

DRAFT FOR DISCUSSION

Interim Report of the Distributed Generation Stakeholder Group

**Pursuant to Public Law 2021, Chapter 390 – An Act To Amend State Laws Relating to Net Energy Billing
and the Procurement of Distributed Generation**

November 2021

DRAFT

Introduction

- a. **P.L. 2021 ch. 390**
- b. **Purpose of this report**
- c. **Stakeholder group members**
- d. **Process**

Initial areas of consensus

Discussion of specific topics

How the State should undertake the adoption and implementation of a forward-looking, holistic grid planning process that allows for input from stakeholders and provides key actors with the ability to more strategically make system operations, planning and investment decisions

The optimum total amount of distributed generation for the program period calculated using 7% of total load based on operational capacity

How to cost-effectively incentivize net energy billing arrangement project diversity

How to support the successful development of distributed generation by small companies based in the State

Recommendations
