# ANNUAL REPORT 2025

## Introduction

In the aftermath of the September 11, 2001, terrorist attacks against the US, there emerged a widespread recognition of the importance of sharing threat information between federal, state, local, tribal, and territorial government. To address this exigency, public safety communication hubs called “fusion centers” were created throughout the United States. Today, there are 80 primary and designated fusion centers in operation, with at least one in each of the 50 states.

Source: Department of Homeland Security FY21 Fusion Center Assessment

In December 2006, Maine governor John Baldacci signed an executive order to establish Maine’s fusion center: the Maine Information and Analysis Center (MIAC). The MIAC’s objective is safeguarding the state's population and infrastructure by facilitating effective information sharing among all levels of government and private sector partners. The MIAC enhances public safety by collecting, processing, analyzing, and appropriately sharing intelligence information with principal agencies, all tiers of government, and the private sector. Since its inception 19 years ago, the MIAC has supported terrorism investigations, aided in large-scale criminal investigations, and distributed valuable threat information on a need to know, right to know basis.

While carrying out its mission of safeguarding public safety, the MIAC must adhere to the protections afforded by the US and state government. As such, the MIAC operates ONLY for criminal justice purposes and observes all applicable personal liberty protections outlined by federal statutes, state statutes, and MIAC privacy policy guidelines. To demonstrate adherence to these guidelines, 25 M.S.R.A Chapter 201§ 1801 Act to Require Annual Information Reporting by the Maine Information and Analysis Center was passed in 2021. The legislation mandates that the MIAC produce an annual report for the joint standing committee on Criminal Justice and Public Safety. This annual report offers a summary of crimes, incidents, and reports the MIAC has reviewed and processed while safeguarding personal privacy between January 1, 2025, and December 31, 2025.

## 2025 Annual Information

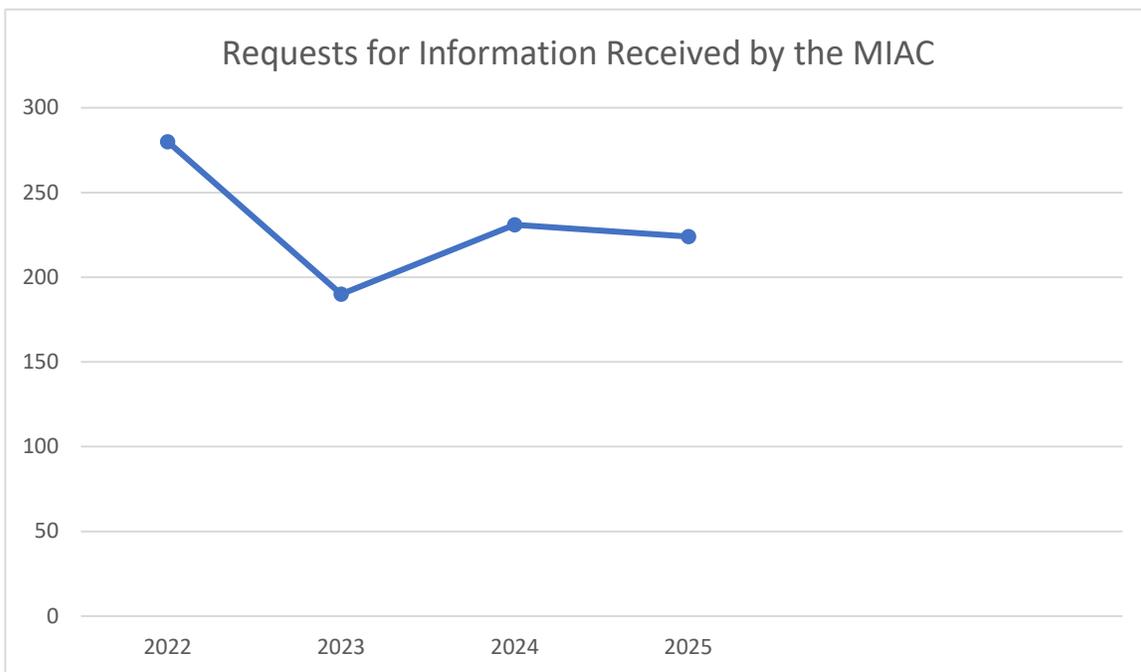

In 2025, the MIAC made 1,353 total entries into its information technology system (ITS) and assisted hundreds of federal, state, local, tribal, and private sector partners for criminal justice purposes, to include public safety and national security concerns. The following is an illustration of these entries and assists.

The MIAC received and disseminated information 504 times collectively in 2025. The MIAC can only disseminate information when there is both (1) a valid investigative request AND (2) the requesting party has a valid and legitimate need to know and right to know the information. Upon meeting both criteria, the MIAC will respond to the request by evaluating and processing information received to determine its origin, how the information was obtained, and the classification of the information. After ensuring the dissemination criteria are met, the information is then shared in a manner consistent with the MIAC's internal directives, internal procedures, and applicable provisions of the MIAC's Privacy Policy. The MIAC Privacy Policy is available for public review on the MIAC's website, <https://www.maine.gov/dps/msp/specialty-units/MIAC/About>.

A real-life example of information sharing by the MIAC in 2025 resulted from a report from the Maine Attorney General's Office regarding a threatening email they had received. The email read in part, "i am involved in a Russian GRU sabotage group inside USA. soon we will cause a plane to crash like the one that killed 67 people or

the recent UPS one.” The MIAC compared the threat to other incidents with similar language and found a trend of analogous threats reported in multiple states that were later deemed hoaxes. The MIAC disseminated their findings to the Attorney General’s Office, providing situational awareness.

In 2025, the MIAC received 224 requests for information from partners. A significant request for information came from a federal agency seeking assistance identifying a victim of child exploitation. The MIAC reviewed the request and noted the exploitation tactics closely resembled strategies commonly used by violent online networks<sup>1</sup> to target children. The MIAC alerted the federal agency with jurisdiction over violent extremism crimes, initiating a domestic terrorism<sup>2</sup> investigation. The investigation confirmed the victim had in fact been targeted by a violent online network, and officials were able to intervene. Another request originated from a federal agency seeking information in support of an ongoing sex trafficking investigation involving multiple suspects located in Maine. Examples of additional requests for information involved the following: terrorism, homicide theft, drug trafficking, phishing, compromised data, reported threats to critical infrastructure and more.

The MIAC received 224 requests for information via the Homeland Security Information Network (HSIN) in 2025, constituting a 26% increase from 178 requests in 2024. HSIN is the Department of Homeland Security's official system for nationwide intelligence notification between federal, state, local, territorial, tribal, international and private sector partners. HSIN allows agencies access to homeland security information and provides a secure platform to send requests, plan events, respond to incidents, and share information. In 2025, HSIN requests for information included missing persons, national security threats, harassment, firearm threats, homicide fugitives, fraud, foreign cyber threat actors, and multiple occurrences of swatting calls made to schools and critical infrastructure. A specific example of a HSIN request processed in 2025 was from an out of state agency inquiring whether the State of Maine had experienced incidents of the MIAC's email address being spoofed by threat actors which was an ongoing concern in multiple jurisdictions. The MIAC has seen this multiple times with entities in Maine but none of those targeted the MIAC.

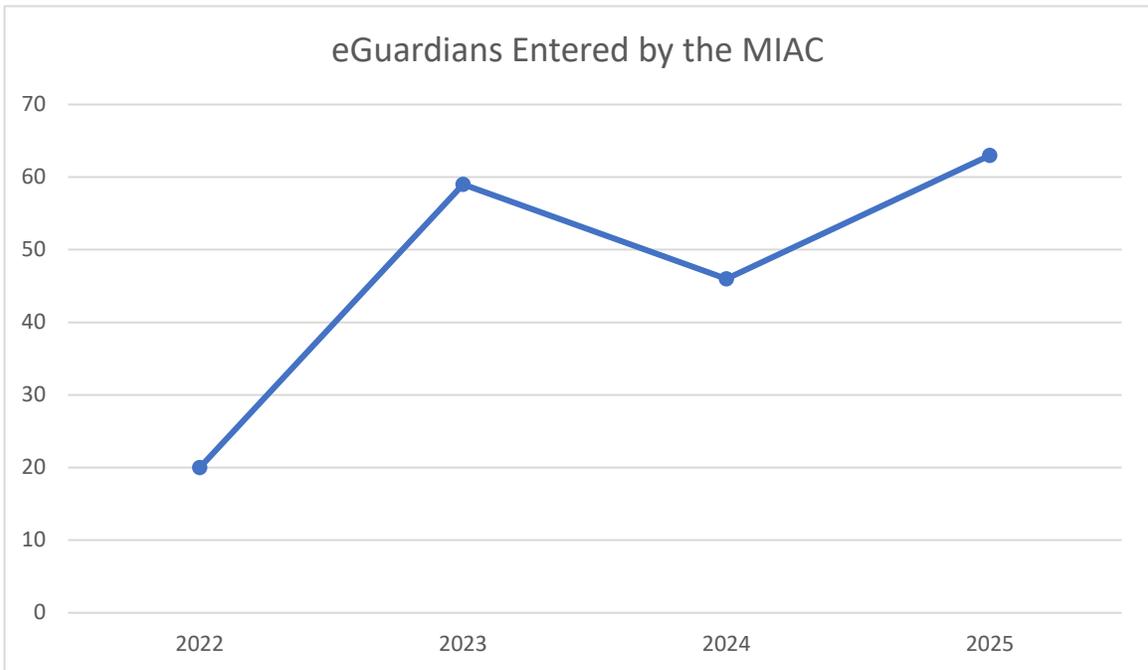

In 2025, the MIAC received 90 requests for Automated License Plate Reader (ALPR) information. All ALPR requests must be vetted to ensure they are valid, legitimate requests for the purpose of ongoing criminal investigations or missing or endangered persons cases. In 2025, examples of LPR requests sent to the MIAC regarded homicides, property theft, drug trafficking, fleeing fugitives, and death investigations. One such ALPR request involved an individual trafficking narcotics to Maine from another state. There were several instances where suspects in homicide investigations had fled from a jurisdiction and ALPR requests were made.

In 2025, the MIAC received 3 requests for facial recognition from law enforcement agencies in the State of Maine for a range of crimes including ATM jackpotting and missing persons. The MIAC does not use facial recognition software, and each of the requests was sent to out-of-state agencies. Any requests to search for facial recognition in Maine are forwarded to the Bureau of Motor Vehicles who maintains the system.

In 2025, the MIAC processed 20 notifications from the FBI's Terrorist Screening Center (TSC), a 100% increase from 10 notifications processed in 2024. The TSC is responsible for maintaining the US Government's consolidated terrorist

screening database and alerts law enforcement when encountering an individual reasonably believed to engage in terrorism or terroristic activity. The MIAC only processes TSC notifications where a subject is encountered in Maine or has a direct impact on Maine, providing law enforcement with the necessary information to combat terrorism and other national security threats.

The MIAC made 63 entries into the FBI’s eGuardian system in 2025, a system that allows federal, state, local, tribal, and territorial jurisdictions to share terrorism-related information. eGuardian acts as the repository for validated Suspicious Activity Reports (SARs) and is an unclassified system that only approved and vetted law enforcement and public safety officials can access. Threats to schools constituted most entries into eGuardian in 2025. eGuardian entries also covered a variety of other topics, including an individual impersonating law enforcement and making numerous violent threats to a Maine law enforcement agency, hoax swatting calls, and ATM jackpotting incidents.

Receiving and processing a variety of threat notifications, or “tips and leads,” regarding hazards to national security, criminal investigations, and other threats are an essential duty of a fusion center. The MIAC received 205 tips and leads in 2025 to include a report of identity theft resulting in fraudulent transactions totaling over \$230,000. Other tips and leads included a report of explosives planted

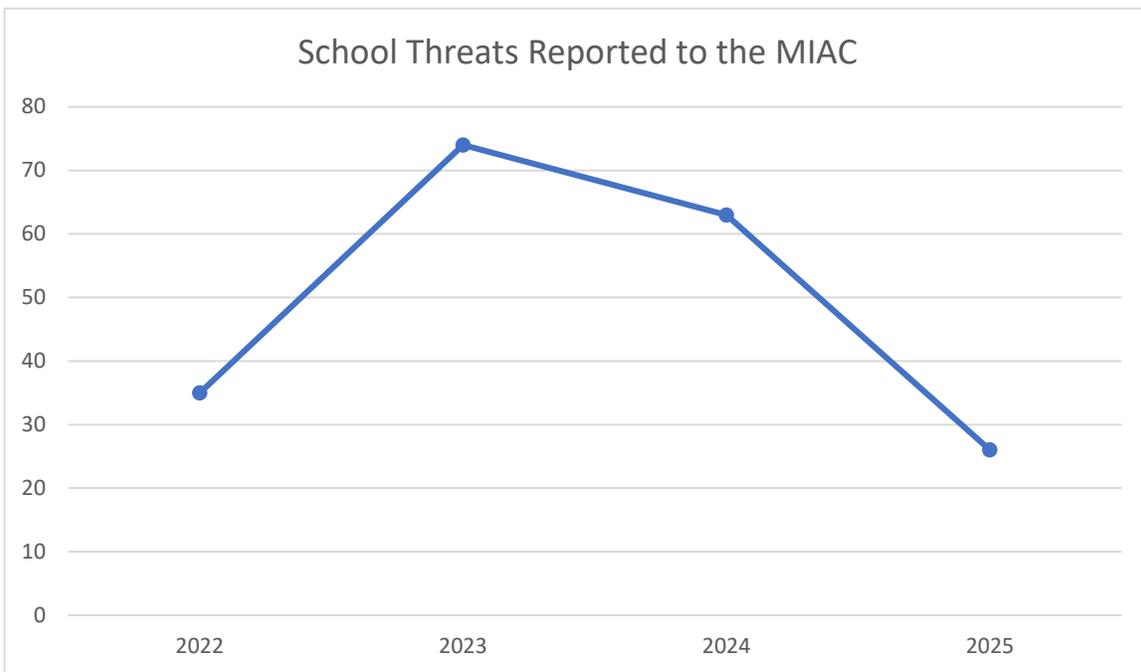

in an individual's car, an individual providing illicit drugs to students, animal abuse, child abuse, elder abuse, death threats, a child predator sending explicit messages to children, unsolved homicide tips, fugitive of justice, and more. Tips and leads are submitted by a variety of sources, including, but not limited to, the general public, private sector, law enforcement, and/or anonymous sources. As a result, the information submitted may be based on mere suspicion or on a level of suspicion that is less than "reasonable suspicion." First and foremost, the tip must be evaluated to determine whether the information received is consistent with the mission of the MIAC. If so, it is then processed, analyzed, and disseminated to the applicable agency if necessary. While tips and leads vary in terms of usefulness and accuracy, they can also act as a catalyst for analyzing correlating pieces of data, potentially leading to information that could assist in proactively preventing criminal or terroristic acts. The number of tips and leads received by the MIAC has increased 20% since 2024.

Another service frequently performed by the MIAC is bulletin dissemination. In 2025, the MIAC disseminated 502 bulletins consisting of 137 MIAC-created bulletins and 365 bulletins created by other agencies. All bulletins created and disseminated by the MIAC are reviewed and must adhere to the MIAC's privacy policy. As previously noted, information is only disseminated by the MIAC if there is a valid investigative request, and the requesting party has a valid and legitimate need to know and right to know the information. In 2025, MIAC bulletins covered a variety of topics, such as cybercrime, homicide, burglary, wanted persons, theft, school threats involving firearms and explosives, sexual assault, officer safety, homicides, missing persons, hoax threat calls, training announcements, swatting, and more.

Some MIAC-created bulletins are called "Situational Awareness Bulletins." In 2025, the MIAC created 84 Situational Awareness Bulletins to bring attention and awareness to activities affecting public safety in Maine and nationwide. Examples of Situational Awareness Bulletin topics included, but were not limited to:

- An internet trend encouraging students to vandalize school property.
- The increased presence of violent gangs in Maine communities.

- An increase in malicious cyber threats costing victims over \$31,000,000 in 2024.
- An individual calling a Maine law enforcement agency to report their intention of targeting various groups and committing mass violence.
- School threats, including hoax active shooter threats. In 2025 there were 26 school threats reported to the MIAC, representing a 59% decrease in threat reports since 2024. This is consistent with a nationwide downward trend. On multiple occasions, the MIAC has aided federal and local authorities in successful school threat investigations which resulted in arrest.

The MIAC also provides situational awareness information via individualized Threat Assessments. Upon request, a Threat Assessment can be prepared for the purpose of event safety planning to protect attendees, law enforcement, and other community members. The information gathered, which is primarily open source, is then disseminated to the requesting party to be utilized by event safety planners, federal, state, and local government authorities, and private sector partners to counteract threats, including terrorism. However, if the assessment does not identify any risk or threat based on specific articulable facts, it is not disseminated beyond those who are serving in a public safety role for the event. There were 9

threat assessments produced by the MIAC in 2025, one of which was a threat assessment generated to identify credible, specific threats or active attacks made by an individual making targeted violent threats to law enforcement.

The MIAC also authors an annual State of Maine Threat Assessment, offering a comprehensive overview of statewide and nationwide threat trends. The assessment identifies public safety patterns that inform and support state policymakers and decision-makers. Using data from various sources and prior years, the assessment also pinpoints potential threats and trends for the upcoming year.

It must be emphasized that all Threat Assessments are ONLY for criminal justice purposes and must observe all applicable personal liberty protections outlined by the federal government, state government, and MIAC Privacy Policy guidelines. The US Constitution's First Amendment guarantees fundamental rights, including freedom of speech, press, peaceful assembly, and the right to petition the government for redress of grievances. The political or social motivations of any group do not diminish the constitutional rights of the group or its law-abiding members to exercise their First Amendment liberties. The MIAC adheres to these liberties and rights and only reports on First Amendment-protected activities when there is a legitimate public safety reason to do so, such as providing situational awareness to protect the safety of the public, participants, observers, and law enforcement personnel.

## 2025 Privacy Audits

The MIAC conducted two Privacy Audits for records created in 2025. The 1<sup>st</sup> and 2<sup>nd</sup> Privacy Audits are attached.

Privacy/Civil Liberties/Civil Rights Audit Report

For the Period

01 January 2025 - 30 June 2025

## INTRODUCTION

This report accounts for the privacy/civil liberties/civil rights (P/CL/CR) audit conducted by the Maine Information & Analysis Center (MIAC) audit team (Team) for the period of 01 January 2025 through 30 June 2025.

The members of the Team were MIAC Board Chair, Jason Moen; MIAC Board Member, Megan Arsenault; MIAC Director, LT Mathew Casavant; MIAC Deputy Director/MIAC Compliance Officer, SGT Breanne Petrini; and Assistant Attorney General/MIAC Privacy Officer, Kent Avery. The audit is conducted pursuant to the MIAC Privacy Policy, specifically Part X(3)(B).

## GENERAL AUDIT PROCESS

To conduct the audit, the Team followed the “MIAC Privacy Audit Policy.”

As a general note, certain presumptions generally guided the Team in its work. Those presumptions included, for example:

- That, generally, records that are the subject of such audits are commonly understood to be restricted for law enforcement (LE) use only.
- That, generally, records that are the subject of such audits are typically confidential/nonpublic by law, and that their dissemination is therefore restricted by law.
- That, generally, conclusions stated or asserted in records prepared by a LE agency (LEA) are presumed to be factually based.
- That, currently, no records subject to such audits that are maintained in MIAC information technology systems (ITS)-are required by law to be purged.
- That certain databases in which records are maintained or through which records are disseminated (for example, eGuardian) are accessible only by authorized LEAs and LE officers (LEOs).
- That the MIAC Compliance Officer reviews and approves each entry in the MIAC ITS on a weekly - if not daily - basis, that information is reviewed and approved prior to its entry into the eGuardian system, and that all bulletins are peer-reviewed before their dissemination.
- That “personally identifying information” was to be construed broadly for the purposes of question 6 on the Record Evaluation Form, and not to be construed to mean “personal information” (as defined in 10 M.R.S. c. 210-B), which is more narrowly defined.

## POINTS OF DISCUSSION FOR FURTHER REVIEW WITH THE ADVISORY BOARD

Points of discussion during the audit that will be further discussed by the Board included:

1. There was a discussion during the audit process centered around MIAC opinions as it related to the audit evaluation form question 5. There was discussion as to whether the MIAC assessing there were no identified threats to an event when a threat assessment was disseminated to event planners was an opinion and would need to be identified as such for audit purposes. The MIAC reviews available public information and consults with event planners regarding a variety of events in the State of Maine and provides a threat assessment for these events. Throughout these discussions any identified or perceived threat is shared with planners for situation awareness and planning to ensure the safety of these events.
2. Discussions on whether a law enforcement report that utilizes the terminology “he” and “she” should be considered as including a “demographic descriptor” in the record for the purposes of question 11 on the Record Evaluation Form.
3. Concerning question 11 on the Record Evaluation Form, should only the language authored by the MIAC be considered when evaluating the record for demographic, broad, or vague descriptors, or should it be evaluated based on all information, including language and information that was reported to but not authored by the MIAC.
4. Whether a change is necessary to achieve the intent of question 11 on the Record Evaluation Form given a significant number of records include he/she.
5. The final discussion point surrounded the MIAC responding to event planners on pre-planned events in e-mails outside of a more formalized event threat assessment. Within the MIAC ITS system the response sent to event planners includes known or identified threats or safety considerations. If the information is sent via e-mail only the entire MIAC signature is not being added to the MIAC ITS system, only the actual response is shared. Without including the entirety of the MIAC signature should the standard MIAC e-mail signature be copied into the ITS system which includes First Amendment language.

## CONCLUSION

- The audit found no evidence of nonconformance by the MIAC with the Center's Privacy Policy, revised 04 October 2021.
- As in previous audits, the inclusion of three MIAC Advisory Board Members in the P/CR/CL Audit was found to be constructive and beneficial to this process. They provided valuable feedback and engaged in meaningful discussion on a variety of matters relating to P/CR/CL.

Privacy/Civil Liberties/Civil Rights Audit Report

For the Period

01 July – 31 December 2025

## INTRODUCTION

This report accounts for the privacy/civil liberties/civil rights (P/CL/CR) audit conducted by the Maine Information & Analysis Center (MIAC) audit team (Team) for the period of 01 July 2025 through 31 December 2026.

The members of the Team were MIAC Board Member, Megan Arsenault; MIAC Board Member Tyler Stevenson; MIAC Director, LT Mathew Casavant; MIAC Deputy Director/MIAC Compliance Officer, SGT Breanne Petrini; and Assistant Attorney General/MIAC Privacy Officer, Kent Avery. The audit is conducted pursuant to the MIAC Privacy Policy, specifically Part X(3)(B).

## GENERAL AUDIT PROCESS

To conduct the audit, the Team followed the “MIAC Privacy Audit Policy.”

As a general note, certain presumptions generally guided the Team in its work. Those presumptions included, for example:

- That, generally, records that are the subject of such audits are commonly understood to be restricted for law enforcement (LE) use only.
- That, generally, records that are the subject of such audits are typically confidential/nonpublic by law, and that their dissemination is therefore restricted by law.
- That, generally, conclusions stated or asserted in records prepared by a LE agency (LEA) are presumed to be factually based.
- That, currently, no records subject to such audits that are maintained in MIAC information technology systems (ITS)-are required by law to be purged.
- That certain databases in which records are maintained or through which records are disseminated (for example, eGuardian) are accessible only by authorized LEAs and LE officers (LEOs).
- That the MIAC Compliance Officer reviews and approves each entry in the MIAC ITS on a weekly - if not daily - basis, that information is reviewed and approved prior to its entry into the eGuardian system, and that all bulletins are peer-reviewed before their dissemination.
- That “personally identifying information” was to be construed broadly for the purposes of question 6 on the Record Evaluation Form, and not to be construed to mean “personal information” (as defined in 10 M.R.S. c. 210-B), which is more narrowly defined.

## POINTS OF DISCUSSION FOR FURTHER REVIEW WITH THE ADVISORY BOARD

Points of discussion during the audit that will be further discussed by the Board included:

1. There was a discussion during the audit process centered around MIAC opinions as it related to the audit evaluation form question 5. There was discussion as to whether the MIAC assessing there were no identified threats to an event when a threat assessment was disseminated to event planners was an opinion and would need to be identified as such for audit purposes. The MIAC reviews available public information and consults with event planners regarding a variety of events in the State of Maine and provides a threat assessment for these events. Throughout these discussions any identified or perceived threat is shared with planners for situation awareness and planning to ensure the safety of these events.
2. Discussions on whether a law enforcement report that utilizes the terminology “he” and “she” should be considered as including a “demographic descriptor” in the record for the purposes of question 11 on the Record Evaluation Form.
3. Concerning question 11 on the Record Evaluation Form, should only the language authored by the MIAC be considered when evaluating the record for demographic, broad, or vague descriptors, or should it be evaluated based on all information, including language and information that was reported to but not authored by the MIAC.
4. Whether a change is necessary to achieve the intent of question 11 on the Record Evaluation Form given a significant number of records include he/she.
5. The final discussion point surrounded the MIAC responding to event planners on pre-planned events in e-mails outside of a more formalized event threat assessment. Within the MIAC ITS system the response sent to event planners includes known or identified threats or safety considerations. If the information is sent via e-mail only the entire MIAC signature is not being added to the MIAC ITS system, only the actual response is shared. Without including the entirety of the MIAC signature should the standard MIAC e-mail signature be copied into the ITS system which includes First Amendment language.

## CONCLUSION

- The audit found no evidence of nonconformance by the MIAC with the Center's Privacy Policy, revised 04 October 2021.
- As in previous audits, the inclusion of three MIAC Advisory Board Members in the P/CR/CL Audit was found to be constructive and beneficial to this process. They provided valuable feedback and engaged in meaningful discussion on a variety of matters relating to P/CR/CL.

To whom it may concern :

I am pleased to provide this letter in support of the 2025 Maine Information and Analysis Center (MIAC) audit process.

The audit was conducted in a manner that was thorough, fair, and thoughtfully structured to ensure a comprehensive review of MIAC's activities, records, suspicious activity reports, and published bulletins. The combination of randomly selected communications, all suspicious activity reports, and records specifically chosen by audit team members ensured that the review was both representative and meaningful.

The discussions throughout the audit process were candid, professional, and focused on important and often complex issues — particularly the careful balance between constitutionally protected speech, individual privacy rights, and the ongoing need to safeguard public safety. The diverse professional backgrounds of the audit team added depth and perspective to the review, strengthening the integrity of the process.

The audit team found the process to be efficient and well-organized. Records reviewed raised no concerns regarding violations of privacy rights or First Amendment protections. Where discussion was warranted, it reflected the diligence of the team rather than deficiencies in the material reviewed. Additionally, the audit process identified areas for continued advisory discussion, demonstrating a commitment to continuous improvement and transparency.

Overall, the 2025 MIAC audit process reflects a strong culture of accountability, professionalism, and respect for civil liberties while maintaining a clear focus on public safety.

Sincerely,

Jason D. Moen  
Chief of Police

Dear Lieutenant Casavant:

Thank you for the opportunity to serve on the MIAC Audit Review Panel. I have worked in some capacity with the MIAC for several years in my full-time role at York County Emergency Management Agency, but having somewhat recently joined the MIAC Advisory Board, this opportunity to serve has been an extremely valuable part of my introduction to the mission and operations of the agency.

Overall, I found the audit process to be well planned and executed. Each member of the panel was given notice to select records to be reviewed during our review meeting. These selections along with the random record selections and a complete review of eGuardians records allowed for a fair representation of the MIAC records.

During the panel review process, there was open dialogue and thorough discussion of each record. The panel members carefully reviewed each record using a defined set of evaluation questions to ensure we were reviewing the records in accordance with the MIAC policy and guidelines.

The only recommendation I have for the process is one that has been discussed by the review panel and under your leadership: a review of the questions included on the evaluation form we use. We found that we needed to have additional discussion around the questions of personally identifiable information, the definition of "opinion" of analysts, and details around demographics. We were aware of this during the process and it did not impact our review, but addressing it will only improve future reviews.

I have no other concerns or feedback about the process and believe it to be thorough, efficient, and objective.

Please feel free to contact me if you have any questions or need further information.

Sincerely,

*Megan Arsenault*

Dear Lieutenant Casavant:

Pursuant to MIAC Audit Policy, I am providing my thoughts on the 2025 audit process. I found the MIAC audit process to be thorough, fair and balanced in its evaluation of the MIAC's activities, records, and published bulletins. In addition to randomly selected records and suspicious activity reports, each audit team member chose several records to be examined and evaluated. The Privacy Officer (myself) also chose several records. Including both random selections as well as all suspicious activity reports, and finally items chosen by the MIAC Privacy Officer, allowed for a review that is representative of the entire body of MIAC documents. I have noticed a trend over the past few audits that there has been an increase in protests and bulletins regarding protests in the recent past.

The discussion was civil, cordial and candid and focused on difficult issues dealing with the balance between constitutionally protected speech and the need for civil discourse and public safety. The discussion also raised a couple of issues that will be reviewed by the Advisory Board in the near future. Finally, the fact that the audit team consists of individuals with varying backgrounds and experiences adds value and breadth to the team.

The records we reviewed raised no concerns for the audit team other than what was discussed during deliberations. None of those which initially generated discussion were found to be violative of privacy rights or first amendment speech protections.

Overall, the audit process was efficient but thorough, giving proper attention to individual privacy rights and constitutional protections as well as public safety.

Dear Lieutenant Casavant:

Pursuant to the MIAC Audit Policy, I am providing my observations regarding the 2025 audit process held on February 9, 2026. As with previous MIAC audits, I found this audit to be consistent with established policy, as well as thorough and balanced.

During the audit, there was meaningful conversation and discussion regarding the audit selections and any issues identified. MIAC continues to uphold its mission and maintain the protection of individuals' privacy, civil rights, and civil liberties in the highest regard.

At the conclusion of the audit, no issues or concerns were identified regarding the products generated or disseminated by MIAC. This audit process confirms that MIAC continues to adhere to the laws and policies that govern its operations.
