Community Profiles

Cape Elizabeth (Cumberland)

Cape Elizabeth is a town in Cumberland County with 2,319 residents aged 65 and older. Compared to state average rates, older residents fare better on some healthy aging indicators with lower rates of Alzheimer's disease or related dementias, anemia, benign prostatic hyperplasia, chronic kidney disease, chronic obstructive pulmonary disease (COPD), colon cancer, congestive heart failure (CHF), diabetes, heart attack, hypertension, ischemic heart disease, peripheral vascular disease, stroke, and tobacco use disorder. However, they have higher rates of breast cancer and cataract. Older residents in Cumberland County varied in obtaining preventive health screenings: residents 18 and older got annual physical exams (77.5%) and annual dental exams (73.2%), while 54.5% of men and 43.5% of women 65 and older completed all CDC recommended vaccinations and cancer screenings. Community resources to support healthy aging include three primary care providers, and one public library.

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
Total population (all ages)		9,519	1,366,949
Population 60 years or older as % of total population		32.7%	29.4%
Total population 60 years and older		3,115	402,170
Population 65 years or older as % of total population		24.4%	21.5%
Total population 65 years and older		2,319	293,488
% 65-74 years		63.8%	59.9%
% 75-84 years		25.3%	28.5%
% 85 years or older		10.9%	11.6%
% 65+ population who are female		57.8%	54.3%
% 85+ population who are female		71.8%	64.8%
Race and ethnicity of the population 65+			
% White		96.6%	96.6%
% African American		0.0%	0.3%
% Asian		2.2%	0.5%
% Other race(s)		1.2%	2.5%
% Hispanic		1.1%	0.7%
# 55+ who are Native American / Alaskan		0	1,794
Marital status of the population 65+			
% married	*	72.2%	57.0%
% divorced/separated		12.8%	16.9%
% widowed	*	12.1%	20.6%
% never married		2.9%	5.6%
Education of the population 65+			
% with less than high school education	*	1.2%	7.6%
% with high school or some college	*	28.6%	59.0%
% with college degree		22.6%	18.3%
% with graduate or professional degree	*	47.6%	15.1%
% 65+ population who speak only English at home		96.6%	92.7%
% 65+ population who are veterans of military service		17.4%	18.4%

POPULATION CHARACTERISTICS	Significantly different than state rate	Community estimate	State estimate
HOUSING			
% 65+ population who live alone		21.2%	28.3%
Average household size (all ages)		2.5	2.3
Median house value (all ages)	*	\$600,200	\$244,800
% 60+ own home	*	93.4%	80.4%
% 60+ homeowners who have mortgage		44.1%	40.6%
% 65+ households (renter) spend >35% of income on housing		0.0%	35.2%
% 65+ households (owner) spend >35% of income on housing		30.4%	20.4%
% grandparents who live with grandchildren		1.0%	1.8%
# of assisted living sites		0	21
SOCIAL DETERMINANTS OF HEALTH			
COST OF LIVING			
Elder Index			
Single, homeowner without mortgage, good health (County)	1.05	\$25,752	\$24,528
Single, renter, good health (County)	1.15	\$33,132	\$28,704
Couple, homeowner without mortgage, good health (County)	1.02	\$38,088	\$37,380
Couple, renter, good health (County)	1.09	\$45,468	\$41,556
ECONOMIC			
% 60+ receiving food stamps in past year		5.1%	10.8%
% 65+ employed in past year		28.7%	18.8%
% 65+ with income below the poverty line in past year	*	2.3%	9.0%
Median annual income for households with a householder age 65+	*	\$94,900	\$49,828
% 65+ households with annual income < \$20,000	*	2.2%	17.1%
% 65+ households with annual income \$20,000-\$49,999		25.1%	33.1%
% 65+ households with annual income \$50,000-\$99,999		26.4%	29.4%
% 65+ households with annual income \$100,000+	*	46.3%	20.4%
WELLNESS			
% 18+ with less than 7 hours sleep (County)		29.0%	NA
% 18+ without leisure-time physical activity (County)		19.8%	NA
% 18+ with fair or poor self-reported health status (County)		10.8%	NA
% 18+ with 14+ physically unhealthy days (County)		9.1%	NA
COMMUNITY			
Annual # unhealthy days due to air pollution for 65+ (County)		3	NA
AARP Age-Friendly Communities		Not yet	Yes
# of public universities and community colleges		0	43
# of public libraries		1	260
# of senior centers		0	27
# of Osher Lifelong Learning Institutes (OLLI)		0	1
% households with a smartphone (all ages)	*	93.7%	82.5%
% households with only a smartphone to access the Internet (all ages)	*	1.2%	6.4%
% households without a computer (all ages)	*	2.7%	7.1%
% households with access to Broadband (all ages)	*	95.8%	87.3%
% households without access to the Internet (all ages)	*	4.2%	12.3%

SOCIAL DETERMINANTS OF HEALTH	Significantly different than state rate	Community estimate	State estimate
COMMUNITY			
Voter participation rate in 2020 election (age 18+)		79.9%	74.1%
Homicide rate/100,000 persons (County)		1.2	1.5
# firearm fatalities (all ages) (County)		104	770
# 65+ deaths by suicide (County)		42	290
Age-sex adjusted 1-year mortality rate	B	2.9%	4.2%
TRANSPORTATION			
% householders 65+ who own a motor vehicle		95.3%	91.0%
# fatal crashes involving adult age 60+ (County)		29	251
AllTransit Score		NA	0.51
HEALTH OUTCOMES			
FALLS			
% 65+ with hip fracture		3.8%	3.1%
PREVENTION			
% 18+ with physical exam/check-up in past year (County)		77.5%	NA
% mammography use among women age 50-74 Years (County)		78.4%	NA
% 50-75 with fecal occult blood test, sigmoidoscopy, or colonoscopy (County)		83.0%	NA
% 65+ men up to date on preventive services (County)		54.5%	NA
% 65+ women up to date on preventive services (County)		43.5%	NA
NUTRITION & DIET			
% 18+ with obesity (County)		26.3%	NA
% 65+ with high cholesterol		66.5%	69.5%
% 18+ with cholesterol screening (County)		63.3%	NA
ORAL HEALTH			
% 18+ with annual dental exam (County)		73.2%	NA
# dentists per 100,000 persons (all ages) (County)		90.4	47.2
% 65+ with complete tooth loss (County)		8.4%	NA
CHRONIC DISEASE			
% 65+ with Alzheimer's disease or related dementias	B	8.8%	11.0%
% 65+ with anemia	B	29.9%	38.1%
% 65+ with asthma		11.2%	11.8%
% 65+ with atrial fibrillation		12.9%	14.3%
% 65+ with benign prostatic hyperplasia (men)	B	28.1%	35.2%
% 65+ with breast cancer (women)	W	13.6%	9.6%
% 65+ with cataract	W	68.1%	60.4%
% 65+ with chronic kidney disease	B	21.1%	29.4%
% 65+ with chronic obstructive pulmonary disease	B	11.9%	20.9%
% 65+ with colon cancer	B	1.8%	2.1%
% 65+ with congestive heart failure	B	11.5%	18.1%
% 65+ with diabetes	B	18.4%	26.2%
% 65+ with endometrial cancer (women)		2.3%	2.2%
% 65+ with fibromyalgia, chronic pain, and fatigue		36.0%	34.8%
% 65+ with glaucoma		22.5%	23.3%

HEALTH OUTCOMES	Significantly different than state rate	Community estimate	State estimate
CHRONIC DISEASE			
% 65+ ever had a heart attack	B	2.7%	6.1%
% 65+ with HIV/AIDS		0.20%	0.17%
% 65+ with hypertension	B	60.3%	67.1%
% 65+ with ischemic heart disease	B	23.6%	35.3%
% 65+ with liver disease		8.1%	10.2%
% 65+ with lung cancer		1.6%	1.8%
% 65+ with migraine and other chronic headache		7.8%	7.1%
% 65+ with osteoarthritis or rheumatoid arthritis		52.4%	51.5%
% 65+ with osteoporosis		17.8%	15.7%
% 65+ with peripheral vascular disease	B	12.2%	15.3%
% 65+ with pressure ulcer or chronic ulcer		5.9%	6.8%
% 65+ with prostate cancer (men)		11.3%	10.3%
% 65+ with stroke	B	5.8%	10.0%
% 65+ with 4+ (out of 15) chronic conditions	B	47.5%	55.5%
% 65+ with 0 chronic conditions		10.8%	12.4%
BEHAVIORAL HEALTH			
# drug overdose deaths (all ages) (County)		426	2,080
% 65+ with substance use disorder		6.7%	8.7%
% 18+ excessive drinking (County)		18.4%	NA
% 65+ with tobacco use disorder	B	5.8%	13.6%
% 18+ current smokers (County)		11.5%	NA
MENTAL HEALTH			
% 18+ with 14+ days poor mental health (County)		13.7%	NA
% 65+ with depression		33.4%	34.8%
% 65+ with anxiety disorder		29.9%	30.7%
% 65+ with post-traumatic stress disorder		3.9%	3.9%
% 65+ with schizophrenia & other psychotic disorder		3.5%	3.2%
LIVING WITH DISABILITY			
% 65+ with self-reported hearing difficulty	*	5.3%	15.5%
% 65+ with self-reported vision difficulty		3.0%	4.6%
% 65+ with self-reported cognition difficulty		3.8%	7.5%
% 65+ with self-reported ambulatory difficulty	*	10.4%	17.8%
% 65+ with self-reported self-care difficulty		5.6%	5.2%
% 65+ with self-reported independent living difficulty		6.5%	10.5%
CAREGIVING			
# of Alzheimer's support groups		0	11
% grandparents raising grandchildren	*	0.00%	0.55%

TECHNICAL NOTES

*For more information on data sources, measures, and methodology used in the 2025 Maine Healthy Aging Data Report see our technical documentation at ([healthyaqingdatareports.org](https://www.healthyaqingdatareports.org)). For most indicators, the community and state values are estimates derived from sample data. Thus, it is possible that some of the differences between state and community estimates may be due to chance associated with population sampling. We use the terms "Better" and "Worse" to highlight differences between community and state estimates that we are confident are not due to chance. We balance two goals. First, we aim to report data at very local levels because we believe change is often locally driven. Second, we vowed to protect the privacy of the people providing the information reported. Thus, given the constraints of the data analyzed, we used a hierarchical approach to reporting.

How Do Race and Ethnicity Impact Healthy Aging?

Maine's older population is changing

AGE

The age structure of the older population has shifted younger as the baby boom generation enters later life.

MORE DIVERSE

The population of adults 65 or older is increasingly diverse.

96.6% White, 0.7% Hispanic, 0.5% Asian, 0.3% African American/Black, 2.5% Other Race(s)

MORE EDUCATED

The population of adults 65 or older is more educated.

status of healthy and ethnic

we recognize to get healthcare or report, when in members have tions because of a he observed health stressful burdens ing the why of this type of hat (that is,

s older adults have older adults in sev- notable difference o are dually-eligible a 16.2% difference

Other significant % higher among ey disease (9.5%), 0%). Conversely, ompared to Black largest differences er among White umstoid arthritis and atrial fibril- uggest varying wo groups, with incing higher rates diseases and dual ing a higher prev- ental health and ch as cataracts

96.6% White 65+
0.3% Black 65+
0.5% Asian 65+
0.7% Hispanic 65+

2.5% Other Race(s) 65+
1,794 Native American/Alaskan 55+

For Hispanic older adults, the disparities are also evident. Hispanic adults have higher rates in dually-eligible Medicare and Medicaid (10.0% higher than White older adults), and % with 0 chronic conditions (5.5%). However, Whites adults have higher rates in cataract (10.7%), high cholesterol (7.7%), osteoarthritis or rheumatoid arthritis (5.8%), and anemia (5.4%). This pattern indicates that Hispanic adults face greater challenges related to dual eligibility, whereas White adults have higher rates in cardiovascular conditions and some other chronic conditions.

Asian older adults generally show fewer disparities compared to White adults. Older Asians have a prominently higher rate of those who are dually-eligible for Medicare and Medicaid (a 15.9% difference), and have a higher rate of diabetes (7.3% greater). Conversely, White adults have higher rates in Ischemic heart disease (13.5%), depression (12.3%), Medicare managed care enrollees (11.5%), osteoarthritis or rheumatoid arthritis (11.0%), cataract (10.0%), and several chronic conditions (chronic obstructive pulmonary disease and 4+ chronic conditions).

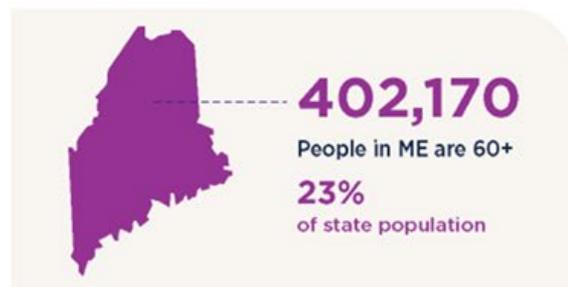

Native American older adults in Maine show substantial disparities compared to White adults, particularly in those who are dually-eligible for Medicare and Medicaid (a 27.7% difference),

Technical Documentation

TECHNICAL DOCUMENTATION

Overview

This report contains details about the development of the 2025 Maine Healthy Aging Data report. This includes technical definitions, data sources, years of data used, and definitions of the geographic units employed for various indicators. In addition, we describe the statistical methods used to estimate indicators derived from micro-level data. Our general approach is hierarchical reporting. We report indicators at the smallest, most local level possible (i.e., neighborhood, zip code, or individual community) when data allow, and report in larger geographic units (i.e., county) when necessary.

1. Healthy Aging Indicator Definitions

Most of the indicators are derived from secondary data sources and limited to those indicators for which data are available for geographic subareas within Maine. Table A-1 contains technical definitions for most of the indicators reported in this study, except the socio-demographic variables used to describe the population composition of communities.

2. Data Sources

Multiple data sources are used in this study. Table A-2 contains a summary of all data sources, and the specific years of data used for population composition and healthy-aging indicators. Estimates of community-level indicators of physical/mental health, chronic disease prevalence, access to care, wellness and prevention health behaviors, service utilization, and nutrition and diet were derived from two major data sources: the Medicare Master Beneficiary Summary File (2020-2021) and the Behavioral Risk Factor Surveillance System (2020-2021). Population composition measures were drawn from the Five-Year American Community Survey (2018-2022) produced by the U.S. Census Bureau. These major data sources, and other data sources used for indicators representing safety, economic, and wellness variables are described below.

Medicare Master Beneficiary Summary File

Medicare claims data from the Centers for Medicare and Medicaid Services (CMS) are a rich source of data for measuring chronic disease prevalence and Medicare service utilization rates for individual cities and towns. The *Master Beneficiary Summary File (MBSF)* is an annual data file constructed by the Chronic Conditions Data Warehouse that includes individual records for all persons eligible for Medicare for at least one month during a calendar year. MBSF is comprised of four data files containing different types of information:

- (1) The *Master Beneficiary Summary File-A/B/D (MBSF-A/B/D)* includes standard Medicare administrative data fields (e.g., sex, race, dates of birth and death), monthly variables indicating specific months of Medicare eligibility, managed care

Table A1: Maine Healthy Aging Indicator Definitions

INDICATORS	DEFINITION
POPULATION CHARACTERISTICS	
	The number of all persons in the state or community.
Population 60+ as % of total population	The percentage of persons 60 years or older among the total population.
Population 60+ older	The number of persons 60 years or older.
Population 65+ as % of total population	The percentage of persons 65 years or older among the total population.
Population 65+ older	The number of persons 65 years or older.
Population 65-74 as % of population aged 65 year or older	The percentage of persons 65-74 years among population aged 65 year or older.
Population 75-84 as % of population aged 65 year or older	The percentage of persons 75-84 years among population aged 65 year or older.
Population 85+ as % of population aged 65 year or older	The percentage of persons 85+ years among population aged 65 year or older.
Female 65+ as % of population aged 65 year or older	The percentage of females 65 years or older among population aged 65 year or older.
Female 85+ as % of population aged 65 year or older	The percentage of females 85 years or older among population aged 65 year or older.
	The percentage of persons 65 years or older reporting their race as "White" or reporting entries such as Irish, German, Italian, Lebanese, Arab, Moroccan, or Caucasian.
	The percentage of persons 65 years or older reporting their race as "Black or African American" or reporting entries such as African American, Kenyan, Nigerian, or Haitian.
	The percentage of persons 65 years or older reporting their race as "Asian Indian," "Chinese," "Filipino," "Korean," "Japanese," "Vietnamese," and "Other Asian" or provide other detailed Asian responses.
	The percentage of persons 65 years or older reporting their race as "Native Hawaiian or other Pacific Islander", or reporting entries such as Navajo, Blackfeet, Inupiat, Yupik, or Central American Indian groups, South American Indian groups, "Some other race", or two or more races.
	The percentage of persons 65 years or older reporting their origin as "Hispanic or Latino".
Population 55+ as % of population 65+	The number of persons 55 years or older reporting their race as "American Indian or Alaska Native"

How are the healthy aging data reports created?

Data Sources

- ▶ The **American Community Survey (ACS) 5-year files (2018-2022)** of the U.S. Census Bureau was the source of demographic, socioeconomic status, and housing data for communities.
- ▶ The **Centers for Medicare and Medicaid Services (2020-2021)** the Medicare Summary Beneficiary files were the major source of data on prevalence rates of chronic disease conditions and medical utilization.
- ▶ The **Behavioral Risk Factor Surveillance System (2010-2022)** of the Centers for Disease Control and Prevention and state health departments was the major source of data for health risk behaviors, preventive health practices, and health care access.
- ▶ Plus, other data sources noted in technical documents.

Pragmatic, hierarchical approach to reporting (*only going as far as the data and DUA's allow*) but reporting at the most local level possible

Tier 5: CMS lowest prevalence geo units
N=16

Tier 4: BRFSS geo units
N=16

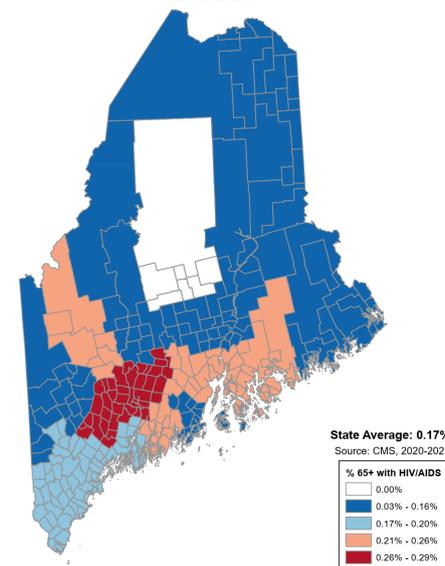

Tier 3: CMS low geo units
N=165

Tier 2: CMS high geo units
N=185

Tier 1: ACS all geographic units
N=265

What's New in Aging in Maine?

Maine is a state bursting with potential to benefit from the gains in human longevity and the opportunities it presents. The older population is growing, more diverse, and more educated than previous generations.

Maine's older population is growing

IMPACT OF COVID-19

According to the Centers for Disease Control, 3,760 Maine residents died as a result of the COVID-19 pandemic. We expect that the reverberations of the pandemic will impact health and aging for years to come.

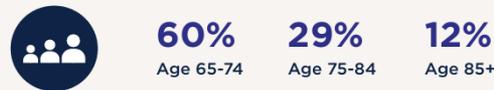

OTHER INDICATORS

- **Marital Status:** In terms of marital status among the population 65+, 57% are married, 16.9% divorced/separated, 20.6% widowed, and 5.6% never married.
- **Mental Health:** Compared to the other New England states older residents of Maine had the highest rates for ever being diagnosed for depression (34.8%).
- **Chronic Conditions:** Positively, Mainers had the highest percentage of people reporting zero chronic diseases (12.4%) and the lowest rates for breast cancer (9.6%).
- **HIV/AIDS:** The rate of adults 65+ with HIV/AIDS increased from 0.09% in 2014-2015 to 0.17% in 2020-2021.

Maine's older population is changing

AGE

The age structure of the older population has shifted younger as the baby boom generation enters later life.

MORE DIVERSE

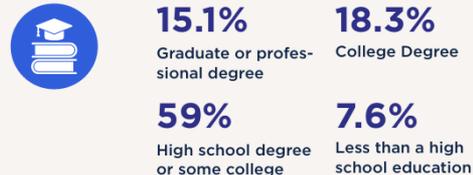

The population of adults 65 or older is increasingly diverse.

96.6% White, 0.7% Hispanic, 0.5% Asian, 0.3% African American/Black, 2.5% Other Race(s)

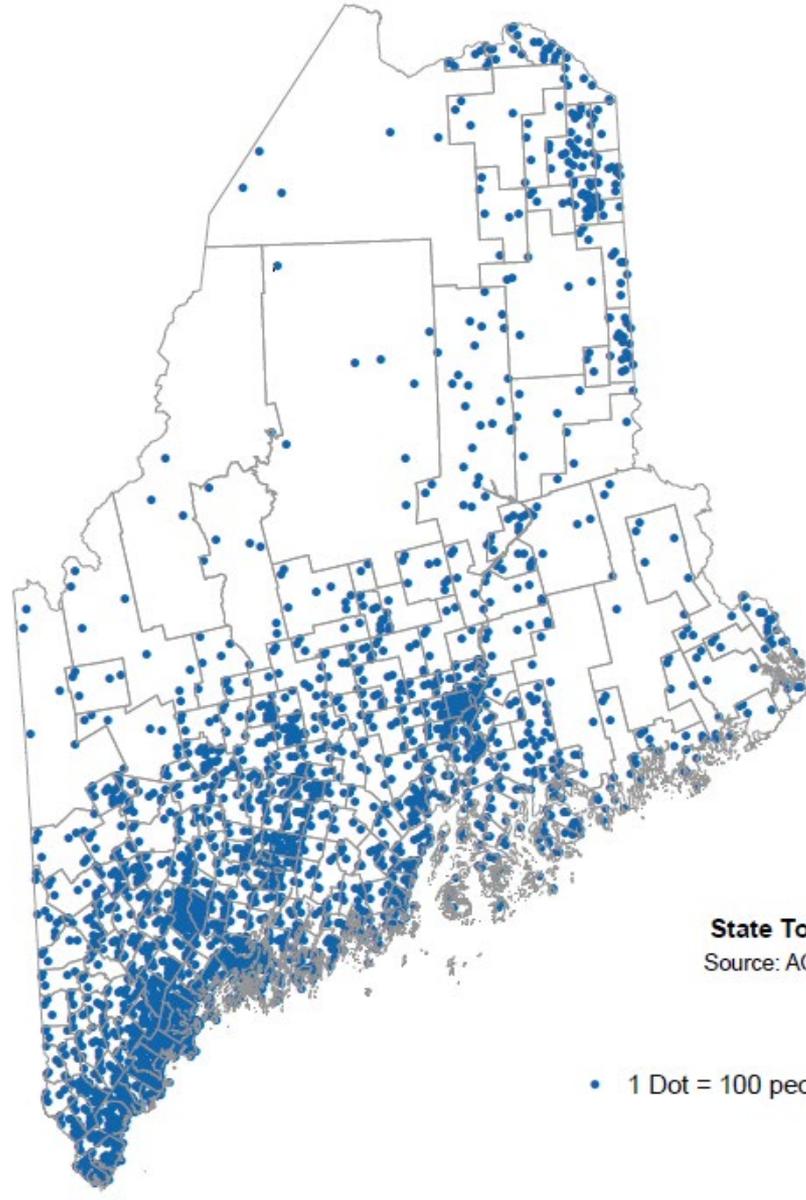

MORE EDUCATED

The population of adults 65 or older is more educated.

- Aging population is growing
- Increasingly diverse
- This is a potential asset
- Aging = 50 year span (60-110+)... There is variability in aging.

Density of Population Age 65+ Years

4+ chronic conditions	38.32% Bowdoin, Bowdoinham, Perkins	72.37% Grand Isle, Madawaska

Identifying disparities by gender

KEY TAKEAWAYS

WOMEN

Bone health

- 8x higher osteoporosis
- 9% higher arthritis
- 2% higher chronic pain & migraine

Mental health

- 15% higher rates of anxiety
- 14% higher depression rates

MEN

Heart & metabolic diseases

- 13% higher ischemic heart disease
- 4% higher rates of hypertension
- 6% higher diabetes rates

Emergency room usage & hospital stays

- 23 more hospital stays annually than older Maine women

RACIAL DISPARITIES IN MAINE

HIGHEST REPORTED CHRONIC CONDITIONS FOR 65+ BY RACIAL/ETHNIC GROUP

White Older Adults

- Endometrial cancer (in women)

Black Older Adults

- Prostate cancer (in men)

Hispanic Older Adults

- Migraine or other chronic headache

ABOUT THE HEALTHY AGING DATA REPORTS

These reports are designed to help residents, agencies, providers and governments understand the older adults who live in their cities and towns – their ages, living arrangements, health status, strengths and vulnerabilities.

Comprehensive Community Profiles for every state, city and town are included in the reports. Each Community Profile details individual and community health indicators as well as statewide rates. This data makes it possible to compare a town or city to the rest of the state by indicator.
