B LAKE
Smyrna, Hammond, Aroostook County
U.S.G.S. Ludlow, Maine (7 1/2')

FISHES

Brook trout
Yellow perch
Minnows
Golden shiner
Blacknose shiner
Blacknose dace
Pearl dace
White sucker
American eel

Physical Characteristics

Area - 68 acres
Temperatures
Surface - 71°F
Maximum depth - 7 feet
7 feet - 70°F

Principal fishery: Brook trout

B Lake is shallow with similar temperatures at all depths throughout the summer. Trout seek areas of cool spring influence when lake temperatures become too warm.

Populations of yellow perch, suckers, and minnows are very abundant and reduce trout production by competing for available food and space.

Access to B Lake is via a private road.
