**Documenting Methods of Pediatric Transport (April 7, 2020)**

Maine EMS has added several new options in MEFIRS for documenting how a pediatric patient was transported during an EMS call. The choices now include:

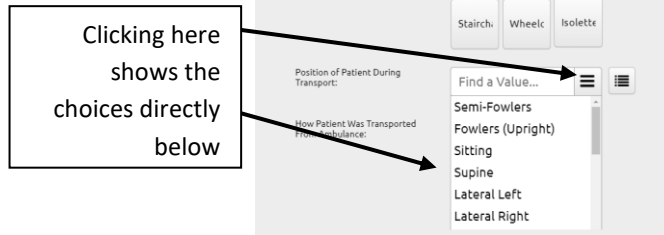

- Agency Car Seat
- Quantum ACR (Ambulance Child Restraint)
- Pedi-Mate Child Restraint
- LSP Infant/Pediatric Board / Pedi Board
- Patient's Car Seat
- Integrated Captain's Chair Seat
- Isolette/Baby Pod

**To document this in MEFIRS:**

**1**

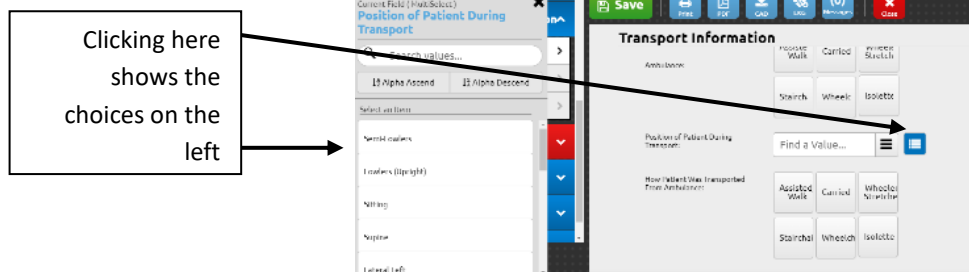

**2**

**OR**

**3**

Thanks, and please let us know any questions or concerns.

Marc Minkler, Maine EMS-C Program Manager
