

EMS Education Series

Medication Administration

1 Medical CEH

Monday, March 15 from 9-10 am

Instructor: Melinda Gammon, MSN, RN, CEN, CPEN, SAFE-A, Clinical Nurse Lead, Northern Light Mercy Hospital Emergency Department

This session will provide a review of medication administration, including body anatomy and physiology. You will learn the skills needed for safe administration of routine medications to patients following the Maine EMS Protocols. Attendees should bring practice syringes, needles, an orange or grapefruit, and vials to the virtual platform to practice skills together.

Tracheostomy

0.5 Assessment CEH and 0.5 ALS CEH

Tuesday, April 20 from 3:30-4:30 pm

Tuesday, May 18 from 3:30-4:30 pm

Instructor: Catherine Fearing, RN, Clinical Nurse Lead of Northern Light Mercy Hospital's 4B Medical/Respiratory Unit

This education will review basic airway anatomy and indications for tracheostomy; identify different tracheostomies and how they work; demonstrate how to properly suction a tracheostomy; and problem solving when a patient has a tracheostomy.

Pre-Hospital Fracture Assessment/Management and Splinting

1 Trauma CEH

Instructor: Jordan Gallo, MD, Northern Light Mercy Hospital Emergency Department Provider

Friday, June 4, 1-2 pm

This session will review musculoskeletal injuries sustained after trauma. It will include appropriate splinting techniques to diminish pain, reduce additional injury to the surrounding tissues, and prevent long-term damage. Musculoskeletal injuries are one of the most common injuries that EMS providers manage and they affect 1 in 4 Americans annually.
