BILLINGS POND
T11 R9, Aroostook County
U.S.G.S. Big Machias Lake, Me. (7 1/2')
U.S.G.S. Round Mountain, Me. (7 1/2')

FISHES

Brook trout    Blacknose shiner
Yellow perch   Redbelly dace
Minnows        White sucker
Lake chub      Banded killifish
Golden shiner  American eel
Common shiner

Physical Characteristics

Area - 50 acres  Temperatures
Surface - 71°F
Maximum depth - 6 feet  5 feet - 71°F

Principal fishery: Brook trout

Billings Pond is considered submarginal trout habitat. Water temperatures exceed 70°F during the summer months and springs are limited. Yellow perch and suckers are very abundant in Billings Pond and further limit trout production by competition.

A few trout exist in spite of many limiting factors as a result of natural reproduction and migration.

Access to Billings Pond is via private gravel roads built and maintained by large landowners for forest management purposes.

Surveyed - August, 1957
