

Midas # 5244
JIMMY POND

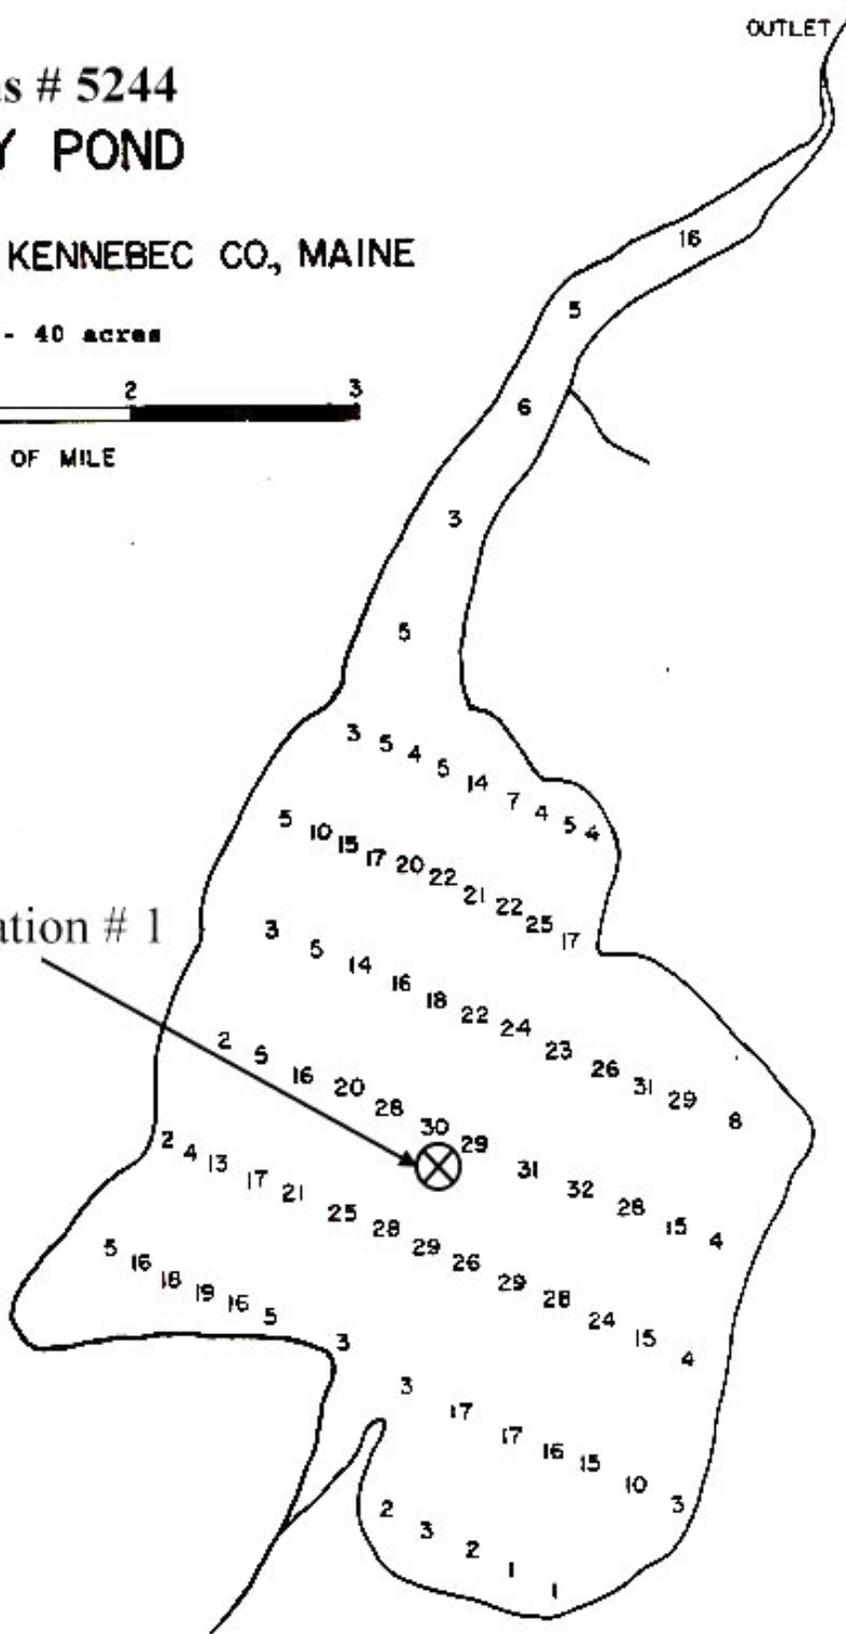

LITCHFIELD TWP, KENNEBEC CO., MAINE

Area - 40 acres

OUTLET

Sample Station # 1

JIMMY POND

Litchfield Twp., Kennebec County
U.S.G.S. Purgatory, Maine

Fishes

Brown trout
Rainbow smelt
Smallmouth bass
Largemouth bass
White perch
Yellow perch
Chain pickerel

Minnnows
Golden shiner
White sucker
Hornpout (bullhead)
Redbreast sunfish
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 40 acres

Maximum depth - 32 feet

Temperatures:

Surface - 72⁰F

30 feet - 44⁰F

Principal fisheries: Smallmouth bass, largemouth bass, chain pickerel, white perch

Jimmy Pond is the upper most pond in the Tacoma Lakes chain. The pond has a severe oxygen deficiency in water deeper than 15 feet during the summer months, thereby eliminating management of coldwater sport fish species. The warmwater sport fishery is considered excellent.

Brown trout are occasionally caught in Jimmy Pond primarily during the ice fishing season, a result of fish migrating from Sand Pond where brown trout are stocked annually.

There is no direct shoreline access to Jimmy Pond but a trailerable boat launch site is located on Buker Pond a short distance down stream. This site also provides access to Sand Pond.

Surveyed - July, 1959
