Discussion

- Is the template wrapped up?
 - o Enough for now. After the full CMWG meeting next week, we may have some more to clean up and clarify, but nothing much to discuss right now.
- Next week: in person at the Island Institute
- We should think about what we want to go big on, like a 30 by 30 goal or big public investment in infrastructure
 - o The narrative descriptions and context setting are important, too, and we should focus on them.
- Meeting adjourned at 3:10 because no one else showed up
