

NEW ENGLAND EMSC PRESENTS

PEDIATRIC EMERGENCY MEDICINE GRAND ROUNDS: FEVER IN THE ANTI-VAX ERA

OBJECTIVES

- To review the history of vaccine rollout in the US, the current CDC vaccine schedule, and the effect of vaccines on infectious disease patterns among pediatric patients in the US.
- To describe the changing epidemiology of vaccine uptake among pediatric patients in the US.
- To discuss the appropriate treatment of under-vaccinated pediatric patients with fever in the pre-hospital and emergency department settings, focusing on measles, pertussis, H flu type b, and strep pneumoniae.

SPEAKERS

Maia Rutman, MD
Pediatric Emergency Medicine
Dartmouth Health

****CE available for pre-hospital providers**

Tuesday, October 28 | 12:00-1:00 pm
