

1 16 DEPARTMENT OF PUBLIC SAFETY

2 163 BUREAU OF EMERGENCY MEDICAL SERVICES (MAINE EMS)

3 CHAPTER 25: IMPLEMENTING THE MAINE EMS STABILIZATION PROGRAM

4 §1. Purpose. The purpose of this rule is to implement procedures for allocating stabilization funds
5 totaling \$12,000,000 to emergency medical services entities from the Emergency Medical Services
6 Stabilization and Sustainability Program created by 32 M.R.S. § 98 and referred to herein as “the
7 Program.” These funds are intended to provide financial assistance to emergency medical services
8 entities at immediate risk of failing and leaving their communities without access to adequate
9 emergency medical services.

10

11 §2. Definitions

12

13 1. “Eligible emergency medical services entity” or “eligible EMS entity” means an actively licensed
14 ground ambulance service or non-transporting ground emergency medical service.

15

16 2. “Qualified applicant” means an eligible EMS entity that has applied for and qualified to receive
17 stabilization funding from the Program.

18

19 §3. Applications

20

21 1. Eligible Entities. Only eligible EMS entities may apply for stabilization funding from the
22 Program. All eligible EMS entities that apply for funding and meet all the following criteria shall
23 receive funding from the Program:

24

25 A. Risk of Imminent Failure. An applicant must demonstrate an immediate risk of failing either
26 by an inability to finance daily operations or due to recruitment and retention issues. All
27 applicants for funding must complete the assessment for their ability to finance daily
28 operations as part of the application even if they do not seek eligibility under that pathway.

29

30 I. Assessment of an Applicant’s Ability to Finance Daily Operations. If an applicant’s
31 Operating Margin is less than or equal to 10% of its Total Revenue it will be considered
32 to be at immediate risk of failing due to an inability to finance daily operations. Each
33 applicant shall provide the following information to determine if its Operating Margin is
34 at or below 10% of its Total Revenue.

35

36 a. “Total Expenses” equals the sum of the following expenses.

37

38 i. Labor costs.

39

40 1. If the eligible EMS entity is staffed with volunteers or a combination of
41 volunteer staff persons, labor costs should be estimated based on a rate of
42 \$28.89 for volunteer hours. That amount should also be included as revenue
43 as an in-kind donation of volunteer labor.

44

45 2. If the service's average compensation, including benefits, for an actively
46 licensed EMS person, is below \$28.89, regardless of licensure level, the
47 actual labor costs should be calculated and disclosed; however, the agency
48 may use the rate of \$28.89 for the determination of eligibility calculation.
49

50 ii. Non-labor/equipment costs. This includes supplies and materials (e.g., equipment
51 costs, consumables/disposable equipment, and other associated costs).
52

53 iii. Purchased services costs. This includes service-level medical director contracting,
54 quality assurance and improvement, training support, etc.
55

56 b. "Total Revenue" equals the sum of the following revenues.
57

58 i. Transport revenue, if applicable.
59

60 ii. Local subsidy or subsidies. This includes any funds generated from tax revenues
61 received by the EMS entity.
62

63 iii. Hospital subsidy or subsidies. This includes any funds hospitals or other entities
64 provide for services rendered for that facility or health system outside of
65 transporting revenue. For example, if a hospital reimburses an EMS entity for an
66 interfacility transport and provides a \$100,000 contractual fee, only the \$100,000
67 would be represented here.
68

69 iv. Subscription services, if applicable.
70

71 v. Grant funding, if applicable.
72

73 vi. Donations. This includes in-kind donations of labor from volunteers. Volunteer
74 hours should be calculated using the rate of \$28.89 per hour, irrespective of the
75 EMS person's licensure level.
76

77 vii. Any additional revenue.
78

79 c. Calculations
80

81 i. For purposes of this rule, Operating Margin is calculated by subtracting Donations
82 and Total Expenses from Total Revenue.
83

84 d. Determination
85

86 i. If an applicant's Operating Margin is less than or equal to 10% of its Total
87 Revenue, the applicant will have demonstrated an immediate risk of failing due
88 to an inability to finance daily operations and thereby qualify to receive funding.

89

90 ii. If an applicant's Operating Margin is greater than 10% of its Total Revenue, the
91 applicant is not eligible for funding based on an inability to finance daily
92 operations. The applicant may still receive funding based on Employee
93 Recruitment and Retention (see II).
94

95 II. Employee Recruitment and Retention. If an applicant is not eligible for funding based on
96 its current financial situation, it still may seek funding based on potential workforce
97 recruitment and retention concerns. Such applicants shall provide employee data on a
98 form and in a manner prescribed by the Director.
99

100 a. Applicants utilizing a volunteer or augmented voluntary staffing model (i.e., stipend,
101 per call pay, etc.).
102

103 i. An applicant with a monthly average of fewer than fourteen (14) actively licensed
104 emergency medical services persons providing clinical care as documented
105 within the Maine EMS and Fire Incident Reporting System (MEFIRS) over the
106 past three years for each response unit (Maine EMS-licensed emergency response
107 vehicle) that is available for at least 60 hours per week shall be considered at
108 immediate risk of failing due to employee recruitment or retention issues and
109 thereby qualify to receive funding.
110

111 b. Applicants utilizing a paid staffing model.
112

113 i. An applicant with a monthly average of fewer than seven (7) actively licensed
114 emergency medical services persons providing clinical care as documented
115 within the Maine EMS and Fire Incident Reporting System (MEFIRS) over the
116 past three years for each response unit (Maine EMS-licensed emergency response
117 vehicle) that is available for at least 60 hours per week shall be considered at
118 immediate risk of failing due to employee recruitment or retention issues and
119 thereby qualify to receive funding.
120

121 B. An applicant must submit financial statements covering the most recent complete fiscal year
122 and the current fiscal year to date as part of its application.
123

124 I. These statements must include a balance sheet and income statement from the most recent
125 complete fiscal year and the current fiscal year to date, which may be used to verify
126 financial information provided in the application to demonstrate financial hardship.
127

128 C. An applicant must demonstrate that it provided 9-1-1 emergency medical services to its
129 community during the previous calendar year, including as follows;
130

131 I. If an applicant underwent a merger in 2022 or 2023, it must also provide proof of
132 consolidation of operations. For such an applicant, the combined volumes of the merged
133 entities will be used for calculations.
134

135 D. An applicant must currently provide and intend to continue to provide emergency medical
136 services coverage to the community it serves.

137
138 E. If the applicant is a transporting ambulance service, it must participate in the MaineCare
139 Program and maintain an electronic funds account with the Maine Department of Health and
140 Human Services.

141
142 **2. Announcement of Funding Opportunity**

143
144 A. The Director shall announce via electronic communication pathways, at a time to be
145 determined by the Director, that the application is available for completion, including
146 instructions on how it can be accessed. The application shall be made available for at least 30
147 days and can be extended at the discretion of the Director.

148
149 **3. Application Form**

150
151 A. The Director shall develop an application to ensure compliance with this rule.

152
153 B. All applications for funding must comply with this rule, all instructions provided in the
154 Announcement of Funding Opportunity, and any instructions and formatting requirements
155 within the application.

156
157 C. All applicants shall submit the following additional documents to the Director based on
158 instructions provided within the Announcement of Funding Opportunity and Application
159 Form.

160
161 I. Current fiscal (year to date) income statement

162
163 II. Current fiscal (year to date) balance sheet

164
165 III. Most recently completed fiscal year income statement

166
167 IV. Most recently completed fiscal year balance sheet

168
169 **§4. EMS Entity Funding Allocation**

170
171 **1. Maximum and Minimum Allocations**

172
173 A. Transporting EMS Entities

174
175 I. Minimum allocation shall be no less than \$15,000 per qualified applicant that functions as a
176 transporting ambulance service.

177
178 II. Maximum allocation shall not exceed \$200,000 per qualified applicant that functions as a
179 transporting ambulance service.

180
181 B. Non-Transporting EMS Entities

- I. Minimum allocation shall be no less than \$5,000 per qualified applicant that functions as a non-transporting service.
- II. Maximum allocation shall not exceed \$50,000 per qualified applicant that functions as a non-transporting service.

2. **Allocation Algorithm.** The Director shall use the following algorithm to determine the allocation for each qualified applicant:

A. Components

I. Rurality Score by Zip Code.

a. The Director shall use the Frontier and Remote Area Codes published by the United States Department of Agriculture’s Economic Research Service (updated April 15, 2015), which this rule incorporates by reference. However, in situations where there is no score for a specific zip code, or the data is older than ten (10) years at the time of calculating the algorithm, the Director shall formulate the rurality score using the “Rural Indicators” in the Ambulance Fee Schedule and ZIP Code Files published by the US Centers for Medicare and Medicaid Services (published December 2023), which is incorporated into this rule by reference.

i. United States Department of Agriculture’s Frontier and Remote Area Codes: “EXCEL file containing ZIP-code-level FAR codes and related data”, last updated on April 15, 2015, which is available for download from <https://www.ers.usda.gov/webdocs/DataFiles/51020/FARcodesZIPdata2010WithAKandHI.xlsx?v=6390.1>

ii. Centers for Medicare and Medicaid Services’ Ambulance Fee Schedule and ZIP Code Files: “2023 End of Year Zip Code File (ZIP)”, published in December 2023, which is available for download from <https://www.cms.gov/files/zip/2023-end-year-zip-code-file.zip>

b. If using the Frontier and Remote Area Codes, the Director shall assign the following scores based on the Frontier and Remote (FAR) classification for each zip code:

- i. No FAR Classification: Score of One (1)
- ii. FAR Classification of One (1): Score of Two (2)
- iii. FAR Classification of Two (2): Score of Three (3)
- iv. FAR Classification of Three (3): Score of Four (4)
- v. FAR Classification of Four (4): Score of Five (5)

229 c. If using the Ambulance Fee Schedule and ZIP Code Files, the Director shall assign the
230 following scores based on the Rural Indicator field for each zip code:

231
232 i. Blank/Urban: Score of One (1)

233
234 ii. R (Rural): Score of Three (3)

235
236 iii. B (Super Rural): Score of Five (5)

237
238 II. Call Volume

239
240 a. The Director shall query de-identified electronic patient care reporting information
241 from the Maine EMS and Fire Incident Reporting System (MEFIRS) to determine the
242 number of 9-1-1 activations, including scene responses, mutual aid requests, and
243 ambulance intercepts that each eligible EMS entity experienced for each zip code.

244
245 B. Calculations

246
247 I. The Director shall perform the calculations below to determine the distribution percentage
248 or “DP” for each eligible EMS entity. These calculations shall be performed separately
249 for transporting and nontransporting eligible EMS entities.

250
251 II. A rurality-weighted call volume or “RWCV” will be calculated for each eligible EMS
252 entity by multiplying the number of activations the entity experienced for each zip code
253 by each zip code’s rurality score and then totaling the resulting products.

254
255 III. The total rurality-weighted call volume or “TRWCV” for each category (transporting and
256 nontransporting) will be the sum of the RWCVs of all the eligible EMS entities in the
257 respective category.

258
259 IV. An eligible EMS entity’s distribution percentage or “DP” will equal the eligible EMS
260 entity’s RWCV divided by the TRWCV of the eligible entity’s respective category
261 (transporting or nontransporting).

262
263 C. Allocation Process

264
265 I. The Director shall identify all transporting and non-transporting eligible EMS entities
266 based on the information available to the Bureau of Emergency Medical Services and
267 determine the final maximum allocation or “FMA” for each of these entities. The
268 Director shall provide a list of these entities and their corresponding FMAs in the
269 Announcement of Funding Opportunity.

270
271 a. Nontransporting Eligible EMS Entities.

272
273 i. Initial maximum allocations or “IMAs” for all nontransporting eligible EMS
274 entities will be calculated by multiplying the entity’s distribution percentage by
275 the total amount of stabilization funds available for nontransporting entities.

- ii. If an entity's IMA is less than or equal to \$5,000, the entity's FMA will be \$5,000.
- iii. If an entity's IMA is greater than or equal to \$50,000, the entity's FMA will be \$50,000.
- iv. If an entity's IMA is greater than \$5,000 but less than \$50,000, its IMA will be recalculated by multiplying the entity's distribution percentage by the total amount of stabilization funds available for nontransporting entities minus the amounts applied as FMAs to entities pursuant to subsections ii and iii above.
- v. If the recalculation of IMAs in subsection iv above generates IMAs that are either less than or equal to \$5,000 or greater than or equal to \$50,000, FMAs will be assigned to those applicable entities in accordance with subsections ii and iii above.
- vi. IMAs greater than \$5,000 but less than \$50,000 will continue to be recalculated in accordance with subsections iv and v above until no IMAs are less than or equal to \$5,000 or greater than or equal to \$50,000. At that point, the entity's last recalculated IMA will become its FMA.

b. Transporting EMS Entities

- i. Initial maximum allocations or "IMAs" for all transporting eligible EMS entities will be calculated by multiplying the entity's distribution percentage by the total amount of stabilization funds available for transporting entities.
- ii. If an entity's IMA is less than or equal to \$15,000, the entity's FMA will be \$15,000.
- iii. If an entity's IMA is greater than or equal to \$200,000, the entity's FMA will be \$200,000.
- iv. If an entity's IMA is greater than \$15,000 but less than \$200,000, its IMA will be recalculated by multiplying the entity's distribution percentage by the total amount of stabilization funds available for transporting entities minus the amounts applied as FMAs to entities pursuant to ii and iii above.
- v. If the recalculation of IMAs in subsection iv above generates IMAs that are either less than or equal to \$15,000, or greater than or equal to \$200,000, FMAs will be assigned to those applicable entities in accordance with subsections ii and iii above.
- vi. IMAs greater than \$15,000 but less than \$200,000 will continue to be recalculated in accordance with subsections iv and v above until no IMAs are less than or equal to \$15,000 or greater than or equal to \$200,000. At that point, the entity's last recalculated IMA will become its FMA.

D. Posting. The Director shall provide the final maximum allocation for each EMS entity as determined by this algorithm as a component of the Announcement of Funding Opportunity.

§5. Requirements, Criteria, and Unauthorized Uses of Funds

1. Requirements. An application must:

- A. Be completed and submitted by an eligible EMS entity and its agent.
- B. Be completed in accordance with this rule and any guidance provided by the Director through Announcement of Funding Opportunity and Application.
- C. Include a project plan that meets the standards for the use of the funding; those standards are:
 - I. The funding shall only be utilized for the following activities:
 - a. Supplementing wages, benefits, stipends, and incentives for actively licensed emergency medical services persons;
 - b. Supporting training directly related to the provision of clinical care, leadership, or management of EMS;
 - c. Supplementing wages, benefits, stipends, and incentives for administrative support staff (e.g., service-level medical director, quality assurance and improvement officer, infection control officer, and training officer);
 - d. Implementation of programming directly related to the *Maine EMS Plan for a Sustainable EMS System in the State of Maine: A Vision for 2035*, with this incorporated by reference and available for download online from <https://www.maine.gov/ems/sites/maine.gov.ems/files/inline-files/20230522-Maine-EMS-Vision-and-Plan.pdf>; and
 - e. Investment in capital expenditures not to exceed \$50,000 in the aggregate.
 - D. Include a project budget that meets the standards for use of the funding.

2. Programmatic Criteria for Evaluating Applications. An application that meets the requirements of subsection one must be evaluated based on the following programmatic criteria:

- A. Based on the proposed programming, whether it aligns with the activities authorized in the previous section and whether the action will likely result in improved financial stability or workforce resiliency.

367 B. If supplementing wages, ensure that EMS entities are not paying any individual staff member
368 more than \$76,500 annually with the awarded funding. This is not inclusive of associated
369 standard employee benefits.
370

371 C. If utilizing funding for programming related to the *Maine EMS Plan for a Sustainable EMS*
372 *System in the State of Maine: A Vision for 2035*, ensuring that there is clear alignment with
373 the vision document and/or any associated guidance, agenda, or action plan that has been
374 published related to this document.
375

376 D. If making a capital expenditure, ensure that all capital expenditures collectively do not exceed
377 \$50,000 in total.
378

379 I. Only purchases valued at \$5,000 or more are considered capital expenditures for the
380 purposes of this rule.
381

382 3. **Unauthorized Uses of Funds.** Applications shall also be reviewed for potential unauthorized uses
383 of funding. Applications may be denied should it be determined that the applicant EMS entity
384 intends to use the funding for unauthorized uses. The following are unauthorized uses of the
385 funding:
386

387 A. Expenses or losses reimbursed from any other source(s) or that other sources are obligated to
388 repay.
389

390 B. Expenses related to staffing needs that exceed an annual salary of \$76,500, as prorated over
391 the applicable period. This limit does not include standard employee benefit offerings (i.e.,
392 the cost of a staff member may be higher because the cost of benefits and salary exceeds
393 \$76,500).
394

395 C. Construction, renovation, purchase, or acquisition costs for facilities.
396

397 D. Payment for existing indebtedness.
398

399 E. Payment on obligations incurred prior to the award of funds.
400

401 F. Supplanting existing local subsidies or funding sources except if they replace volunteer labor,
402 donated services, donated goods, or funds raised through community fundraising efforts (e.g.,
403 bake sales, dinners, etc.)
404

405 §6. Evaluation of Applications

406

407 1. **Evaluation Panel.** The Director shall establish an evaluation panel of at least three people who
408 will serve to evaluate each of the applications to ensure compliance with the requirements,
409 programmatic criteria, and to screen for identifiable unauthorized uses of the funding.
410

411 2. **Process.** Each panel member shall review each application separately and determine if the
412 proposed programming and budget align with the previous section.
413

- 414 A. If a single member of the panel, following their review, believes that an application is out of
415 compliance with any component of Section Five of this rule, all members of the evaluation
416 panel shall meet to discuss.
417
- 418 I. If it is determined by a majority of the evaluation panel that the application is or may be out
419 of compliance with one or more components outlined in Section Five of this rule, they
420 may take any or all, of the following actions:
421
- 422 a. Request additional information from the applicant
423
- 424 b. Offer the applicant an opportunity to modify its application within 15 calendar days to
425 come into compliance with the Announcement of Funding Opportunity.
426
- 427 II. If following these actions, the majority of the evaluation panel determines that all or part
428 of the application remains out of compliance, they may deny all or part of the proposed
429 programming and its associated budget line. This is considered final agency action.
430
- 431 B. If all members of the evaluation panel determine separately that the application is compliant
432 with all components of Section Five of this rule, they shall inform the Director and the
433 Director shall offer a funding agreement to the qualified applicant that conforms with the
434 requirements of 32 M.R.S. § 98(3)(B) and allows for the transfer of funds to the recipient
435 organization in the amount it requested or the applicant's potential maximum allocation,
436 whichever is lower.
437
- 438 C. If the committee fails to reach a resolution within 30 calendar days following the initiation of
439 the review, the Director may act on the application and take any of the actions afforded to the
440 committee as described above. That action is considered final agency action.
441
- 442 D. If an application is denied in totality, the applicant will not be eligible for funding under the
443 applicable Announcement of Funding Opportunity. Funds comprising the denied applicants
444 potential maximum allocation shall be retained for future stabilization funding opportunities
445 under the Program.
446

447 §7. Reporting 448

- 449 1. **Reporting Requirements.** The Director shall define the reporting requirements for this funding
450 opportunity and incorporate them into the funding agreements with qualified applicants. The
451 agreement shall detail specific due dates and expectations for reporting. At a minimum, qualified
452 applicants should anticipate providing quarterly and annual updates no later than 60 days
453 following the specific reporting period. Recipients must track expenditures, detail their purpose,
454 and provide evidence of the impact of the funding on the stability of the agency. The Director
455 shall also include the following as part of any resultant funding agreement:
456
- 457 A. Sustainability Planning. All recipients shall submit a sustainability plan within 180 calendar
458 days of receiving the funds detailing how they intend to sustain the programming and projects
459 initiated using the funds afforded by this rule.
460

461 I. Workforce Sustainability. Recipients that were made eligible for this funding in part by
462 workforce challenges as defined in Section Three covering Employee Recruitment and
463 Retention, shall detail their staffing sustainability plan in their plan.
464

465 **§8. Dispensing Funds**
466

467 1. **Awards.** After review, the Director shall enter into an agreement with each qualified applicant in
468 the amount of the pre-determined allocation or their requested amount, whichever is lower.
469

470 2. **Delegation.** The Board delegates authority to the Director to enter agreements with qualified
471 applicants for the disbursement of stabilization funds in amounts totaling no more than \$200,000
472 for any eligible EMS entity. Following approval of an application by the evaluation panel or the
473 Director, as the case may be, the Director may enter the agreement without any additional
474 authorization from the Board.
475
