

MAINE DEPARTMENT OF
INLAND FISHERIES AND WILDLIFE

Maine Fishing Guide

www.mefishwildlife.com

Maine truly is the *Nation's* Wild Brook Trout State and has over 32,000 miles of rivers and streams and 6,000 lakes and ponds!

“Maine is the last true stronghold for brook trout in the Eastern United States, with as many intact sub watersheds as all of the other states in the eastern range combined.

Maine's lake and pond resources are the jewel of the eastern range.” - Eastern Brook Trout Joint Venture

Maine offers world-class fishing, lifelong memories

Fishing in Maine is always rewarding, whether you are an experienced fly angler working on that perfect presentation for a trophy trout or a five-year-old youngster skidding across the ice toward the waving flag of a trap.

Maine is home to 6,000 lakes and ponds and more than 32,000 miles of rivers and streams. With so many waterways, you are sure to find at least a couple of special fishing holes, as well as numerous hot spots known for producing trophy trout and salmon. Maine is known as the last stronghold for eastern brook trout, with over 90% of the country's wild lake and pond brook trout residing in Maine.

"There's an opportunity to catch one of these beautiful fish no matter where you like to fish—rivers, streams, ponds or lakes," said Governor Paul R. LePage. "Whether you are a Maine resident or a visitor, I am pleased that you chose to fish in our state, and I hope that you will enjoy the experience and the memories for years to come."

Maine is also recognized and praised for our abundant landlocked salmon. Anglers from New England and beyond flock to their favorite waters throughout the state for the thrill of catching one of Maine's leaping landlocks.

Maine is also gaining national recognition for our fantastic bass fishing. Smallmouth bass in Maine are well known as fierce fighters and offer outstanding opportunities throughout the state. Many of our southern lakes give anglers a chance at a trophy largemouth.

Maine also offers exciting fishing opportunities for children, as well. Maine has 47 waters in 13 counties that are open exclusively to children 15 and under. These ponds are stocked with trout and open only to kids to give them an increased chance of catching a fish of which they are sure to be proud.

"There is no doubt that if a child has early success fishing, they can become hooked for a lifetime," said Chandler E. Woodcock, Commissioner of the Department of Inland Fisheries and Wildlife. "It's a wonderful way to share time outdoors; it teaches children important life lessons; and creates memories that will last a lifetime. Take the time this year to pass on a tradition and gain a fishing partner. Take the kids fishing."

The Maine Department of Inland Fisheries and Wildlife appreciates your interest in fishing and your support of our agency and natural resources. Revenue generated by license fees goes directly into enhancing our fisheries, providing a world-class fishery for you, your kids and future generations.

Thank you for fishing in Maine.

Governor Paul R. LePage
Commissioner Chandler E. Woodcock

For more information visit our website: www.mefishwildlife.com

For current saltwater recreational fishing opportunities and regulations, please visit the Maine Department of Marine Resources (DMR) website at www.maine.gov/dmr or call the DMR at (207) 633-9500.

It is unlawful to angle for, take, or possess anadromous Atlantic salmon in all Maine waters (including all coastal waters), unless otherwise permitted by DMR. If an Atlantic salmon is incidentally hooked it should not be removed from the water, and it should be released immediately.

How to Use this Freshwater Fishing Guide

This book is a compilation of fishing spots recommended by regional fisheries biologists.

- Decide which management region you will be in. If you are not sure of the region but know the town, refer to the town list for each region on the following pages, then flip to that region in the book.
- Decide which species you would like to catch. Review the waters listed under that species to see which ponds are nearby or accessible according to the method of fishing or gear you plan to use. To see how to access the water, or determine where it is, refer to the listed map and section for the DeLorme Maine Atlas and Gazetteer.
- Consult our Fishing Rules and Regulations book for the water you want to fish in order to comply with all current regulations.

Identify your Catch

For rules and regulations purposes it is vital that you can identify your catch.

Here are some simple tips that will help you identify your catch.

Landlocked Salmon (LLS)—Salmon are coldwater fish that rely on the presence of smelts for species success. They are identified by a slightly forked tail and silvery scales with small dark spots on the dorsal and lateral sides. They may sometimes appear to have a bluish coloration on their operculum (gill plate cover).

Lake Trout (LKT)—Lake trout, also known as togue or lakers, are coldwater fish that can grow quite large. Like salmon, they routinely prey upon smelts, but can adapt to eat other available forage including aquatic insects and smaller fish. They have a deeply forked tail, white leading edges on their fins, and can be distinguished from salmon by having creamy white spots on a gold to green background on their sides, whereas salmon have black spots on a silver background.

Brook Trout (BKT)— Brook trout, also known as squaretails or speckled trout, are coldwater fish that are opportunistic feeders. They will eat aquatic insects and smaller fish and thrive in clear, clean, well-oxygenated waters. Brook trout populations are heavily influenced by their environment. Brook trout can be easily identified by their red spots, each of which is surrounded by a blue halo. They have white leading edges on the fins, and a worm-like vermiculation pattern on their backs.

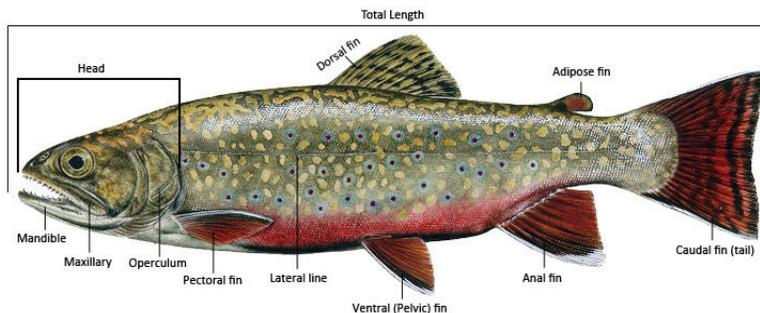

Brown Trout (BNT)— Brown trout are a coldwater fish capable of handling a wider range of water temperatures than most other coldwater fish. They are opportunistic feeders. They are identified by red and black spots, square tails, and a large, spotted adipose fin.

Rainbow Trout (RBT)— Rainbow trout are a coldwater fish capable of handling a wider range of water temperatures than most other coldwater fish. They are opportunistic feeders. They are identified by a light background with tiny dark spots on their sides and a faint to bright pinkish coloration on their operculum (gill plate cover) and down their sides. Their caudal and dorsal fins also have small dark spots.

Splake (SPK)— Splake are a hybrid cross between lake trout and brook trout. As a hybrid, their features may sometimes resemble one or the other parent species more. They will eat aquatic insects and smaller fish but are more resilient to temperature fluctuations than brook trout. Splake can be easily mistaken for Brook Trout or Lake Trout, but can be identified by their red spots (lacking the blue halo for which the brook trout are known), white leading edges on the fins, and a worm-like vermiculation pattern on their backs.

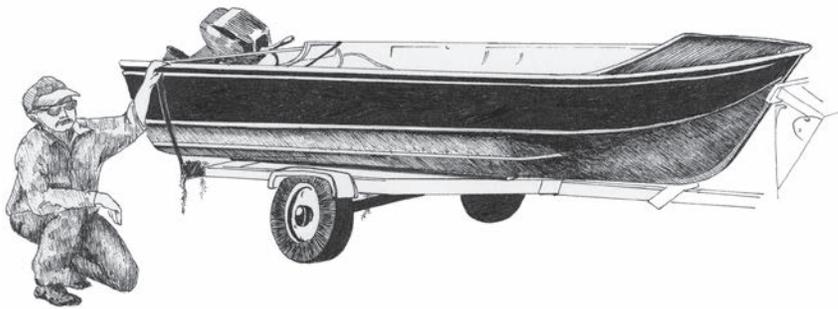

Smallmouth Bass (SMB)—Smallmouth bass are warmwater fish that are opportunistic feeders. They are distinguished from their largemouth cousins by a jaw that doesn't reach past the center of the eye. Both species have a spiny and a soft rayed dorsal fin. They may have red eyes and sometimes may have vertical dark stripes.

Largemouth Bass (LMB)—Largemouth bass are warmwater fish that can be identified by a jaw that extends past the center of their eye and by the black lateral band running down the center of their sides.

Stop the spread of invasive plant species! Check your boat, motor, trailer, and fishing gear for any pieces of plants before entering and after taking out of any body of water!

Please Help Stop the Spread of Invasive Fish and Plants

Maine is lucky to have some of the country's most pristine, healthy waters that are full of aquatic diversity and trophy fish. These waters provide endless outdoor opportunities for anglers and others who recreate on them, but they are also threatened each year by invasive fish and plants.

An invasive species is any type of fish or plant that is put into a body of water where that species does not already exist. Invasive fish compete for food and habitat with native fish, may prey on smaller native fish and can forever change the natural balance of an aquatic ecosystem.

By Maine law, any sport fish must be killed immediately after the decision to keep the fish has been made. This helps stop the introduction of invasive species. It is illegal, harmful and irresponsible to move any live sport fish other than baitfish.

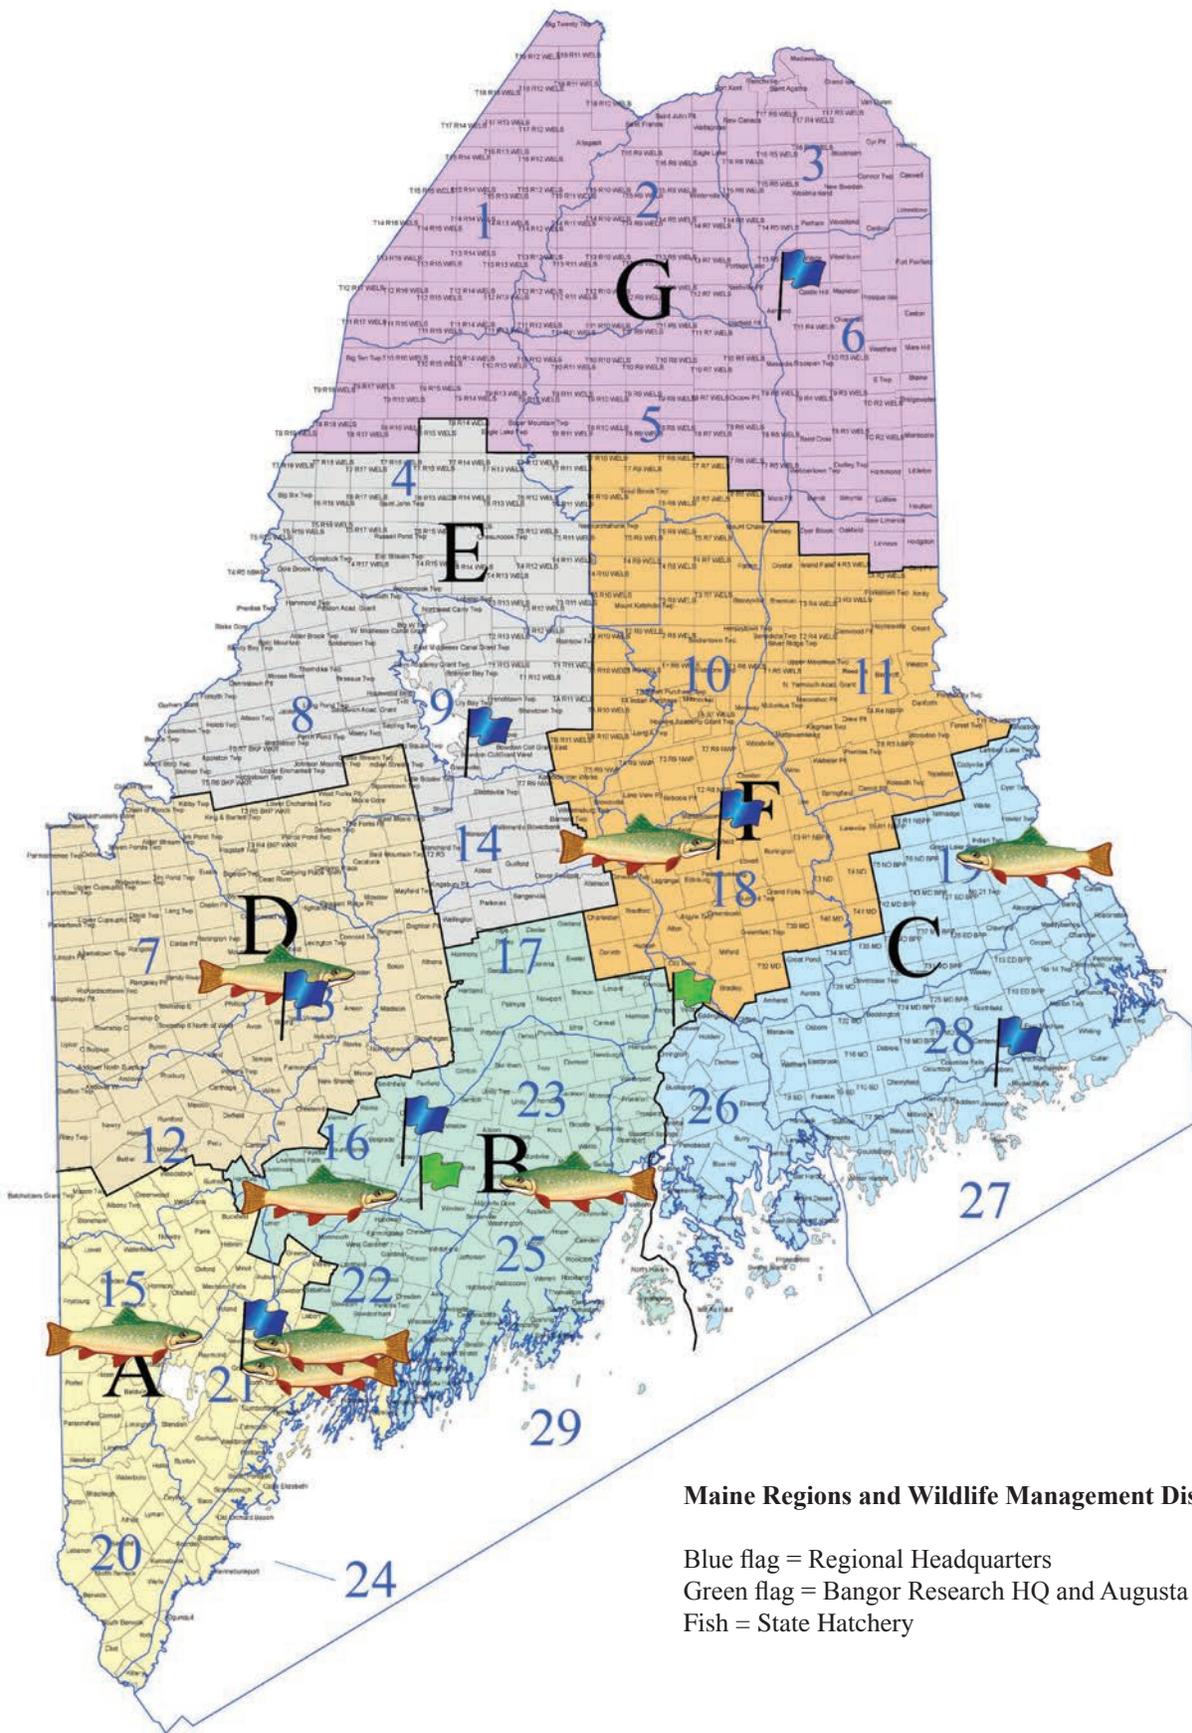

When it comes to invasive plants, some plants are more than able to strangle a body of water. These plants are fast-growing and can multiply, grow and spread into a thick blanket. This can prevent sunlight from penetrating deeper into the water and inhibit the natural growth of algae and plankton which are necessary food for small fish. Once an invasive plant kills plankton, small fish are likely to starve, which in turn can cause detrimental impacts on larger fish and the entire body of water.

Once an invasive fish or plant has established itself in a body of water, it is extremely difficult to eradicate them. Eradication efforts are costly, can carry their own risks and are not always successful. It is the duty of those who enjoy using Maine's waters to protect them against invasive species.

To prevent the spread of invasive fish, don't move any live fish (other than baitfish) and immediately kill the fish you are keeping prior to transporting. If you see or suspect someone is moving live fish, contact the Maine Warden Service immediately at 1-800-Alert-Us.

To prevent the spread of invasive plants, check your boat, motor, trailer and any other gear that touches the water. Remove any bits and pieces of plants on your gear before leaving the launch. Don't assume a dry plant is dead – some invasive plants can dry out while on equipment, re-saturate when exposed again to water and survive to spread in the next body of water it enters.

As anglers, we all take great pride in the diversity and purity of Maine's waters. We must all work together to stop the spread of invasive fish and plants so that they don't kill Maine's aquatic treasures.

SEBAGO LAKE REGION

Region A

The Sebago Lake region offers the greatest diversity of angling opportunities for both warmwater and coldwater fisheries. The region provides excellent year-round fishing for landlocked salmon, brook trout, splake, lake trout, brown trout, rainbow trout, largemouth bass, smallmouth bass, perch and chain pickerel. Stocking maintains most lake and pond fisheries for salmon and trout. Wild brook trout are common in most small streams. Reclaimed ponds offer quality brook trout fishing during the open water fishing season. - Francis Brautigam, Regional Fisheries Biologist

BROOK TROUT FISHING

Abbott Pond Sumner, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 50 ft Area: 24 ac.
Primary Fishery: BKT (S)
Access: Walk-in access from gate, approximately 1/2 mile.
Map: Delorme atlas map 11 section A-1

Adams Pond Bridgton, Cumberland Cty
SPECIAL REGULATIONS APPLY
Max Depth: 51 ft Area: 41 ac.
Primary Fishery: BKT (S), LMB
Access: Carry in access on Pond Rd.
Notes: Unimproved launch.
Map: Delorme atlas map 4 section B-4

Broken Bridge Pond Albany, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 25 ft Area: 18 ac.
Primary Fishery: BKT (S)
Access: Carry in access on small access road off Crocker Pond Rd.
Notes: White Mountain National Forest.
Map: Delorme atlas map 10 section C-3

Little Concord Pond Woodstock, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 56 ft Area: 26 ac.
Primary Fishery: BKT (S)
Access: Carry in access (3/4 mile walk) on Bald Mountain Trail from Shagg Pond Rd.
Notes: Unimproved launch.
Map: Delorme atlas map 11 section A-1

Brook Trout

Round Pond Albany, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 29 ft Area: 11 ac.
Primary Fishery: BKT (S)
Access: Carry in access via footpath 1 mile long from south end of Crocker Pond.
Notes: No established launch. White Mountain National Forest.
Map: Delorme atlas map 10 section C-3

Oversett Pond Greenwood, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 42 ft Area: 21 ac.
Primary Fishery: BKT (S)
Access: Walk-in access from gate on Oversett Pond Road.
Notes: Unimproved launch, 0.75 mile walk in on gated road.
Map: Delorme atlas map 10 section C-4

Trout Pond Stoneham, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 68 ft Area: 64 ac.
Primary Fishery: BKT (S&W)
Access: Carry in from Cushman Pond Rd.
Notes: No established launch.
Map: Delorme atlas map 10 section D-3

LANDLOCKED SALMON FISHING

Auburn Lake Auburn, Androscoggin Cty
SPECIAL REGULATIONS APPLY
Max Depth: 118 ft Area: 2,260 ac.
Primary Fishery: LLS (S), LKT (S), SMB
Access: Trailered boat access on Rte 4.
Notes: Improved launch.
Map: Delorme atlas map 11 section E-4 & 5

Kezar Lake Lovell, Oxford Cty
SPECIAL REGULATIONS APPLY
Max Depth: 155 ft Area: 2,510 ac.
Primary Fishery: LLS (S&W), LKT (S)
Access: Trailered boat access off W. Lovell Rd and on N. Lovell Landing Rd.
Notes: Improved launch.
Map: Delorme atlas map 10 section D-2

Little Ossipee Lake Waterboro, York Cty
Primary Fishery: LLS (S), RBT(S), BKT (S)
SEE LISTING ON PAGE 9

Moose Pond Bridgton, Oxford Cty
Max Depth: 77 ft Area: 1,694 ac.
Primary Fishery: LLS (S), SMB, LMB
Access: Trailered boat access off Rte 302.
Notes: Improved launch.

Map: Delorme atlas map 4 section A-2

Peabody Pond, Sebago, Cumberland Cty
SPECIAL REGULATIONS APPLY
Max Depth: 64 ft Area: 735 ac.
Primary Fishery: CSK, BKT (S), LLS (S), SMB
Access: Trailered boat access off Peabody Pond Rd at outlet with limited parking.
Notes: Shallow, gravel launch.
Map: Delorme atlas map 4 section B-4

Pleasant Lake Casco, Cumberland Cty
SPECIAL REGULATIONS APPLY

Tips for Taking Kids Fishing

Fishing with children can be very rewarding and educational. Here are some tips for taking them along.

Be relaxed: As you head out the door, leave behind the tension and take along a smile, an open mind, and a lot of patience.

Make it fun: Above all else, make the fishing trip fun and safe. Don't measure the success of the trip by the number or size of fish caught. Make the trip successful simply by having a fun, safe time outdoors. Praise children for their patience and cooperation.

Make it a shore thing: Teaching children to fish from shore has some important advantages. It provides them more opportunity to go on their own or with friends when they are old enough. Give the first few lessons at a local park, farm pond, or a lake with a dock or gentle shoreline where children can run and play when their attention span runs short. If and when you progress to a boat, be sure to have the proper safety equipment for you and your youngster.

Fish for little fish: Catching fish is important; size isn't. Start new anglers off on species that are plentiful and more easily caught. Popular fish for beginners are sunfish or perch. Most kids prefer to catch lots of fish versus big fish. Larger fish can be sought when the child has developed basic fishing skills.

Start with the basics: Begin with simple equipment and bait. Use simple spincasting equipment, a bobber and a hook with live bait, as it will work well for a variety of fish species. Be sure the equipment your child uses is in good working order to avoid any unnecessary frustration.

Teach skills: People, regardless of their age, enjoy fishing more when they are in control and have the ability to do it themselves. Resist the temptation to do things for your children. If you are using live bait, teach them how to put it on the hook themselves. Teach them how to tie their hook onto their line and how to cast. On future trips, help them develop these skills and their self-esteem, as they begin to master them.

Shane Davis, Josh Steward, Jacob Steward and Dalton Steward display their Smallmouth Bass.

BELGRADE LAKES REGION

Region B

The Belgrade Lakes Region extends from central to midcoast Maine and provides a variety of fishing opportunities. Landlocked salmon and lake trout can be found throughout the interior of the region, and brook trout and brown trout can be found virtually region-wide. This area supports numerous populations of largemouth and smallmouth bass that are robust and attract anglers from throughout the country. - Jason Seiders, Regional Fisheries Biologist

DOWNEAST REGION

Region C

The Downeast Region has an exciting mixture of both coldwater and warmwater fishing opportunities from its scenic coastal plain to its undeveloped, tranquil interior. Anglers visiting eastern Maine will have no trouble finding the fish species that suits them. From vibrantly colored brook trout or silvery salmon to hard-fighting smallmouth bass or the eager biting schools of white perch, it's hard to beat the Downeast Region for fishing diversity. —Greg Burr, Regional Fisheries Biologist

BROOK TROUT FISHING

Echo Lake Mount Desert, Hancock Cty
SPECIAL REGULATIONS APPLY
Max Depth: 66 ft Area: 237 ac.
Primary Fishery: BKT (S&W), LLS (S)
Access: Trailered boat access off Rte 102.
Notes: Improved launch.

RANGELEY LAKES REGION

Region D

The Rangeley Lakes Region extends from the upper New Hampshire border to the easternmost edge of the Upper Kennebec River drainage. Landlocked salmon, lake trout, and smallmouth bass are all popular and plentiful fish species that are regularly caught by anglers, but brook trout are by far the most targeted. Most of the region's lakes, pond, rivers, streams, and brooks are well-suited for brook trout and offer an array of different types of fishing opportunities for them. Regardless of what you fish for, this region provides wonderful fishing adventures. —Dave Howatt, Assistant Regional Fisheries Biologist

BROOK TROUT FISHING

Beaver Pond Twp D, Franklin Cty

MOOSEHEAD REGION

Region E

If you are in search of native or wild brook trout, then the Moosehead Lake Region is the place to be. There are hundreds of lakes, ponds, and streams that support self-sustaining brook trout populations and many have never been stocked. The Moosehead Lake Region is situated in northwestern Maine in the largely undeveloped North Woods. Anglers can enjoy the unique experience of fishing in remote areas for brook trout, salmon, and lake trout. The centerpiece of the region is Maine's largest lake: Moosehead Lake, which at 40 miles long, offers a big lake fishing experience. If you're looking for a moving-water experience, there are numerous large rivers that provide great fishing for wild brook trout and salmon, including some year-round opportunities and nearly every beaver bog and small stream contains native brook trout. —Tim Obrey, Regional Fisheries Biologist

BROOK TROUT FISHING

Allagash Lake T8 R14 WELS,
Piscataquis Cty
SPECIAL REGULATIONS APPLY
Max Depth: 89 ft Area: 4,260 ac.
Primary Fishery: BKT (W), LKT (W), LWF (W)
Access: Carry in via camp sites or via Allagash Stream.
Notes: No developed launch.

PENOBSCOT REGION

Region F

From the highlands and trout ponds of Baxter State Park to the lowlands and bass fisheries of the lower Penobscot River, the Penobscot Region is probably the most diverse in the state in terms of both land terrain and fisheries. The region offers a myriad of opportunity for high quality landlocked salmon, lake trout, brook trout and smallmouth bass fisheries in a stunningly beautiful setting in a variety of lakes, ponds, rivers and streams throughout the north central section of the State of Maine. —Gordon Kramer, Regional Fisheries Biologist

BROOK TROUT FISHING

3rd Debsconeag Lake T1 R10 WELS, Piscataquis Cty

Access: Walk in access.
Map: Delorme atlas map 44 section E-1

FISH RIVER LAKES REGION

Region G

Northern Maine boasts some of the most robust populations of brook trout in the eastern United States. Anglers visiting here will find excellent fishing for brookies whether they prefer small streams, small ponds, large lakes, or large rivers. One of the most unique features is fishing for trout on large rivers. A good example is the Aroostook River, the namesake for Maine's northernmost County, that flows from the remote woodlands of the North Maine Woods to the farmland of the east. For anglers seeking a trophy salmonid fish, there are several larger lakes, especially on the Fish River Chain of Lakes, that support above average landlocked salmon and lake trout. —Frank Frost, Regional Fisheries Biologist

BROOK TROUT FISHING

Carr Pond T13 R8 WELS, Aroostook Cty
SPECIAL REGULATIONS APPLY
Max Depth: 72 ft Area: 307 ac.

How to Identify Common Legal (and Illegal) Baitfish

Female

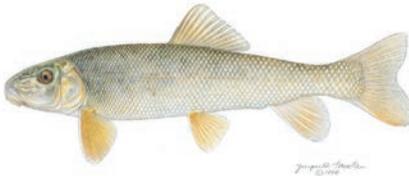

Male

Fathead Minnow:

- First dorsal fin ray is short and thick
- Distinctive fat/flattened head shape
- Generally 2-2.5" in length

Sucker (White and Longnose):

- Mouth points downward with thick lips
- Large scales
- Adults can be over 22" in length

Lake Chub:

- Similar in appearance to Creek Chub, but lacks a dot at the base of the dorsal fin
- Mature adults may have bright orange/red spots where the pectoral fins meet the body

Creek Chub:

- Similar to Lake Chub but with a dark spot at base of dorsal fin
- Upper jaw extends at least to below front of eye

Northern Redbelly Dace:

- Two black lateral bands down body
- Males may exhibit bright red coloration on bellies
- Similar legal species include blacknose, longnose, pearl, and finescale dace

Golden Shiner:

- Deep flattened body with a strongly downward-curving lateral line
- Large scales
- Sickle-shaped anal fin
- Fleshy "keel" (lacks scales) between the pelvic fins and anal fin

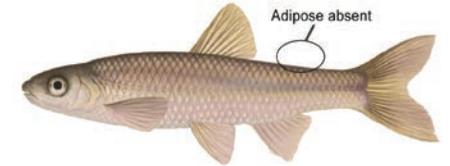

Common Shiner:

- Deep bodies with a slightly downward curving lateral line (curved less deeply than the golden shiner)
- Scales on sides near the front of the body are obviously taller than they are wide
- Mature individuals may have red fins (also known as the "Redfin Shiner")

Rainbow Smelt:

- Long, slender, and silvery
- Adipose fin present
- Large mouth extending past center of the eye

Eastern Silvery Minnow:

- Silvery sides with some olive coloration on back
- Lower jaw is crescent or banana shaped
- Somewhat similar in appearance to rainbow smelt, but adipose fin absent

Please note: These are common batfish, but are not the only legal baitfish species. For a complete list of legal and illegal baitfish, please consult the appropriate section of the most recent fishing rules and regulations law book. Thank you.

It is Illegal to Use These Fish as Bait

WHEN IN DOUBT OR IF IT CANNOT BE IDENTIFIED, DON'T USE IT!

Stickleback (any species)

Spiny rayed fish: including, but not limited to, any bass, sunfish, perch, crappie, or any other fish that has hard, spiny rays on their fins.

Brown Bullhead (hornpout, catfish)

Anything in the pike, muskie, or pickerel family

*Any species not listed as legal baitfish: including, but not limited to, carp, rudd, goldfish, walleye, alewives, and sculpin.

Use this measurement table to estimate the weight of your largemouth and smallmouth bass. It allows you to measure and release your catch quickly, without possibly injuring your bass by weighing it.

This table was compiled using data collected from thousands of bass caught in Maine.

Smallmouth Bass

Largemouth Bass

MOSES is reeling in a big one!

Now it's your turn....

Purchase your fishing license online, and you can enjoy the outdoors immediately! Licenses are available 24 hours a day, seven days a week!

Go to

www.mefishwildlife.com

and click this button:

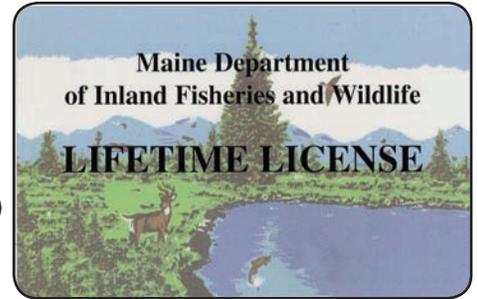

Lifetime Licenses Available!

Pass on a Maine tradition...

...and a gift to last a lifetime!

Go to www.mefishwildlife.com for more info!

Support Public Access, Sustain Maine's Outdoor Traditions, Become An Outdoor Partner!

When you join the Outdoor Partners Landowner Relations Program, your money goes directly to protecting Maine's longstanding tradition of public access. *Joining is simple* – purchase with your license or on our online store for just \$15.00, and agree to abide by a code of ethics.

Join today, and receive valuable discounts from these supporting businesses!

By Becoming An Outdoor Partner You:

- ✦ Preserve, protect and enhance Maine's outdoors.
- ✦ Help ensure access for outdoor recreation.
- ✦ Receive outstanding value and discounts throughout Maine.

You also receive:

- ✦ Membership card
- ✦ Newsletter
- ✦ Decal

For more information, and to join, please visit: www.mefishwildlife.com
