Documenting Methods of Pediatric Transport (April 7, 2020)

Maine EMS has added several new options in MEFIRS for documenting how a pediatric patient was transported during an EMS call. The choices now include:

- Agency Car Seat
- Quantum ACR (Ambulance Child Restraint)
- Pedi-Mate Child Restraint
- LSP Infant/Pediatric Board / Pedi Board
- Patient’s Car Seat
- Integrated Captain’s Chair Seat
- Isolette/Baby Pod

To document this in MEFIRS:

1. Click here, then Scroll here

2. Clicking here shows the choices directly below

3. Clicking here shows the choices on the left

Thanks, and please let us know any questions or concerns.

Marc Minkler, Maine EMS-C Program Manager
