# Town of Jay Storms of 2023

Shiloh LaFreniere Town Manager, Jay, Maine

## Timeline

Between May 20023 and December 2023, the Town of Jay sustained catastrophic damage from three major rainstorms, resulting in devastating road and property damage.

### May 1<sup>st</sup> storm

• 7 roads damaged. Cost to repair approximately \$67,000.

#### June 29th storm

- 6-8 inches of rain fell with 2.5 hours.
- Over 21 roads, one recreational trail and sewer lines damaged.
- Initial costs estimated over \$7 million. Currently at about \$3.5 million.

#### December 18<sup>th</sup> storm

• 11 roads and 2 municipal properties damaged. Cost to repair approximately \$40,000.

#### TOWN OF JAY JUNE 29, 2023 STORM EVENT SUMMARY OF DAMAGES BY CATEGORY AND LOCATION

June storm damage was initially estimated at \$7.8 million.

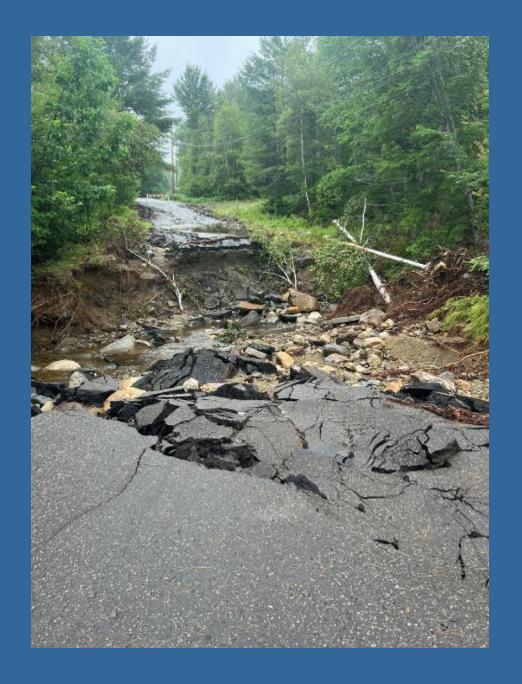

## Where We Have Been...

Over 20 local roads were significantly damaged by these storms as well as several State roads, the Whistle Stop Rail Trail, the Town's sewer infrastructure and many private properties.

The amount of work associated with these damages has been incredible – both during the storms when emergency response was put to the test; after the storm when immediate repairs had to be made; and the ongoing efforts for permanent repairs as well as working with FEMA on the necessary paperwork for reimbursement of what is expected to be millions of dollars in costs.

These pictures are just a few of the areas impacted.

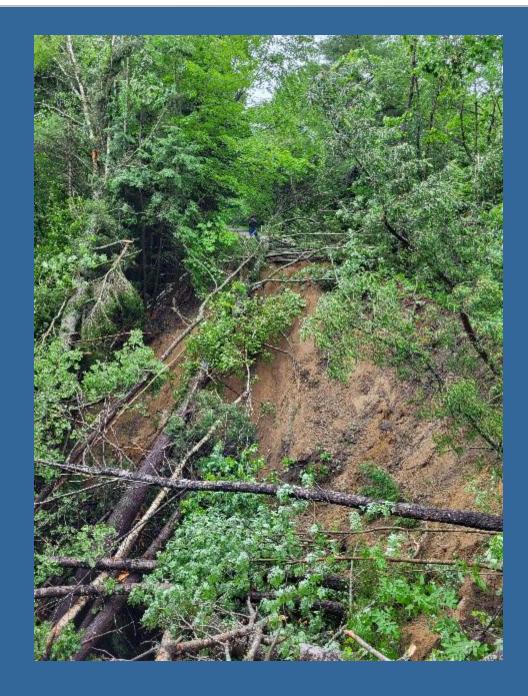

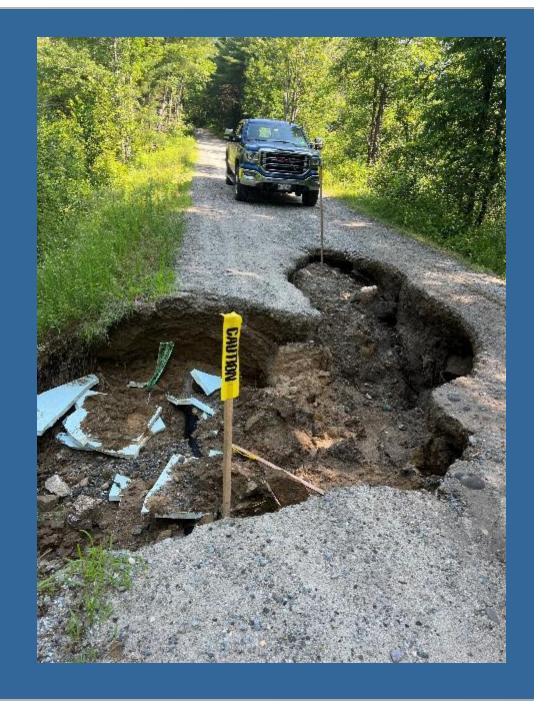

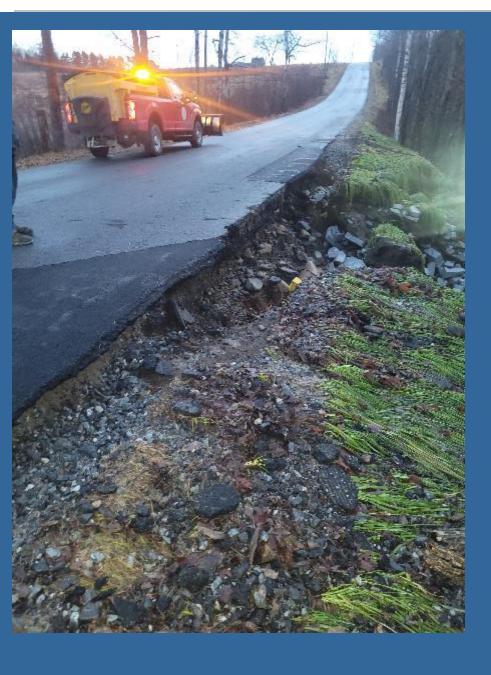

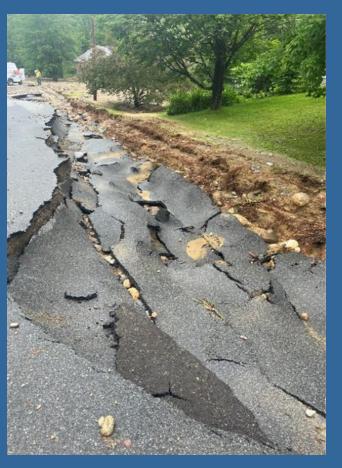

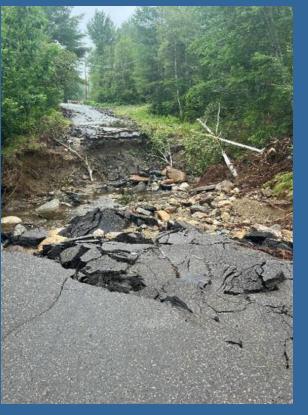

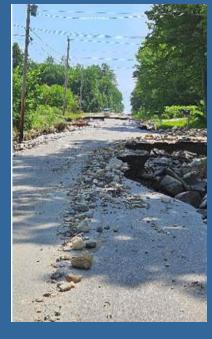

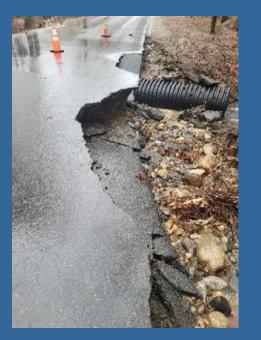

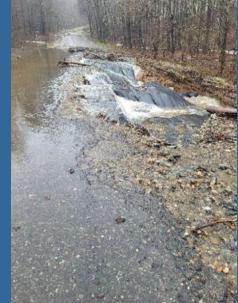

## Daily Public Works Sheet Example

### For Tracking Equipment Used, Materials Used and Employees Time

Includes FEMA codes for equipment, invoiced rates for materials and employee hourly and benefits costs.

## Storm Update October 2023

May 1st and June 29th Storm Updates: We are continuing to work with our FEMA Project Manager for the May storm. He has now been assigned to us for the June storm as well and we will be doing our kickoff call for June later this week. The work with the PM is very time and data intense but is necessary for us to seek reimbursement for the storm damage.

The Woodman Hill Road repair is ongoing and is expected to be complete by the 15th, minus paving. We intend to open that road as soon as the contractor has moved their equipment out and the guardrails are installed. We are not planning to wait on paving because we realize the impact of this closure, including on emergency services. We will continue to urge caution on all the roads that have not been fully repaired with pavement.

The Public Works crew continues to work on damaged areas, filling in gravel as it settles and completing ditching in some areas. They have also been working on getting the pavement cut out so that the sites on various roads are ready to go as soon as Pike can get a hand crew to our area. The work needed is more labor intense than the typical machine paving due to the sporadic nature of all of the washouts.

The Lake School Road culvert project was completed. The two culverts were replaced and that area just needs paving. That is the final project from the May storm.

We have met with the engineers in regard to designing the permanent repairs for Begin, Hutchinson, Macomber and the Rail Trail where the sewer line was impacted. We anticipate having those proposals for the next Board meeting so that the design and permitting work can be done over the winter with bids going out in Feb/March and construction next spring/summer. These will require DEP and Army Corp permits which will need to be obtained this winter as well.

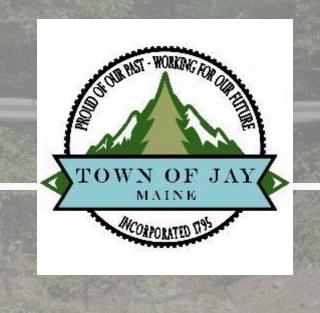

Begin Road currently has temporary access which we believe we will be able to maintain through the winter and spring. Hutchin son Road has temporary access that we are concerned will not hold up in the spring floods due to the nature of that brook. We are talking with bridge companies as well as the DEP and Army Corp to explore a temporary bridge option. We anticipate having that information for the next Board meeting as well. Due to the extent of the Macomber Hill Road washout, there is no reasonable option for temporary access and that area will await permanent repair.

Temporary repairs were completed last week on the Rail Trail where our sewer line was impacted. The line has been reinsulated and stabilized with surface material restored as a temporary measure to get us through the winter. Permanent repairs that address the culvert washouts will be designed and permitted over the winter.

The Sewer Superintendent is also making arrangements to complete a point repair on the sewer line that runs down Jay Hill. They have run a camera through the line but hit an obstruction. Once that has been cleared they will continue to move down the line and determine its status, making further repairs if needed. This will give us the full picture of future permanent repairs that might be needed.
