# **Trace and Fire Debris Evidence Collection**

### TRACE

### **Hairs and Fibers**

- Hairs and fibers should be collected using tweezers
- Do NOT place a hair or fiber into an envelope by itself:
  - Collect hairs and fibers using a gel lift, sticky side of a sticky note, or a druggist fold
    - For information about how to fold a druggist fold, please see <u>How to Fold a Druggist Fold</u>
- When submitting unknown fibers, please also submit largest available sample of known reference fibers if possible (ex. entire shirt, large cutting of carpet or car mats, etc.)

### **Paints**

#### Questioned Paint

- For paint deposited on an object, submit <u>whole</u> object to lab if possible (preferred)
  - <u>OR</u> cut out portion of object containing paint deposit and submit to lab
    - <u>OR</u> scrape and collect as much of the paint deposit as possible (aim for large pieces) and package in druggist fold

#### Known Paint Reference

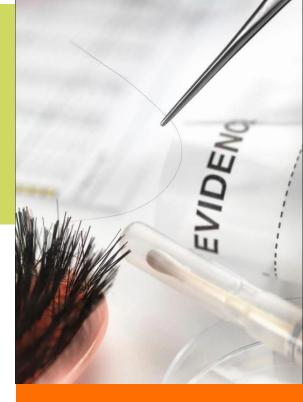

- Collect quarter-size sample of any reference paint, making sure to include <u>ALL</u> layers of paint.

Known samples should be collected as close to area of impact as possible

**For more information about trace evidence:** Download the <u>'Trace Evidence Collection'</u> mobile app published by the FTCoE and FBI.

Available for iPhone and Android devices!

## **Fire Debris**

ALL Fire Debris cases should be handled by the Fire Marshal's Office.

For assistance with fire debris cases, contact the Fire Marshal's Office via dispatch and provide a phone number where you can be reached at the scene.

#### **Evidence Collection:**

- Fire Debris should be packaged in *unused* paint cans or mason jars <u>ONLY</u>
- Fill no more than twothirds of the container – do <u>not</u> overfill
- Do<u>NOT</u> air dry the material, package wet as instructed above
