

**Psychomotor Skill Sheet**

**Inhaled – Small Volume Nebulizer (SVN)  
Medication Administration  
Basic Life Support**

Learner Name/License #		Date	
Evaluator Name/License #			

**Scoring**

“**Complete**” the learner completed the skill without prompting. “**Prompt**” the learner required a prompting to complete the skill. “**Missed**” the learner did not complete the skill. “**N/A**” the skill was not performed and did not require performance.

Time Started:	
---------------	--

Task	N/A	Missed	Prompt	Complete
<b>Selects, Checks, and Assembles Equipment</b>				
<b>Delivery</b>				
1. Small volume nebulizer (SVN)				
2. Medication (simulated bullet)				
3. Oxygen flowmeter/regulator				
4. Oxygen tank				
5. Oxygen wrench				
<b>Personal Protective Equipment (PPE)</b>				
1. Gloves, eye protection, surgical mask/N95 mask				
<b>Preparation &amp; Safety</b>				
1. Has assessed lung sounds and patient to ensure treatment with nebulized medication is indicated.				
2. Ensures medication rights				
3. Performs medication cross check				
<b>Medication Administration</b>				
1. Dons appropriate PPE – gloves, mask, eye protection. <i>(This is an aerosol generating procedure. COVID-19 precautions should be observed)</i>				
2. Ensures that patient has adequate respirations and airway to use the SVN				
a. Patient can follow instructions				
b. Has a patent airway that they can maintain without assistance				
c. Has adequate tidal volume for alveolar gas exchange to occur				
3. Ensures that oxygen tank is assembled and operational				
4. Attaches oxygen tubing <i>(with oxygen off)</i> to flowmeter and SVN cup				
5. Places medication in SVN cup				
6. Ensures that medication cup is sealed and attached to delivery system				
7. Turns on oxygen to 8-10 LPM and ensures that medication is “misting”				
8. Instructs the patient to sit up straight <i>(if possible)</i> , place the delivery system in <i>(or over)</i> mouth, and continue inhaling and exhaling as the medication is delivered				

## Psychomotor Portfolio Skill Sheet

Task	N/A	Missed	Prompt	Complete
<b>Assessment of Medication Administration</b>				
1. Demonstrates and discusses techniques for assessing that the nebulizer is working properly.				
2. Verbalizes need to observe patient for desired effect and adverse side effects				
3. <i>Must clearly state/explain what effects are anticipated related to the medication administered.</i>				
4. Demonstrates techniques for assessing positive or negative efficacy of treatment:				
a. <i>Changes in tidal volume</i>				
b. <i>Changes in respiratory effort</i>				
c. <i>Changes in skin color</i>				
d. <i>Changes in anxiety level</i>				
e. <i>Changes in anxiety level</i>				
f. <i>Changes in vital signs, including pulse oximetry</i>				

**Actual Time Ended:**

Critical Failures	
	Received three (3) or more misses/prompts
	Failed to utilize the correct personal protective equipment (PPE)
	Failed to address patient and/or crew safety and security throughout the scenario or skill assessment
	Performs assessment or skill inappropriately resulting in the potential injury or harm to the patient, self, team, or a bystander
	Failed to immediately address primary survey concerns of airway, breathing, circulation, and/or disability within the scenario or skill assessment
	Affect was inappropriate for an entry level EMS Clinician

**Evaluator Notes:**

Did the Learner Successfully Complete the Skill?		Evaluator Signature
<input type="checkbox"/> Yes	<input type="checkbox"/> No
