

# MAINE INFORMATION AND ANALYSIS CENTER

# ANNUAL REPORT 2024

## Introduction

In the aftermath of the September 11, 2001, terrorist attacks against the US, there emerged a widespread recognition of the importance of sharing threat information between federal, state, local, and territorial government. To address this exigency, public safety communication hubs called “fusion centers” were created throughout the United States. Today, there are 80 primary and designated fusion centers in operation, with at least one in each of the 50 states.

Source: Department of Homeland Security FY21 Fusion Center Assessment

In December 2006, Maine governor John Baldacci signed an executive order to establish Maine’s fusion center: the Maine Information and Analysis Center (MIAC). The MIAC’s objective is safeguarding the state's population and infrastructure by facilitating effective information sharing among all levels of government and private sector partners. The MIAC enhances public safety by collecting, processing, analyzing, and appropriately sharing intelligence information with principal agencies, all tiers of government, and the private sector. Since its inception 18 years ago, the MIAC has supported terrorism investigations, aided in large-scale criminal investigations, and distributed valuable threat information on a need to know, right to know basis.

While carrying out its mission of safeguarding public safety, the MIAC must adhere to the protections afforded by the US and state government. As such, the MIAC operates ONLY for criminal justice purposes and observes all applicable personal liberty protections outlined by federal statutes, state statutes, and MIAC privacy policy guidelines. To demonstrate adherence to these guidelines, 25 M.S.R.A Chapter 201§ 1801 Act to Require Annual Information Reporting by the Maine Information and Analysis Center was passed in 2021. The legislation mandates that the MIAC produce an annual report for the joint standing committee on Criminal Justice and Public Safety. This annual report offers a summary of crimes, incidents, and reports the MIAC has reviewed and processed while safeguarding personal privacy between January 1, 2024, and December 31, 2024.

## **2024 Annual Information**

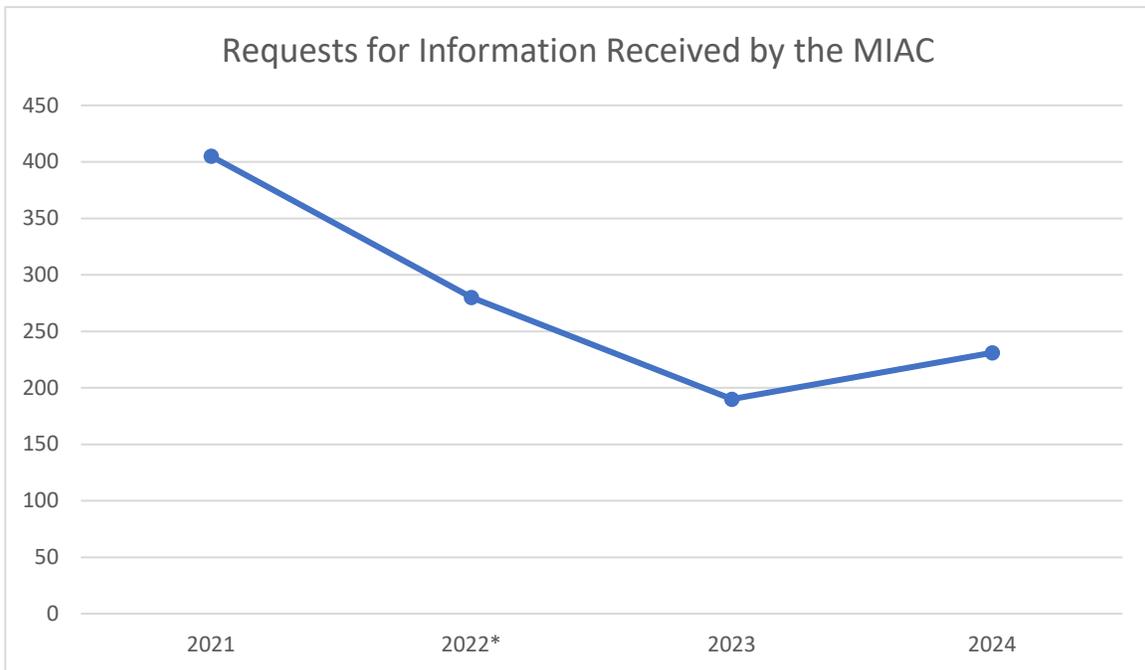

In 2024, the MIAC made 1,226 total entries into its information technology system (ITS) and assisted hundreds of federal, state, local, tribal, and private sector partners for criminal justice purposes, to include public safety and national security concerns. The following is an illustration of these entries and assists.

The MIAC received and disseminated information 532 times collectively in 2024. The MIAC can only disseminate information when there is both (1) a valid investigative request AND (2) the requesting party has a valid and legitimate need to know and right to know the information. Upon meeting both criteria, the MIAC will respond to the request by evaluating and processing information received to determine its origin, how the information was obtained, and the classification of the information. After ensuring the dissemination criteria are met, the information is then shared in a manner consistent with the MIAC's internal directives, internal procedures, and applicable provisions of the MIAC's Privacy Policy. The MIAC Privacy Policy is available for public review on the MIAC's website, <https://www.maine.gov/dps/msp/specialty-units/MIAC/About>.

A real-life example of information sharing by the MIAC in 2024 resulted from a Maine county dispatch center reporting to the MIAC that 24 Maine schools had received threatening emails. The email contained verbiage such as, "I placed explosives inside all of your schools..." and "you will all die." The MIAC compared the threat received via

email to other incidents of a similar nature and found a trend of analogous threats reported nationally that were later deemed hoaxes. The MIAC disseminated this newfound trend information to schools, law enforcement, and emergency management professionals to provide situational awareness to aid in their response planning. Adding this national context and analysis to threat situations, to include direct threats made to schools, can lessen or eliminate adverse effects resulting from hoax threats, such as creating unnecessary danger to first responders and the receiver(s) of the threat.<sup>1</sup>

In 2024, the MIAC received 231 requests for information from partners. One such request originated from a Maine county law enforcement agency requesting the MIAC's assistance with a case in which a victim remitted over 50k in bitcoin to a company in another country. The MIAC was able to communicate with Interpol on the agency's behalf to aid in their investigation. Other requests for information from partners involved the following: hoax explosives and firearms threats to schools and houses of worship, fraud, identity theft scams, impersonation of law enforcement, burglary, human trafficking, drug trafficking, firearms trafficking, homicide, threats to schools involving the presence or threat of firearms and/or explosives, domestic violent extremism<sup>2</sup>, phishing, compromised data, terrorism, and reported threats to critical infrastructure.

\*The MIAC changed their ITS in 2022, causing a shift in how requests for information were counted

The MIAC received 178 requests for information via the Homeland Security Information Network (HSIN) in 2024. HSIN is the Department of Homeland Security's official system for nationwide intelligence notification between federal, state, local, territorial, tribal, international and private sector partners. HSIN allows agencies access to homeland security information and provides a secure platform to send requests, plan events, respond to incidents, and share information. In 2024, HSIN requests for information included missing persons, national security threats, harassment, firearm threats to a state government building, property theft, homicide fugitive, fraud, foreign cyber threat actor activity, and multiple occurrences of swatting calls made to schools, law enforcement, and a public venue. A specific example of a HSIN request processed by the MIAC in 2024 was for information on a criminal group engaging in multiple fast cash scams across the Northeast. The MIAC responded, sharing that the scam had also been attempted in Maine businesses on at least three occasions, with one attempt being successful.

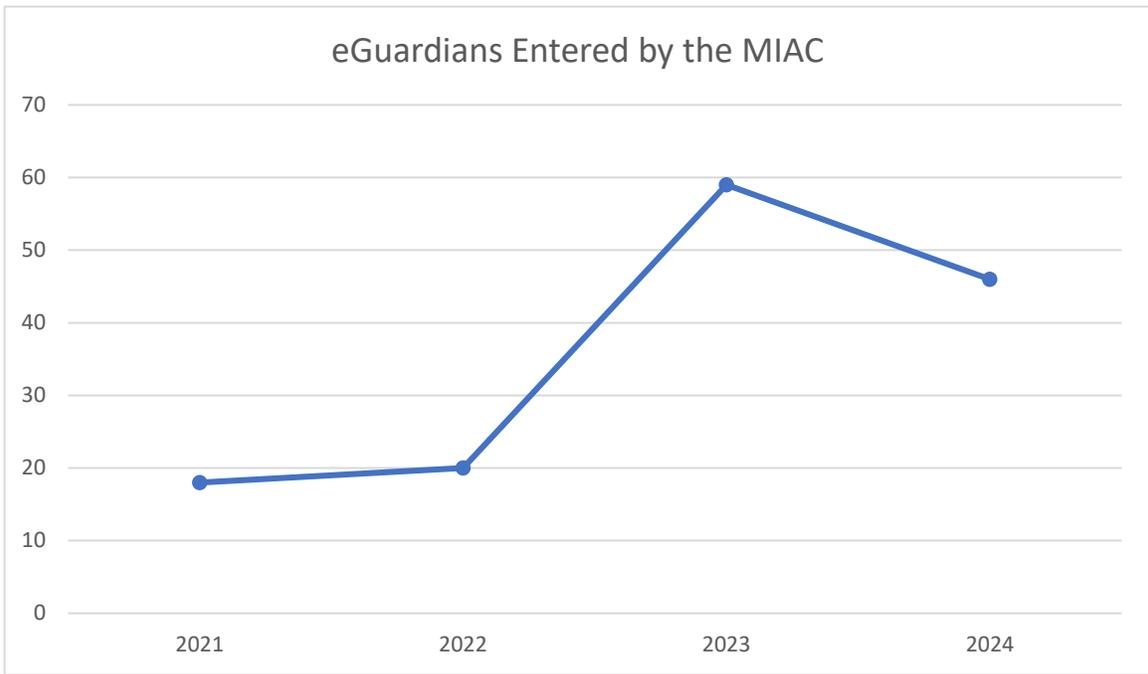

In 2024, the MIAC received 53 requests for Automated License Plate Reader (ALPR) information. All ALPR requests must be vetted to ensure they are valid, legitimate requests for the purpose of ongoing criminal investigations or missing or endangered persons cases. Homicide, property theft valued at \$20,000, fleeing fugitives, death investigations, among other ongoing criminal investigations were catalysts for ALPR requests in 2024. A notable ALPR request received by the MIAC in 2024 originated from a local police department conducting a drug trafficking investigation involving assault against a victim, a deadly overdose, and the transportation of illegal drugs across multiple states.

In 2024, the MIAC received 1 request for facial recognition from an out-of-state agency requesting assistance with an identity theft case. The MIAC does not use facial recognition software; therefore, the request was forwarded to the Bureau of Motor Vehicles.

In 2024, the MIAC processed 10 notifications from the FBI's Terrorist Screening Center (TSC). The TSC is responsible for maintaining the US Government's consolidated terrorist screening database and alerts law enforcement when encountering an individual reasonably believed to engage in terrorism or terroristic

activity. The MIAC only processes TSC notifications with a Maine nexus or direct impact to Maine, providing law enforcement with the necessary information to combat terrorism and other national security threats.

The MIAC made 46 entries into the FBI’s eGuardian system in 2024, a system that allows federal, state, local, tribal, and territorial jurisdictions to share terrorism-related information. eGuardian acts as the repository for validated Suspicious Activity Reports (SARs) and is an unclassified system that only approved and vetted law enforcement and public safety officials can access. Threats to schools constituted most entries into eGuardian in 2024, but eGuardian entries also covered a variety of other topics, including a tip made by a private citizen in 2024 regarding a Maine citizen voicing their interest in committing terrorism by placing and activating explosives in a city park.

Receiving and processing a variety of threat notifications, or “tips and leads,” regarding hazards to national security, criminal investigations, and other threats are an essential duty of a fusion center. The MIAC received 171 tips and leads in 2024 to include a tip and lead that involved a report of sex trafficking of a minor across multiple states, to include the State of Maine. Other tips and leads included reports of blackmail sextortion, death threats, human trafficking, homicide, missing persons, fentanyl and heroin distribution, bomb threats, gang activity, and

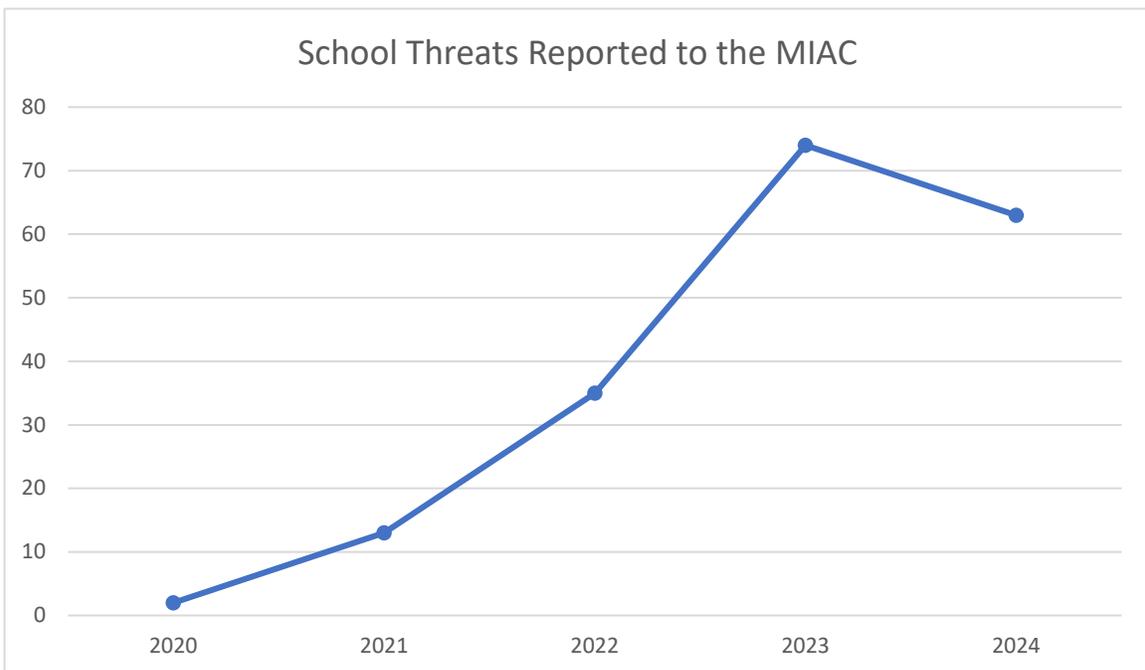

more. Tips and leads are submitted by a variety of sources, including, but not limited to, the public, private sector, law enforcement, or anonymous sources. As a result, the information submitted may be based on mere suspicion or on a level of suspicion that is less than "reasonable suspicion." First and foremost, the tip must be evaluated to determine whether the information received is consistent with the mission of the MIAC. If so, it is then processed, analyzed, and disseminated to the applicable agency if necessary. While tips and leads vary in terms of usefulness and accuracy, they can also act as a catalyst for analyzing correlating pieces of data, potentially leading to information that could assist in proactively preventing criminal or terroristic acts.

Another service frequently performed by the MIAC is bulletin dissemination. In 2024, the MIAC disseminated 480 bulletins consisting of 145 MIAC-created bulletins and 335 bulletins created by other agencies. All bulletins created and disseminated by the MIAC are reviewed and must adhere to the MIAC's privacy policy. As previously noted, information is only disseminated by the MIAC if there is a valid investigative request, and the requesting party has a valid and legitimate need to know and right to know the information. In 2024, MIAC bulletins covered a variety of topics, such as cybercrime, homicide, burglary, wanted persons, theft, school threats involving firearms and explosives, sexual assault, officer safety, homicide, missing persons, hoax threat calls, training announcements, and swatting.

Some MIAC-created bulletins are called "Situational Awareness Bulletins." In 2024, the MIAC created 80 Situational Awareness Bulletins to bring attention and awareness to activities affecting public safety in Maine and nationwide. Examples of Situational Awareness Bulletin topics included, but were not limited to:

- A string of identity fraud incidents affecting multiple states.
- Scam phone calls targeting parents of Maine student athletes. Parents received calls claiming their child was in custody and needed bail money to be released. The caller attempted to legitimize the scam by relaying accurate information about the student's college and its security officer.

- Firearms violence committed across the State of Maine with a criminal nexus.
- A joint product between the MIAC and the High Intensity Drug Trafficking Areas program detailing current narcotics trends and seizures. One of these products highlighted a narcotic reported in a neighboring state called "carfentanil," a drug estimated to be 100x more potent than fentanyl.
- School threats, including hoax active shooter threats. There were 63 school threats reported to the MIAC in 2024, representing a 15% decrease in school threat reports since 2023. On multiple occasions, the MIAC has aided successful school threat investigations ending in arrest.

The MIAC also provides situational awareness information via individualized Threat Assessments. Upon request, a Threat Assessment can be prepared for the purpose of event safety planning to protect attendees, law enforcement, and other citizen's safety. The information gathered, which is primarily open source, is then disseminated to the requesting party to be utilized by event safety planners, federal, state, and local government authorities, and private sector partners to counteract threats, including terrorism. However, if the assessment does not identify any risk or threat based on specific articulable facts, it is not disseminated

beyond those who are serving in a public safety role for the event. There were 8 threat assessments produced by the MIAC in 2024, one of which was a threat assessment generated to identify credible, specific threats or active attacks planned against voters, state election officials, or facilities.

The MIAC also authors an annual State of Maine Threat Assessment, offering a comprehensive overview of statewide and nationwide threat trends. The assessment identifies public safety patterns that inform and support state policymakers and decision-makers. Using data from various sources and prior years, the assessment also pinpoints potential threats and trends for the upcoming year.

It must be emphasized that all Threat Assessments are ONLY for criminal justice purposes and must observe all applicable personal liberty protections outlined by the federal government, state government, and MIAC Privacy Policy guidelines. The US Constitution's First Amendment guarantees fundamental rights, including freedom of speech, press, peaceful assembly, and the right to petition the government for redress of grievances. The political or social motivations of any group do not diminish the constitutional rights of the group or its law-abiding members to exercise their First Amendment liberties. The MIAC adheres to these liberties and rights and only reports on First Amendment-protected activities when there is a legitimate public safety reason to do so, such as providing situational awareness to protect the safety of the public, participants, observers, and law enforcement personnel.

## 2024 Privacy Audits

The MIAC conducted two Privacy Audits in 2024. The 1<sup>st</sup> and 2<sup>nd</sup> Privacy Audits are attached.

**Privacy/Civil Liberties/Civil Rights Audit Report**

**For the Period**

**01 January 2024 – 30 June 2024**

## **INTRODUCTION**

This report accounts for the privacy/civil liberties/civil rights (P/CL/CR) audit that was conducted by the Maine Information & Analysis Center (MIAC) audit team (Team) for the period of 01 January 2024 through 30 June 2024.

The members of the Team were MIAC Board Member, James Landau; MIAC Board Member, Arnold Shorey; MIAC Director, LT Mathew Casavant; MIAC Deputy Director/MIAC Compliance Officer, SGT Angela Porter; and Assistant Attorney General/MIAC Privacy Officer, Kent Avery. The audit is conducted pursuant to the MIAC Privacy Policy, specifically Part X(3)(B).

## **GENERAL AUDIT PROCESS**

To conduct the audit, the Team followed the “MIAC Privacy Audit Policy.”

As a general note, certain presumptions generally guided the Team in its work. Those presumptions included, as examples:

- That, generally, records that are the subject of such audits are commonly understood to be restricted for law enforcement (LE) use only.
- That, generally, records that are the subject of such audits are typically confidential/nonpublic by law, and that their dissemination is therefore restricted by law.
- That, generally, conclusions stated or asserted in records prepared by a LE agency (LEA) are presumed to be factually based.
- That, currently, no records subject to such audits that are maintained in MIAC information technology systems (ITS)-are required by law to be purged.
- That certain databases in which records are maintained or through which records are disseminated (for example, eGuardian) are accessible only by authorized LEAs and LE officers (LEOs).
- That the MIAC Compliance Officer reviews and approves each entry in the MIAC ITS on a weekly - if not daily - basis, that information is reviewed and approved prior to its entry into the eGuardian system, and that all bulletins are peer-reviewed before their dissemination.
- That “personally identifying information” was to be construed broadly for the purposes of question 6 on the Record Evaluation Form, and not to be construed to mean “personal information” (as defined in 10 M.R.S. c. 210-B), which is more narrowly defined.

## **POINTS OF DISCUSSION FOR FURTHER REVIEW WITH THE ADVISORY BOARD**

Points of discussion during the audit that will be further discussed by the Board included:

1. There continued to be discussion on what the “record” is when applying the audit template. Questions arose as to whether the MIAC should be judged based upon information received by the MIAC and whether opinions of others should be included as the “record.” There was discussion on whether the audit template should only be applied specifically to MIAC produced “records.”

## **CONCLUSION**

- The audit found no evidence of nonconformance by the MIAC with the Center’s Privacy Policy, revised 04 October 2021.
- As in previous audits, the inclusion of two MIAC Advisory Board Members in the P/CR/CL Audit was found to be constructive and beneficial to this process. They provided valuable feedback and engaged in meaningful discussion on a variety of matters relating to P/CR/CL.

## **ATTACHMENTS**

- Individual evaluation forms accounting for the Team’s work during the privacy audit.

Director Maine Information and Analysis Center

Subject: Audit Evaluation

Lt. Casavant:

This letter is in reference to the requirements of the Maine Information and Analysis Center (MIAC) Privacy/Civil Liberties/Civil Rights (P/CL/CR) Audit Policy. As a participant in the February 5, 2025 P/CL/CR audit, I am providing an evaluation of the audit and the audit's findings on the records reviewed.

We followed the current process of selecting records to be evaluated. The records selected for review were distributed to the audit team prior to the audit date with ample time to become familiar with them. The current AUDIT RECORD EVALUATION FORM was completed for each record reviewed. Without having hard statistics, it felt as if this audit utilized the NOTES/COMMENTS box on the form more than in previous audits. These comments were valuable in clarifying decisions made that did not fit neatly into the options available on the standard form. I believe that this is an indication of the care being taken to be true to the spirit of the audit when the form options were too rigid for the complexity on some records.

In my opinion, the MIAC honored their commitment to maintain privacy rights, civil rights, and civil liberties of all individuals referenced in the records reviewed. The records reviewed displayed a conscientious effort to avoid any infringement on privacy rights. As in previous audits that I attended, the audit committee took the time to have longer conversations about any record that required additional understanding.

I sincerely appreciate the opportunity to have been an active participant in this important review process.

Sincerely,  
James R. Landau, PE PSP APP CPTED BSCP

To whom it may concern:

I found that the audit process for MIAC was efficient, thorough, and illuminating. The random selection of different communications is fascinating and, at the same time, appalling about all the threats that exist in the State of Maine. Lieutenant Casavant and his assistant have made the process very efficient and pointed out any area of communication that might be outside the mission of MIAC. The review committee engaged in in-depth conversations as we reviewed the randomly selected communications. I have learned a lot during this process and find this review system to be used in my leadership responsibilities.

Sincerely,

Dear Lieutenant Casavant:

Pursuant to MIAC Audit Policy, I am providing my thoughts on the 2024 audit process. I found the MIAC audit process to be thorough, fair and balanced in its evaluation of the MIAC's activities, records, and published bulletins. In addition to randomly selected records and suspicious activity reports, each audit team member chose several records to be examined and evaluated. The Privacy Officer (myself) also chose several records. Including both random selections as well as all suspicious activity reports, and finally items chosen by the MIAC Privacy Officer, allowed for a review that is representative of the entire body of MIAC documents.

The discussion was civil, cordial and candid, but focused on difficult issues dealing with the balance between constitutionally protected speech and the need for civil discourse and public safety. The discussion also raised a couple of issues that will be reviewed by the Advisory Board in the near future. Finally, the fact that the audit team consists of individuals with varying backgrounds and experiences adds value and breadth to the team.

The records we reviewed raised no concerns for the audit team. None of those which initially generated discussion were found to be violative of privacy rights or first amendment speech protections.

Overall, the audit process was efficient but thorough, giving proper attention to individual privacy rights and constitutional protections as well as public safety.

**Privacy/Civil Liberties/Civil Rights Audit Report**

**For the Period**

**01 July 2024 - 31 December 2024**

## **INTRODUCTION**

This report accounts for the privacy/civil liberties/civil rights (P/CL/CR) audit conducted by the Maine Information & Analysis Center (MIAC) audit team (Team) for the period of 01 July 2024 through 31 December 2024.

The members of the Team were MIAC Board Member, James Landau; MIAC Board Member, Arnold Shorey; MIAC Director, LT Mathew Casavant; MIAC Deputy Director/MIAC Compliance Officer, SGT Angela Porter; and Assistant Attorney General/MIAC Privacy Officer, Kent Avery. The audit is conducted pursuant to the MIAC Privacy Policy, specifically Part X(3)(B).

## **GENERAL AUDIT PROCESS**

To conduct the audit, the Team followed the “MIAC Privacy Audit Policy.”

As a general note, certain presumptions generally guided the Team in its work. Those presumptions included, for example:

- That, generally, records that are the subject of such audits are commonly understood to be restricted for law enforcement (LE) use only.
- That, generally, records that are the subject of such audits are typically confidential/nonpublic by law, and that their dissemination is therefore restricted by law.
- That, generally, conclusions stated or asserted in records prepared by a LE agency (LEA) are presumed to be factually based.
- That, currently, no records subject to such audits that are maintained in MIAC information technology systems (ITS)-are required by law to be purged.
- That certain databases in which records are maintained or through which records are disseminated (for example, eGuardian) are accessible only by authorized LEAs and LE officers (LEOs).
- That the MIAC Compliance Officer reviews and approves each entry in the MIAC ITS on a weekly - if not daily - basis, that information is reviewed and approved prior to its entry into the eGuardian system, and that all bulletins are peer-reviewed before their dissemination.
- That “personally identifying information” was to be construed broadly for the purposes of question 6 on the Record Evaluation Form, and not to be construed to mean “personal information” (as defined in 10 M.R.S. c. 210-B), which is more narrowly defined.

## **POINTS OF DISCUSSION FOR FURTHER REVIEW WITH THE ADVISORY BOARD**

Points of discussion during the audit that will be further discussed by the Board included:

1. There continued to be discussion on what the “record” is. Questions arose as to whether the MIAC should be evaluated based upon information received by the MIAC and whether opinions of others should be considered a part of the “record.” There was discussion on whether the Privacy Audit Record Evaluation should only be applied specifically to MIAC-produced “records.”
2. There were discussions surrounding whether a report of an antisemitic event’s language surrounding the group should be considered as including a “demographic descriptor” in the record for the purposes of question 11 on the Record Evaluation Form.
3. Discussions on whether a law enforcement report that utilizes the terminology “he” and “she” should be considered as including a “demographic descriptor” in the record for the purposes of question 11 on the Record Evaluation Form.
4. There were some items reviewed during the audit which may have met the qualifications for submitting a Situational Activity Report and therefore could have and possibly should have been entered into the eGuardian system.
5. Concerning question 11 on the Record Evaluation Form, should only the language authored by the MIAC be considered when evaluating the record for demographic, broad, or vague descriptors, or should it be evaluated based on all information, including language and information that was reported to but not authored by the MIAC.

## **CONCLUSION**

- The audit found no evidence of nonconformance by the MIAC with the Center’s Privacy Policy, revised 04 October 2021.
- As in previous audits, the inclusion of three MIAC Advisory Board Members in the P/CR/CL Audit was found to be constructive and beneficial to this process. They provided valuable feedback and engaged in meaningful discussion on a variety of matters relating to P/CR/CL.

## **ATTACHMENTS**

- Individual evaluation forms accounting for the Team's work during the privacy audit.

Subject: Audit Evaluation

Lt. Casavant:

This letter is in reference to the requirements of the Maine Information and Analysis Center (MIAC) Privacy/Civil Liberties/Civil Rights (P/CL/CR) Audit Policy. As a participant in the February 5, 2025 P/CL/CR audit, I am providing an evaluation of the audit and the audit's findings on the records reviewed.

We followed the current process of selecting records to be evaluated. The records selected for review were distributed to the audit team prior to the audit date with ample time to become familiar with them. The current AUDIT RECORD EVALUATION FORM was completed for each record reviewed. Without having hard statistics, it felt as if this audit utilized the NOTES/COMMENTS box on the form more than in previous audits. These comments were valuable in clarifying decisions made that did not fit neatly into the options available on the standard form. I believe that this is an indication of the care being taken to be true to the spirit of the audit when the form options were too rigid for the complexity on some records.

In my opinion, the MIAC honored their commitment to maintain privacy rights, civil rights, and civil liberties of all individuals referenced in the records reviewed. The records reviewed displayed a conscientious effort to avoid any infringement on privacy rights. As in previous audits that I attended, the audit committee took the time to have longer conversations about any record that required additional understanding.

I sincerely appreciate the opportunity to have been an active participant in this important review process.

Sincerely,  
James R. Landau, PE PSP APP CPTED BSCP

To whom it may concern:

I found that the audit process for MIAC was efficient, thorough, and illuminating. The random selection of different communications is fascinating and, at the same time, appalling about all the threats that exist in the State of Maine. Lieutenant Casavant and his assistant have made the process very efficient and pointed out any area of communication that might be outside the mission of MIAC. The review committee engaged in in-depth conversations as we reviewed the randomly selected communications. I have learned a lot during this process and find this review system to be used in my leadership responsibilities.

Sincerely,

Dear Lieutenant Casavant:

Pursuant to MIAC Audit Policy, I am providing my thoughts on the 2024 audit process. I found the MIAC audit process to be thorough, fair and balanced in its evaluation of the MIAC's activities, records, and published bulletins. In addition to randomly selected records and suspicious activity reports, each audit team member chose several records to be examined and evaluated. The Privacy Officer (myself) also chose several records. Including both random selections as well as all suspicious activity reports, and finally items chosen by the MIAC Privacy Officer, allowed for a review that is representative of the entire body of MIAC documents.

The discussion was civil, cordial and candid, but focused on difficult issues dealing with the balance between constitutionally protected speech and the need for civil discourse and public safety. The discussion also raised a couple of issues that will be reviewed by the Advisory Board in the near future. Finally, the fact that the audit team consists of individuals with varying backgrounds and experiences adds value and breadth to the team.

The records we reviewed raised no concerns for the audit team. None of those which initially generated discussion were found to be violative of privacy rights or first amendment speech protections.

Overall, the audit process was efficient but thorough, giving proper attention to individual privacy rights and constitutional protections as well as public safety.
