MIDAS #1808
FISCHER LAKE
FT. FAIRFIELD TWP, AROOSTOOK CO, MAINE
AREA 10 ACRES
ONE TENTH MILE
FISCHER LAKE
Fort Fairfield, Aroostook County
U.S.G.S. Easton Center, Me - N.B. (7 1/2’)

Fishes

Brook trout  Creek chub
Minnows  White sucker
Golden shiner  Threespine stickleback
Redbelly dace

Physical Characteristics

Area - 11 acres
Maximum depth - 6 feet

Temperatures:
Surface - 64°F
5 feet - 62°F

Principal fishery: Baitfish

Fischer Lake is completely ringed by cattails and alders with several reverting potato fields visible from the pond. Fischer Lake provides marginal brook trout habitat and supports a limited brook trout population.

Fischer Lake was chemically reclaimed in 1958 along with Monson Pond to reduce populations of competing species, and to reestablish a brook trout fishery. Although successful in greatly reducing competition for food and space for a few years, the above species have since become established.

Surveyed - August 1958
(Revised - 1998)
Maine Department of Inland Fisheries and Wildlife
Funded in part by Federal Aid in Restoration Act under Federal Project F-28-P
