# HOW TO FOLD A DRUGGIST FOLD

## FYI

- Ideal for collecting trace evidence such as: hairs, fibers, paint scrapings, etc.
- Do NOT place hairs or fibers directly into an envelope. Always use a druggist fold.
- Do not tape seal the druggist fold.
- [CLICK HERE](#) to watch a video tutorial

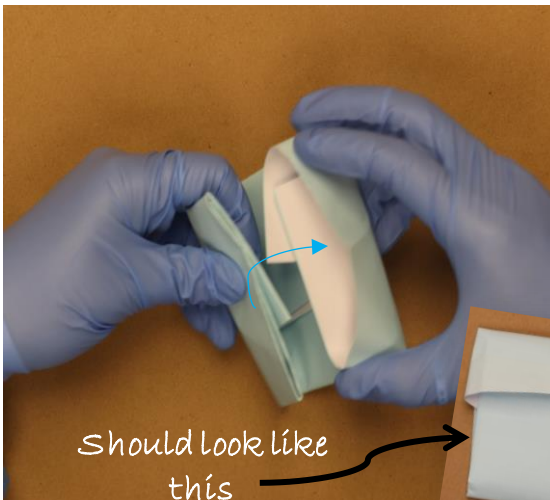

- Start with a clean sheet of paper.
- Fold the bottom third of the paper up.
- Fold right side of the paper over as if folding in thirds.

# 1

- Place trace evidence into the pocket created by the folds.
- When collection is complete, fold left side of paper over the right side.
- Starting from bottom, fold bottom of paper up until it's about 1 – 2" from top.

# 2

- Fold top of paper down over the rest and crease.
- Tuck the bottom piece into the top lip of the fold.
- Package inside an envelope and seal the envelope with tape.

# 3

Should look like this
