

Advanced Cardiac Life Support Provider Course

The American Heart Association Advanced Cardiovascular Life Support course is designed for healthcare providers who either direct or participate in the resuscitation of a patient, whether in or out of hospital. Our program has been specially formatted by experienced EMS providers to focus on the particular needs of the advanced cardiac care responder. Although open to any healthcare provider, this class will spend more time and effort on better preparing providers to provide out-of-hospital cardiovascular life support interventions.

This course will emphasize the importance of basic life support CPR to patient survival; the integration of effective basic life support with advanced; and the importance of effective team interaction and communication during resuscitation.

Provider Course Cost: \$220.00 (Cost Includes Materials)
