GRANTS CONNECTOR

ENERGY PROJECT GRANTS, INCENTIVES AND OTHER FUNDING OPPORTUNITIES

November 2011
Grants Connector – November 2011
Sample Opportunities

$  $7 Million to Reduce Non-Hardware Costs of Solar Energy Systems
$  Smart Grid Data Access
$  Department of Energy to Invest $60 Million to Develop Innovative Concentrating Solar Power Technologies
$  Energy Efficiency Innovation – Efficiency Maine
$  Efficiency Maine Trust – Maine PACE Financing
$  Maine Small Business Credit Initiatives
$  National Student Design Competition for Sustainability
$  Sustainable Energy Pathways
$  Solid State Lighting Manufacturing
$  Office of Science Financial Assistance Program
$  Wood Pellet Boiler Heating Demo - New York
$  Biomass Heating Roadmap - New York
$  Sustainability Research Networks
$  Industry/University Cooperative Research Centers
$  HUD Multifamily Energy Innovation Fund
$  Funding for Energy-Saving Lighting Technology Research and Development
$  FHA, Fannie Mae Launch Energy Efficiency Retrofit Program
$  Coastal Climate Adaptation
$  Energy for Sustainability
$  Tax Credits for Energy Efficiency
$7 Million to Reduce Non-Hardware Costs of Solar Energy Systems

As part of the U.S. Department of Energy's (DOE) SunShot Initiative, up to $7 million to reduce the non-hardware costs of residential and commercial solar energy installations is available. Made available through the SunShot Incubator Program, this funding will support the development of tools and approaches that reduce non-hardware, or "soft" costs, such as installation, permitting, interconnection, and inspection. These expenses can amount to up to half of the cost of residential systems. The balance of system soft costs addressed by this funding opportunity includes any non-hardware aspects of an installed solar energy system, such as labor, permitting and inspection, customer acquisition, financing, and contracting. This initiative complements the SunShot program's Rooftop Challenge, which supports innovative approaches to information technology systems, local zoning and building codes and regulations in order to simplify and expedite permitting processes. The solicitation seeks applicants that will develop data-driven software tools, streamlined processes and innovative approaches, to reduce non-hardware cost.

Funding will be awarded in two tiers:

- **Tier 1** includes awards up to $500,000 with a 20% cost share over 12 months to accelerate the development of innovative non-hardware concepts. DOE may issue approximately 3–5 awards in this category.
- **Tier 2** includes awards up to $5 million with a 50% cost share over 18 months to transition innovative systems and solutions to the demonstration stage and eventually to full-scale deployment. DOE may issue approximately 1–3 awards in this category.

A primary objective of the SunShot Incubator Program is to launch new start-up businesses and new business units within existing commercial entities. Concept paper applications are due by January 16, 2012. For more information and application requirements for this Funding Opportunity Announcement, please visit the Funding Opportunity Exchange website (https://eere-exchange.energy.gov/).

**Smart Grid Data Access**

$8 million in funding to encourage utilities, local governments, and communities to create programs that empower consumers to better manage their electricity use through better access to their own electricity consumption data. The “Smart Grid Data Access” Funding Opportunity Announcement (FOA) addresses the major steps needed for a community to better leverage their smart grid assets on behalf of consumers: creating
policies that give consumers and authorized third-parties such as app developers access to customer data; and demonstrating the value of these apps and services across communities. The FOA, which is available at Grants.gov and FedConnect.net, provides additional information, including cost-sharing requirements for government-industry cooperation. The deadline for submitting applications is March 2, 2012.

**Department of Energy to Invest $60 Million to Develop Innovative Concentrating Solar Power Technologies**

**SunShot Concentrating Solar Power Research and Development**

**Funding:** Up to $60M Over 3 Years Total

**Open Date:** 10/25/2011

**Close Date:** 02/07/2012

**Funding Organization:** Solar Energy Technologies Program

**Funding Number:** DE-FOA-0000595

The Department of Energy (DOE) seeks to support research into technologies that have the potential to dramatically increase efficiency, lower costs, and deliver more reliable performance than existing commercial and near-commercial concentrating solar power (CSP) systems.

This funding opportunity seeks to develop innovative concepts that could lead to performance breakthroughs like improving efficiency and temperature ranges, and demonstrate new approaches in the design of collectors, receivers, and power cycle equipment used in CSP systems. Each of these subsystems is critical to CSP operation: the collectors collect and concentrate the sun's energy onto the receiver; the receiver accepts and transfers the heat energy to the power cycle; and the power cycle converts the heat energy into electricity. Developing low-cost collectors, high-temperature receivers, and high-efficiency power cycles should lead to subsequent system integration, engineering scale-up, and eventual commercial production for clean electricity generation applications.

For more information, see the [https://eere-exchange.energy.gov/](https://eere-exchange.energy.gov/).

Preliminary Applications Due: November 22, 2011, 5 p.m. EST
Invitations for Full Applications Sent: December 13, 2011
Full Applications Due: February 7, 2012, 5 p.m. EST

**Energy Efficiency Innovation – Efficiency Maine**

Efficiency Maine’s Innovation Program aims to support pilot programs for commercialized energy efficiency products or new ways of delivering cost-effective measures. Through the Innovation Program, Efficiency Maine is particularly interested in demonstration projects for technologies or program designs that, if they were deployed at scale, could show substantial energy savings opportunities for the state. The purpose of this RFP is to encourage the development, review, and eventual implementation of these new ideas. Closing Date is December 16, 2011. RFP at http://www.efficiencymaine.com/opportunities/em-rfp-020-2011.

**Efficiency Maine Trust – Maine PACE Financing**

Borrow up to $15,000, at 4.99% for 15 years, for energy efficiency upgrades that make your home more comfortable. Upgrade your heating system, weatherize your home, and make other improvements to cut your heating bills month after month.

Please visit: http://www.efficiencymaine.com/pace.

Find a participating energy advisor at: http://www.efficiencymaine.com/at-home/hesp_program/find_an_energy_advisor.

APPLY ONLINE at https://www.afcfirst.com/application/index.php?programid=642e92efb79421734881b53e1e1b18b6 OR CALL 1-866-ES-MAINE TO APPLY TODAY.
Borrow up to $15,000, at 4.99% for 15 years, for energy efficiency upgrades that make your home more comfortable. Upgrade your heating system, weatherize your home, and make other improvements to cut your heating bills month after month.

**Maine Small Business Credit Initiatives**

The SSBCI funds will be used to recapitalize three existing, successful programs:

1. $7 million will be available to a group of 15 regional economic development agencies to make loans to businesses in their area. See FAME’s [Regional Economic Development Revolving Loan Program](http://www.maine.gov/tools/whatsnew/index.php?topic=Portal+News&id=304431&v=Article-2008).

2. $3.2 million will be allocated to FAME for the Economic Recovery Loan Program – loans of up to $1 million that meet the program’s underwriting requirements, which can be used statewide;

For more information, please contact FAME’s Bob Corey at (207) 620-3524.

**National Student Design Competition for Sustainability**

The U.S. Environmental Protection Agency requests proposals for the National Student Design Competition for Sustainability Focusing on People, Prosperity and the Planet (P3). The P3 Awards program was developed to foster progress toward sustainability by achieving the mutual goals of economic prosperity, protection of the planet, and improved quality of life for its people. Areas of interest include: Energy; Built Environment; Materials and Chemicals; Water; Agriculture; Green Infrastructure; and Clean Cookstoves. $1.05 million expected to be available, up to 45 awards anticipated. Responses due 12/22/11. For more info, contact Cynthia Nolt-Helms at nolt-helms.cynthia@epa.gov or go to: [http://www.epa.gov/ncer/rfa/2012/2012_p3.html](http://www.epa.gov/ncer/rfa/2012/2012_p3.html). Refer to EPA-G2012-P3.
**Sustainable Energy Pathways**

The National Science Foundation requests proposals for Sustainable Energy Pathways. This RFP will support interdisciplinary efforts by teams of researchers to address the challenges of developing efficient pathways towards a sustainable energy future. $34 million expected to be available. Responses due 2/1/12. For more info, including agency contacts, go to: [http://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf11590](http://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf11590). Refer to Sol# 11-590.

**Solid State Lighting Manufacturing**

The U.S. Department of Energy requests proposals for Solid State Lighting Manufacturing Research and Development - Round 3. This RFP will support R&D to achieve cost reduction of solid-state lighting for general illumination through improvements in manufacturing equipment, processes, or techniques. $10 million expected to be available, up to 4 awards anticipated. Responses due 12/15/11. For more info, contact SSLManufacturingFOA@netl.doe.gov or go to: [https://eere-exchange.energy.gov/](https://eere-exchange.energy.gov/). Refer to Sol# DE-FOA-0000561.

**Office of Science Financial Assistance Program**

The U.S. Department of Energy announces its continuing interest in receiving applications for the Office of Science Financial Assistance Program. Areas of interest include, but are not limited to: Basic Energy Sciences and Biological and Environmental Research, and Workforce Development for Teachers and Scientists. Subtopics include Solar Photochemistry Research, and Climate Sciences. $400 million expected to be available, multiple awards anticipated. Responses due 9/30/12. For more info, contact Kimberlie Laing at kim.laing@science.doe.gov or go to: [https://www.fedconnect.net/fedconnect/?doc=DE-FOA-0000660&agency=DOE](https://www.fedconnect.net/fedconnect/?doc=DE-FOA-0000660&agency=DOE). Refer to Sol# DE-FOA-0000600.

**Wood Pellet Boiler Heating Demo - New York**

The New York State Energy Research and Development Authority requests proposals for the High Efficiency Wood Pellet Boiler Heating Demonstration. This RFP will support the demonstration and evaluation of high-efficiency and low emission wood-pellet boiler heating systems with hydronic thermal-storage and bulk pellet storage; air pollution control technology for commercial wood pellet systems; and pneumatic bulk pellet distribution systems. $1 million expected to be available. Responses due 11/30/11. For more info, contact Ellen Burkhard at nar@nyserda.org or go to: [http://www.nyserda.org/funding/2357pon.asp](http://www.nyserda.org/funding/2357pon.asp). Refer to PON# 2357.

**Biomass Heating Roadmap - New York**

The New York State Energy Research and Development Authority requests proposals for the Development of a Biomass Heating Roadmap for New York. The Roadmap will
address feedstocks and technologies that are currently being used, near-term technologies that are expected to significantly contribute, and promising future technologies that may make significant contributions in more than ten years. $350K expected to be available, 1 award anticipated. Responses due 12/6/11. For more info, contact Judy Jarnefeld at jj1@nyserda.org or go to: http://www.nyserda.org/funding/2329rfp.asp. Refer to RFP# 2329.

**Sustainability Research Networks**

The National Science Foundation requests proposals for the Sustainability Research Networks Competition. Through this competition, NSF, in partnership with other agencies, international efforts, and the private sector, aims to support members of the academic research community for projects which produce discoveries and knowledge that will inform decisions leading to environmental, energy, social and cultural sustainability. $36 million expected to be available, up to 4 awards anticipated. Preliminary proposals due 12/1/11, final proposals due 4/1/12. For more info, including contacts, go to: http://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf11574. Refer to NSF 11-574.

**Industry/University Cooperative Research Centers**

The National Science Foundation requests proposals for Fundamental Research Program for Industry/University Cooperative Research Centers. Areas of interest include, but are not limited to: Energy and Environment; Advanced Manufacturing; Biotechnology; Advanced Materials; and Fabrication and Process Technology. $1.6 million expected to be available, up to 10 awards anticipated. Responses due 2/1/12. For more info, contact Rathindra DasGupta at rdasgupt@nsf.gov or go to: http://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf11570. Refer to NSF 11-570.

**HUD Multifamily Energy Innovation Fund**

The Department of Housing and Urban Development’s (HUD) Office of Affordable Housing Preservation (OAHP) is issuing a notice of fund availability (NOFA) for the Multifamily Energy Innovation Fund. This fund provides a total of $25 million in grants to be used for the purpose of energy efficiency upgrades at multifamily properties. The goals of this NOFA are to:

1. Demonstrate solutions to the primary and longstanding challenges to implementing energy efficiency and renewable energy improvements, in existing affordable multifamily properties.
2. Leverage private capital and additional public funding to demonstrate “proof of concept” of specific models.
3. Conduct applied research to document and disseminate mainstream, scalable approaches to retrofitting affordable multifamily properties.
The overall objective of the Energy Innovation Fund is to help catalyze a home energy retrofit market in the United States by accelerating private investment in cost-saving energy efficiency retrofits in the residential sector. Innovative and replicable strategies to improve the usefulness of existing HUD programs—as well as developing new financing tools—will lead to significant reductions in energy consumption, operating costs, and the carbon footprint of both affordable and market-rate housing. More information can be found here: http://www.hud.gov/offices/adm/grants/nofa10/grpeif.cfm.

FHA, Fannie Mae Launch Energy Efficiency Retrofit Program

The U.S. Housing and Urban Development Department (HUD) announced on May 31 its Green Refinance Plus, a program between HUD's Federal Housing Administration (FHA) and Fannie Mae to boost energy efficiency in older affordable housing. The program will allow owners of existing affordable rental housing properties to refinance into new mortgages that include funding for energy- and water-saving upgrades, along with other needed property renovations.

Under the program, FHA and Fannie Mae will share the risk on loans to refinance existing rent-restricted projects while permitting owners to borrow additional funds to make energy-saving improvements to their properties. Owners of existing multifamily affordable properties typically refinance their mortgages every 10 to 15 years. In older apartment buildings, however, owners are often hard-pressed to find additional financing to maintain or improve the physical condition of their properties, including making energy-efficient upgrades. Soon, Fannie Mae and its participating lenders will begin accepting applications to refinance owners' debt and improve the energy efficiency of their properties.

The initiative is intended to refinance the expiring mortgages of Low Income Housing Tax Credit properties, and other affordable projects, and to lower annual operating costs by reducing energy consumption. Fannie Mae and HUD anticipate approximately $100 million in initial refinance volume with an average loan amount of $3.5 to $5 million.

Coastal Climate Adaptation

The U.S. Department of Commerce, National Oceanic and Atmospheric Administration, requests proposals for the Sea Grant Community Climate Adaptation Initiative 2011. This initiative will fund climate adaptation efforts as part of an overall plan to enhance climate adaptation in coastal communities. $1 million expected to be available, individual awards NTE $100K. Responses due 11/22/11. For more info, contact oar.hq.sg.competitions@noaa.gov or go to: http://www.grants.gov/search/search.do?mode=VIEW&oppId=103673. Refer to Sol# NOAA-OAR-SG-2011-2002930.
Energy for Sustainability

The National Science Foundation requests proposals for Energy for Sustainability. This program supports fundamental research and education in energy production, conversion, and storage and is focused on energy sources that are environmentally friendly and renewable. Sources of sustainable energy include: Sunlight, Wind/Wave, Biomass, and Geothermal. $9.2 million expected to be available, up to 42 awards anticipated. Responses due 2/17/12. For more info, contact Gregory Rorrer at grorrer@nsf.gov or go to: http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=501026. Refer to Sol# PD-12-7644. (Grants.gov 6/8/11)

Tax Credits for Energy Efficiency
(http://www.energysavers.gov/financial/70010.html)

If you purchase an energy-efficient product or renewable energy system for your home, you may be eligible for a federal tax credit. Below is an overview of the federal tax credits for energy efficiency that are currently available.

While some energy efficiency tax credits are available through 2011, others are available through 2016 as noted below.

How to Claim Your Tax Credit

- Visit the IRS website http://www.irs.gov/ to obtain the correct forms for the tax year you are filing.
- Use the following forms:
  - For renewable and efficiency credits: IRS Form 5695
  - For alternative motor vehicle credits: IRS Form 8910. Also download instructions for form 8910.
  - For qualified plug-in electric drive motor vehicle credits: IRS Form 8936.
- Save your receipts, or make copies of them, and the Manufacturer Certification Statement for your records.
- NOTE: The credits are nonrefundable—in other words, the credits are only available to the extent you have a tax liability. The credits for home energy improvement products eligible through 2011 may be limited if you are subject to the AMT.
- Tax credits can only be claimed once, and are limited to the year in which they are purchased: If you claimed a home energy improvement tax credit on your 2010 taxes, you cannot take an additional credit for the same purchase on your 2011 taxes.
- There is a $500 lifetime limit on the federal tax credits that expire in December 2011 (not those that expire in 2016). If you have received a total of $500 or more in these tax credits from 2006-2010, you are not eligible for any more.
