inspected 81 fireworks sites, as well as 11 explosive storage magazines. Maine is a vast state demanding thousands of hours in travel each year for the investigative division. Due to the Covid pandemic the investigators aided other law enforcement and health related state and local agencies 156 times.

Inspections Division

Assistant State Fire Marshal Rich McCarthy oversees the **Inspections** and **Plans Review** Divisions of the State Fire Marshal's Office. He serves as a representative of the Office, is involved in the State's Building and Energy Code development and implementation and serves on National Fire Protection Association committees.

The Inspections Division of the State Fire Marshal's Office has three regional offices located throughout Maine and the 10 personnel inspect approximately 25 distinct types of facilities: with the primary focus being enforcement of NFPA 101, the Life Safety Code. The types of facilities inspected include all facilities licensed through the Department of Health and Human Services, such as: hospitals, nursing homes, daycare facilities, boarding homes, and mental health facilities. They also inspect public, commercial, and licensed residential structures to ensure compliance with state and federal fire codes and ordinances. Inspections include compliance with federal ADA (Americans with Disability Act) standards. The Division is responsible for licensing and permitting of explosives and fireworks, inspection of aboveground storage tanks, automobile racing facilities, and mechanical rides. They work in conjunction with the Investigation Division when their expertise is needed. In 2020, the division did 3,563 inspections.

The Division also provides National Fire Protection Association (NFPA) training in the state. In 2020, the Division did two 40-hour NFPA 101 trainings for 42 people and conducted three 8-hour NFPA 101 classes for 66 people.

Plans Review Division

All major construction projects in Maine must be reviewed by the Fire Marshal's Office for life safety, fire sprinkler and code compliance. Those construction plans reviews include businesses as well as day care facilities, schools, assisted living and numerous other public buildings. Plans are reviewed in the Augusta office for construction in all 16 counties in Maine.

Construction Plans Review: The Plans Review Division consists of three people who review blueprints to issue permits for construction and alteration of public buildings and handicap accessibility. Plan Reviewers are responsible for evaluating building plans, site plans, fire protection system plans, and specifications for compliance with applicable state and federal fire codes, laws, as well as ADA (Americans with Disabilities Act) requirements. They respond to requests for information and technical assistance from architects, engineers, and developers on design criteria, and examine requests for variance to the fire codes and local laws pertaining to fire safety. The plans reviewers are NFPA (National Fire Protection Association) certified. In 2020 the plans review team reviewed 1,055 plans and permitted 569 projects. The total cost value of these projects was approximately \$1,019,964,166.00.

Sprinkler Plans Review: Gerald Leach reviews fire sprinkler system plans, issues sprinkler permits and licenses, does field inspections of sprinkler systems for compliance with state and national rules and codes, and does general sprinkler system trainings. In 2020, he issued 775 fire sprinkler permits and 168 fire sprinkler licenses (new and renewals).

Clerical Division

The Clerical Division has a staff of 4 administrative assistants who process our paperwork and requests for inspections. The staff send inspection requests to the inspectors and when the inspection is complete, the staff either send an approval to the licensing agency or issue a permit directly. The staff processed approximately 3,563 inspection requests in 2020. Once an approval or permit has been issued, the files are scanned into our document management system. This management system contains approximately 450,000 documents and reduces the number of paper files the office must store. In addition to approvals and permits, the staff also process approximately 250 groundwater cleanup claims every year. Our office works with the Department of Health and Human Services on federal healthcare inspections. We are the inspection agent for Centers for Medicare & Medicaid Services, which is a federal agency that oversees Medicare and Medicaid funding. Without the tireless work of these administrative aces, our work would be much more difficult. In 2020 the Clerical Division processed 160 federal health care inspections.

Records Request Division

Dorothy Bonsant is our Paralegal and is the sole staff member for this Division. The Office of State Fire Marshal received approximately 249 Freedom of Access Act and Public Record Requests in 2020. The requests were received from attorneys, property owners, prospective buyers, tenants, insurance companies, law enforcement agencies, fire departments and reporters. Requestors primarily sought investigative reports and photographs; however, audio recordings of interviews, drawings, permits, inspections and historical record information were also requested. Information is generally released pursuant to the Criminal History Record Information Act, ([CHRIA](#)); Intelligence and Investigative Record Information Act, ([IIRIA](#)); Arson Reporting Immunity Act ([ARIA](#)); and the Freedom of Access Act ([FOAA](#)).

Research and Public Education Division

The Division staff consisted of Senior Planning and Research Analyst Michelle Mason Webber. In June 2020 Michelle left the Fire Marshal's Office and was replaced by Richard E. Taylor in December. Preparations for 2020 public education efforts were halted in March because of the COVID pandemic. The collection of fire data from Maine's fire departments on fire incidents throughout Maine continued. The final information is made available to the public through NFIRS (National Fire Incident Reporting System). The research division uses GIS software and various statistical methods to analyze fire incident data in Maine. In addition to NFIRS data collected, the Division uses many other data sets from the Census, CDC, Department of Labor and more in its effort to examine Maine's fire burden. Four measures are used to examine Maine's fire burden and include fire death and injury, property loss and the costs of responding to fires and the cost of maintaining a fire department.

The free statewide Maine Fire & EMS Incident Reporting System (MEFIRS), developed so departments could document their incidents, was used by 268 fire departments in 2020. Because of the COVID pandemic there were no MEFIRS fire report trainings around the state. In the past these trainings were used to help fire departments increase the number, and quality, of their fire reports.

2020 Maine Fire Fatalities

Town	Date	Gender	Age	Cause
Fort Fairfield	1/13/2020	F	90	Undetermined
Fort Fairfield	1/14/2020	F	39	Undetermined
Vassalboro	2/13/2020	M	26	Appliance (toaster) Malfunction

Arundel	9/22/2020	M	19	Vehicle Accident
Robbinston	10/7/2020	M	66	Incendiary
Lebanon	10/14/2020	F	46	Incendiary
Bangor	11/12/2020	M	46	Undetermined
New Sharon	11/24/2020	F	59	Undetermined

Maine Fire Deaths Each Decade Since 1950

The graph below shows the total number of Maine fire fatalities during each decade since 1950. There had been a significant decrease in deaths since the 1970's, perhaps due to increased smoke detector use and more fire prevention and education programs taught by fire departments. Building codes are also being enforced during construction or renovation of licensed facilities. However, the decade ending in 2019 marks the first decade since the 1970's that we have seen an increase in fire deaths. We have had several multiple-fatality incidents in the last eight years that have increased our fatality count quickly.

Fire Department Trainings and Community Risk Reduction Activities

Training: Fire departments spend a great deal of time training on apparatus, equipment handling and proper firefighting techniques. When a call comes into the station, everyone must respond quickly and safely and work as a team to handle the incident. In 2020 there were few such events due again to the COVID pandemic.

Live training burns are done so firefighters can practice how to safely search a building and extinguish the fire.

Fire Personnel train at this Farmington facility in Farmington, Maine.

Facilities engineered and build specifically for training fire service personnel.

Fire service personnel practice entering a burning building.

Photo provided by Chief Peter Gleeson

Community Risk Reduction and Education Activities: Community risk reduction is a different type of activity for fire departments. Instead of responding to incidents after they happen, a fire department using a community risk reduction program can help residents reduce or eliminate potential hazards in their homes and community, which increases their quality of life and their safety.

Fire departments who partner with other community agencies can increase their interaction with residents who need assistance and make a bigger impact in the community than if the fire department acted on its own.

One of the keys to a successful community risk reduction program is data, including: NFIRS data on fire department incidents; Census data on the income levels, education, housing and age of the community; and any other data that may help the fire department discover where vulnerable residents are located.

2020 SUMMARY INCIDENT DATA

Photo: Maine Department of Transportation

The incident data summarized in the following pages are provided by Maine fire departments that reported to the Maine State Fire Marshal's Office. The data is validated by the State Fire Marshal's Office for completeness and accuracy, and then exported to the U.S. Fire Administration's National Fire Incident Reporting System (NFIRS) for release to the fire service and public. The data for this report was pulled from NFIRS on May 19, 2021.

During 2020, valid incident report data was received from 272 Maine fire departments, who reported a total 119,434 incidents. These incidents included 6,238 fire-related incidents, 76,371 emergency medical service (EMS) incidents, and 36,735 non-Fire & non-EMS related and other no activity hazardous conditions, service, and other calls. This represents a considerable decrease from 2019. Overall, total incidents fell 17.4% from 2019. EMS and non-fire non-EMS and other calls fell a combined 62.3%. Fire incidents decreased 2.2% from 2019. Operational problems can lead to changes but some of the change in 2020 was likely influenced by the COVID Pandemic. Further analysis is needed to assess the full impact of COVID on Fire Department incident response numbers.

Maine 2020 Incident Types

The following tables show trends in the three general types of incidents responded to by Maine fire departments. The total number of incidents reported to our office has increased over time. The different incident types are calculated as a percentage of the total number of reported incidents. Data for these tables was pulled from the 2016 – 18 annual reports and from the NFIRS database for the years 2019 and 2020 on May 20, 2021¹ (percentages don't add up to 100% due to rounding).

There is little variation in the percentage of all incidents each incident category comprises. In 2020 however, fires as a percentage of all incidents reached a five-year high of 5.3%.

Fires have generally varied slightly as a percentage of reported incidents.

	2016	2017	2018	2019	2020
Total Valid Incidents Reported	124,266	112,020	137,672	144,587	119,434
Fires Reported	6,422	5,623	6,459	6,107	6,328
Fires as a Percentage of All Reported Incidents	5.2%	5.0%	4.7%	4.2%	5.3%

Emergency Medical Services (EMS) calls have generally varied slightly as a percentage of reported incidents.

	2016	2017	2018	2019	2020
Total Valid Incidents Reported	124,266	112,020	137,672	144,587	119,434
EMS Calls Reported	81,864	70,410	91,065	97,911	76,1,926
EMS as a Percentage of all Reported Incidents	65.9%	62.9%	66.1%	67.7%	63.9%

Non-fire and Non-EMS calls have generally been about 29 % of reported incidents.

	2016	2017	2018	2019	2020
Total Valid Incidents Reported	124,664	112,020	137,672	144,587	119,434
Non-Fire Non-EMS Calls Reported	35,998	35,987	40,148	40,569	36,735
Non-Fire Non-EMS Calls as a Percentage of all Reported Incidents	29.0%	32.1%	29.2%	28.1%	30.8%

¹ Years 2016 to 2018 are drawn from previous reports to reflect the time in which those numbers were drawn from NFIRS and may vary from a tally taken currently as some departments continue to report incidents after the time the annual report is written.

NFIRS 2020 Frequency of Incident Type Codes

FIRES		
	Structure Fires (110-118, 120-123)	3,494
	Vehicle Fires (130-138)	606
	Other Fires (100, 140-173)	2,228
	Total Fire Calls	6,328
Pressure Ruptures, Explosion, Overheat (200-251)		165
EMS/Rescue		
	EMS (300-323)	75,438
	All Others (331-381)	933
	Total EMS/Rescue Calls	76,371
Hazardous Condition (400-482)		10,313
Service (500-571)		7,827
Good Intent (600-671)		7,954
Severe Weather (800-815)		663
Special Incident (900-911)		488
False Calls		
	Malicious Calls (710-715, 751)	292
	Other False Calls (700, 721-746)	9,033
	Total False Calls	9,325
	Total 2018 Calls	119,434

2020 Incident Types by Percentage of Total Incidents

2020 Fire Department Mutual Aid Activities

Mutual Aid	Frequency	Percentage
Mutual Aid Given	8,707	7.29%
Mutual Aid Received	4,993	4.18%
No Mutual Aid	105,734	88.53%

2020 Number of Fire Departments with Valid Reports by County

(Total number of fire departments = 274)

SELECTED FIRE STATISTICS

House Fire in Arundel June 2020

Photo by Arundel Fire Rescue

2020 Fire Contributing Factors

(chosen from all Contributing Factors where frequency equals >10)

Code	Contributing Factor	Frequency
00	Other factor contributed to ignition	19
10	Misuse of material or product, other	68
11	Abandoned or discarded materials or products	118
12	Heat source too close to combustibles.	99
13	Cutting, welding too close to combustible	17
14	Flammable liquid or gas spilled	18
18	Improper container or storage	18
19	Playing with heat source	19
20	Mechanical failure, malfunction, other	93
23	Leak or break	24
25	Worn out	23
30	Electrical failure, malfunction, other	45
34	Unspecified short-circuit arc	58
35	Arc from faulty contact, broken conductor	11
43	Installation deficiency	10
50	Operational deficiency, other	22
52	Accidentally turned on, not turned off	15
53	Equipment unattended	49
55	Failure to clean	69
58	Equipment not being operated properly	11
60	Natural condition, other	36
61	High wind	34
62	Storm	13
72	Rekindle	22
73	Outside/open fire for debris or waste disposal	49
74	Outside/open fire for warming or cooking	28
NN	None	788
UU	Undetermined	472

2020 Fire Heat Sources

(chosen from all Heat Source data)

Code	Description	Frequency
50	Explosive, fireworks, other	1
74	Other static discharge	2
71	Sunlight	3
70	Chemical, natural heat source, other	4
80	Heat spread from another fire, other	6
82	Radiated heat from another fire	6
56	Incendiary device	9
72	Chemical reaction	9
97	Multiple heat sources including multiple ignitions	10
68	Backfire from internal combustion engine	12
63	Heat from undetermined smoking material	13
69	Flame/torch used for lighting	13
84	Conducted heat from another fire	13
54	Fireworks	14
73	Lightning	16
66	Candle	18
83	Flying brand, ember, spark	18
42	Molten, hot material	19
81	Heat from direct flame, convection currents	23
41	Heat, spark from friction	39
60	Heat from other open flame or smoking materials	54
65	Cigarette lighter	66
64	Match	71
11	Spark, ember or flame from operating equipment	108
40	Hot or smoldering object, other	141
61	Cigarette	147
13	Arcing	161
00	Heat source: other	234
43	Hot ember or ash	272
12	Radiated, conducted heat from operating equipment	300
10	Heat from powered equipment, other	307
UU	Undetermined	912

“Undetermined” is the most frequently used code to describe a fire’s heat source. Although that may be a valid code in some cases, fire departments often use this code as a “default” in their NFIRS reports. This is an example of why correct and accurate data is important when filling out reports. Bad data can lead to wrong conclusions and poor decisions.

2020 Fire Dollar Loss

Note: this table is based on those incident reports that have dollar loss data. Due to the fact that not all departments reported dollar losses and that only 62% of department's reported, the actual dollar loss numbers are probably higher than the table's data indicate.

	Dollar Loss Property	Dollar Loss Contents	Total Dollar Loss
Structure Fires	\$24,151,449.00	\$8,775,771.00	\$32,927,220.00
Mobile Property	\$3,496,254.00	\$616,645.00	\$4,112,899.00
Other Fires	\$473,859.00	\$190,443.00	\$664,302.00
All Fires	\$28,121,562.00	\$9,582,859.00	\$37,704,421.00

Actions Taken by Maine Fire Departments during Fires in 2020

(Note: Where frequency equals > 1,000; Departments could report more than one action per incident)

Code	Actions Taken	Frequency
92	Standby	1,055
71	Assist physically disabled	1,209
45	Remove hazard	1,370
00	Action taken, other	1,390
55	Establish safe area	1,661
11	Extinguish	2,189
73	Provide manpower	2,355
78	Control traffic	2,375
93	Cancelled enroute	2,650
81	Incident command	2,674
70	Assistance, other	3,960
30	Emergency medical services, other	4,185
31	Provide first aid & check for injuries	5,948
34	Transport person	7,753
86	Investigate	17,419
32	Provide basic life support (BLS)	19,855
33	Provide advanced life support (ALS)	24,648

STRUCTURE FIRES

Fort Fairfield Maine DOT Building: January 2, 2020

2020 Structure Fires by Property Use

Residential Use

(Number of reports with this data = 1,412)

Public Property Use

(Number of reports with this data = 171)

Industrial Property Use

(Number of reports with this data = 124)

Detector Presence in Structure Fires During 2020

(Number of reports with this data = 816)

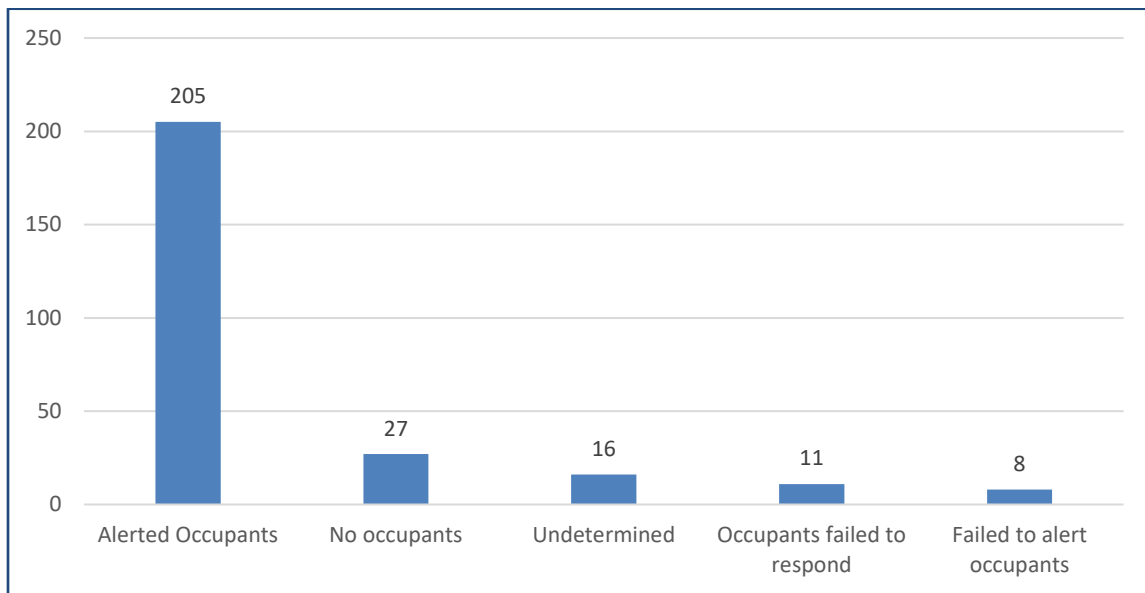

Detector Type in Structure Fires During 2020

(Number of reports with this data = 438)

Detector Effectiveness in Structure Fires During 2020

(Number of reports with this data = 267)

Automatic Extinguishing System Operation During Structure Fires in 2020

(Number of reports with this data = 56)

RESIDENTIAL FIRES

All-hands fire on Rogers Road in Yarmouth. The fire started with an electrical overheating in the garage that spread to the attached home.

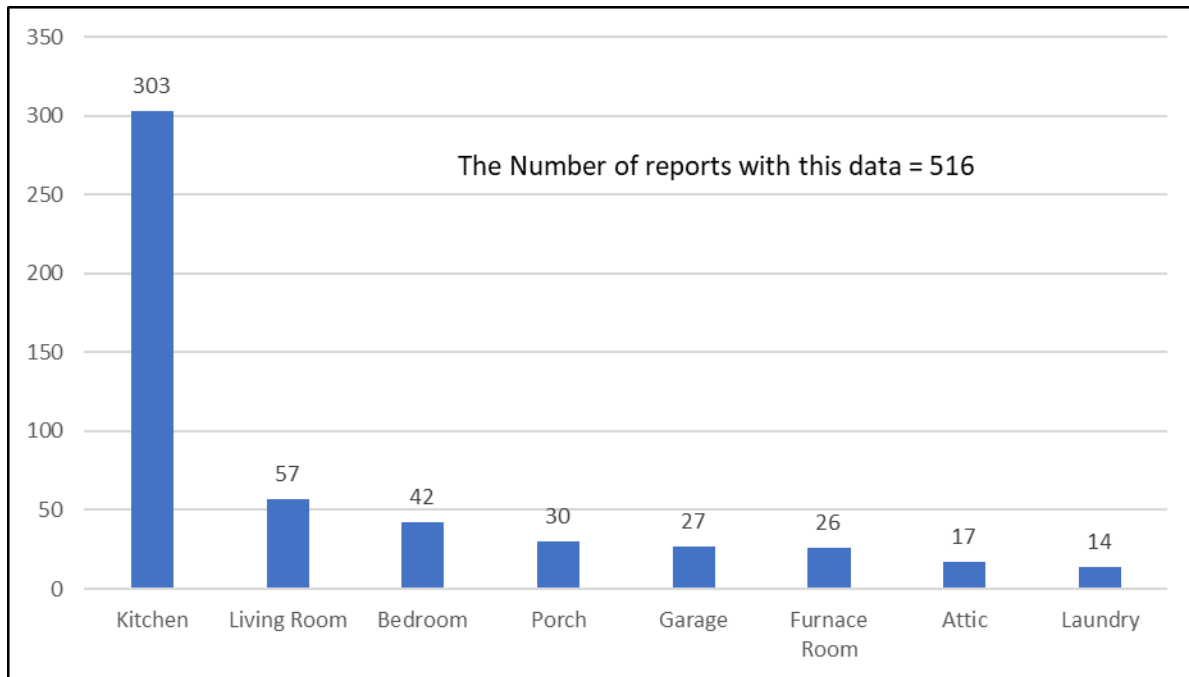

Photo provided by Yarmouth Fire Rescue

Diagram of Residential Fires-Area of Origin in 2018

Number of Reports = 637; does not add up to 100% due to rounding)

2020 Residential Fires-Area of Origin

Observation: The number of fires in residences dropped 23% from 2018.

2020 Residential Fire Dollar Loss by Month

Note: this table is based on those incident reports that have residential dollar loss data. Due to the fact that many reports don't have dollar loss data completed, and only 62% of the state's fire departments submitted reports in 2020, the actual residential dollar loss numbers are probably much higher than the table's data indicate. The data is based on fire loss in structures using NFIRS codes.

	Property Loss	Contents Loss	Total Loss
January	\$709,392	\$282,147	\$991,539
February	\$2,750,317	\$591,276	\$3,341,593
March	\$2,589,103	\$1,202,860	\$3,791,963

October	\$632,771	\$84,361	\$717,132
November	\$810,851	\$292,860	\$1,103,711
December	\$1,681,911	\$550,321	\$2,232,232
Total	\$17,282,919	\$5,678,729	\$22,961,648

WILDLAND FIRES

Pictures provided by the Maine Forest Service

Maine Forest Service Wildland Fire Data

The Maine Forest Service (MFS) has, among other duties, responsibility for the detection, prevention and suppression of wildland fires. They are often the responding fire service in Maine's unorganized townships. They also assist and help coordinate activities with Maine fire departments for organized town wildfires. The Office of State Fire Marshal is including the MFS Wildland fire data in our report to give a more complete picture of firefighting activities in the state. The Maine Office of State Fire Marshal appreciates the Maine Forest Services' assistance with this portion of our annual report, and for their activities in general in the State of Maine.

2020 Wildland Fires Fought by the Maine Forest Service by Cause and Region

	Southern Region		Central Region		Northern Region		Statewide

JUVENILE-RELATED INCIDENTS

Note: the data in the Juvenile-Related Incidents section is calculated on different queries than past annual reports, so a comparison between this data and previous annual report data should not be made.

2020 Juvenile-Related Incident Dollar Loss by County

County	Dollar loss
Androscoggin	\$5,900
Kennebec	\$7,000
Penobscot	\$500
Total	\$13,400

2020 Juvenile-Related Incidents by Incident Type

Incident Code	Incident Type	Number of Incidents
111	Building Fire	7

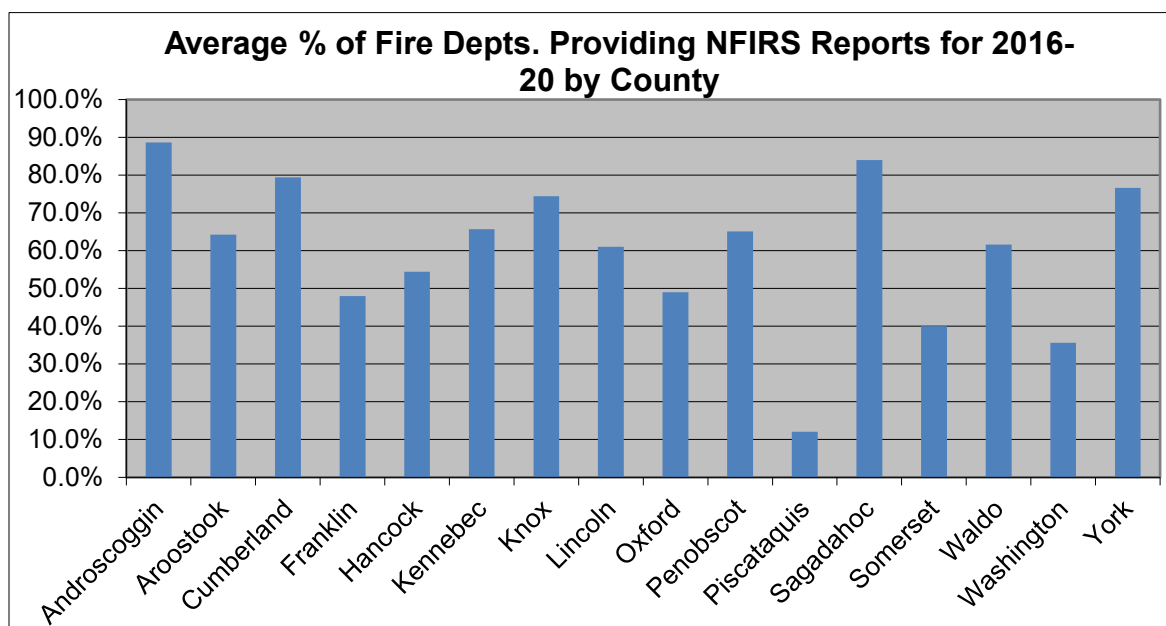

REPORTING HISTORY OF MAINE FIRE DEPARTMENTS FROM 2016 TO 2020

Maine fire departments report to the Maine State Fire Marshal's Office on their activities, as required by Maine statute Title 25 M.R.S. §2395. The data is validated by the Office for completeness and accuracy, and then exported to the U.S. Fire Administration's National Fire Incident Reporting System (NFIRS) for release to the fire service and public.

When fire departments submit data, they develop a data information warehouse regarding their department's response activities. This data can be very valuable if they need to justify a new truck, fire station or paid personnel; submit a grant application; or funds to support local fire prevention activities. Community risk reduction efforts can be targeted by using incident data to analyze where the community needs help.

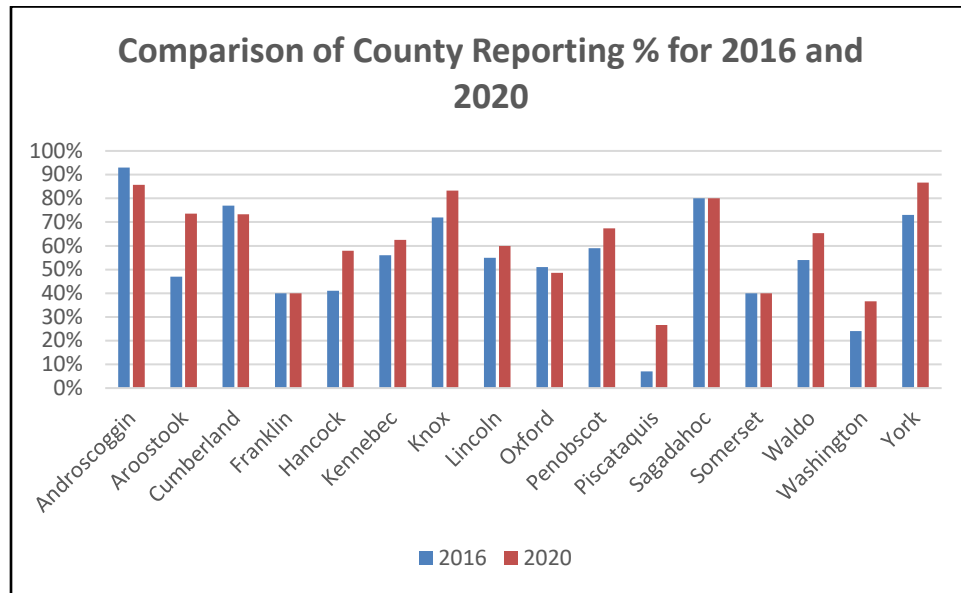

The following pages document recent reporting history for each Maine fire department from 2014 to 2018. Note: the data in these pages has changed from the 2017 annual report because several fire departments submitted additional data for previous years, inactive FDID numbers have been removed, and one FDID number was added in 2018. As a state, the average percentage of fire departments reporting to NFIRS has risen from 47% in 2014 to 62% in 2018. This is an encouraging trend.

Percentage of Maine Fire Departments (FDID) Reporting by County

County	Total # of FDID	2016	2017	2018	2019	2020
Androscoggin	14	93%	93%	100%	71.4%	85.7%
Aroostook	34	47%	71%	65%	64.7%	73.5%
Cumberland	30	77%	87%	83%	76.7%	73.3%
Franklin	20	40%	50%	55%	55.0%	40.0%
Hancock	38	41%	62%	61%	50.0%	57.9%
Kennebec	32	56%	69%	69%	71.9%	62.5%
Knox	18	72%	83%	67%	66.7%	83.3%
Lincoln	20	55%	65%	55%	70.0%	60.0%
Oxford	37	51%	54%	51%	40.5%	48.6%
Penobscot	49	59%	73%	63%	63.3%	67.3%
Piscataquis	15	7%	13%	7%	6.7%	26.7%

Waldo	26	54%	62%	73%	53.8%	65.4%
Washington	41	24%	37%	44%	36.6%	36.6%
York	30	73%	77%	83%	63.3%	86.7%
Maine FDID % Reporting	438	53%	63%			
Maine FDID % Reporting	439 (1 FD added in 2018)	---	---	62%	57%	61%

*For specific information on which FDID in each county reported, see following pages of report. ** Total number of FDID numbers has been revised from previous annual reports, due to removal of inactive FDID numbers and addition of an FDID # in 2018

Individual Maine Fire Department Reporting Frequency from 2016 to 2020

Note: a “I” in a cell means the fire department submitted valid reports for that year and an asterisk in a cell means fewer than 5 valid reports were submitted for that year.

Fire department listings and percentages have been adjusted from past annual reports, due to several fire departments submitting data for previous years, inactive FDID numbers being removed, and an FDID number being added.

GLOSSARY OF TERMS

Alarm: Any notification made to the fire department that a situation exists or may exist that requires a response.

Area of Origin: The room or area within the property where the fire originated.

Automatic: As applied to fire protection devices, a device or system providing an emergency function without the necessity of human intervention.

Automatic Extinguishing System: A system that controls and extinguishes fires without the need for human intervention.

Building: A structure enclosed with walls and a roof and having a defined height.

Building Code Type: Building code classification of the building involved in the incident.

Building Fire (also Structure Fire): Any fire occurring inside or involving a building. A building fire may be a wastebasket, a mattress fire, or a roof fire; whether or not structural members were actually involved.

Casualty (fire): A person who is injured or killed at the scene of a fire. (This includes injuries or deaths from natural or accidental causes sustained while involved in the activities of fire control, rescue attempt, or escaping from the dangers of the fire).

Combustible: A material or structure that will release heat energy on burning.

EMS: Emergency Medical Services

Fatality: An injury that is fatal or becomes fatal within 1 year of the incident.

Fire: Any instance of destructive and uncontrolled burning, including explosion, of combustible solids, liquids, or gases. Fire does not include the following, except where they cause fire or occur as a consequence of fire:

- Lightning or electrical discharge
- Rupture of a steam boiler, hot water tank, or other pressure vessel due to internal pressure and not to internal combustion.
- Explosion of munitions or other detonating material.
- Accident involving ship, aircraft, or other vehicle.
- Overheat condition.

FDID: A unique five-character identifier assigned by the State to identify a particular fire department within the State. This identifier may also identify the county, fire district, or other jurisdiction in which the fire department is located. It is used to identify incident data that have been collected and reported by individual fire departments.

Hazardous Material: Any material that is an air-reactive material, flammable, or combustible liquid, flammable gas, corrosive material, explosive material, organic peroxide, oxidizing material, radioactive material, toxic material, unstable material or reactive material, and any substance or mixture of substances that is an irritant, a strong sensitizer, or that generates pressure through exposure to heat, decomposition, or other means.

Ignition: The physical and chemical processes involved in reaching a point of self-perpetuation of fire whether or not there is an open flame.

Incident: An event to which the reporting agency responds or should have responded. Included are “walk-ins” treated at the station. An incident may have more than one response. A rekindle is a separate incident.

Incident Report: A document prepared by fire department personnel about a particular incident. For understanding and legal purposes, this report should be in their own words. For summarization purposes, the information on this report can be classified into broad categories. The incident report is always part of the incident record or file.

Mobile Property Type: Property that was designed to be movable whether or not it still is (e.g. vehicles, ships, and airplanes).

Mutual Aid: Assistance provided under a written agreement that establishes general guidelines and procedures for providing and receiving assistance between fire departments. (Requested in addition to initial dispatch)

Structure Fire (Residential & Commercial): Any fire inside a structure or on, under or touching a structure. A structure fire may be an automobile fire in a tunnel, a leaking flange in a refinery tower, or a building.

Wildland: Land in an uncultivated, more or less natural state, and covered by timber, woodland, brush or grass. An area in which development is essentially nonexistent except for roads, railroads, power lines, and similar facilities.

Wildland Fire: Any fire involving vegetative fuels, other than prescribed fire, that occurs in the wildland. A wildland fire may expose and possibly consume structures.
