

Advanced Cardiac Life Support Recertification Courses

The American Heart Association Advanced Cardiovascular Life Support course is designed for healthcare providers who either direct or participate in the resuscitation of a patient, whether in or out of hospital. Our program has been specially formatted by experienced EMS providers to focus on the particular needs of the advanced cardiac care responder. Although open to any healthcare provider, this class will spend more time and effort on better preparing providers to provide out-of-hospital cardiovascular life support interventions.

This course will emphasize the importance of basic life support CPR to patient survival; the integration of effective basic life support with advanced; and the importance of effective team interaction and communication during resuscitation. Additionally, providers will review cardiac rhythm recognition and the objectives of Maine EMS advanced airway algorithm training.

Refresher Course Cost: \$180.00 (Cost Includes Materials)

June 21, 2019- Down East Community Hospital, Machias
