

GERMAIN LAKE
Madawaska Lake, Aroostook Co.
U.S.G.S. Grand Isle, Me. - N.B. (7 1/2')

FISHES

Brook trout	Fathead minnow
Minnows	Creek chub
Redbelly dace	Pearl dace
Finescale dace	

Physical Characteristics

Area - 85 acres	Temperatures
	Surface - 71°F
Maximum depth - 3 feet	3 feet - 71°F

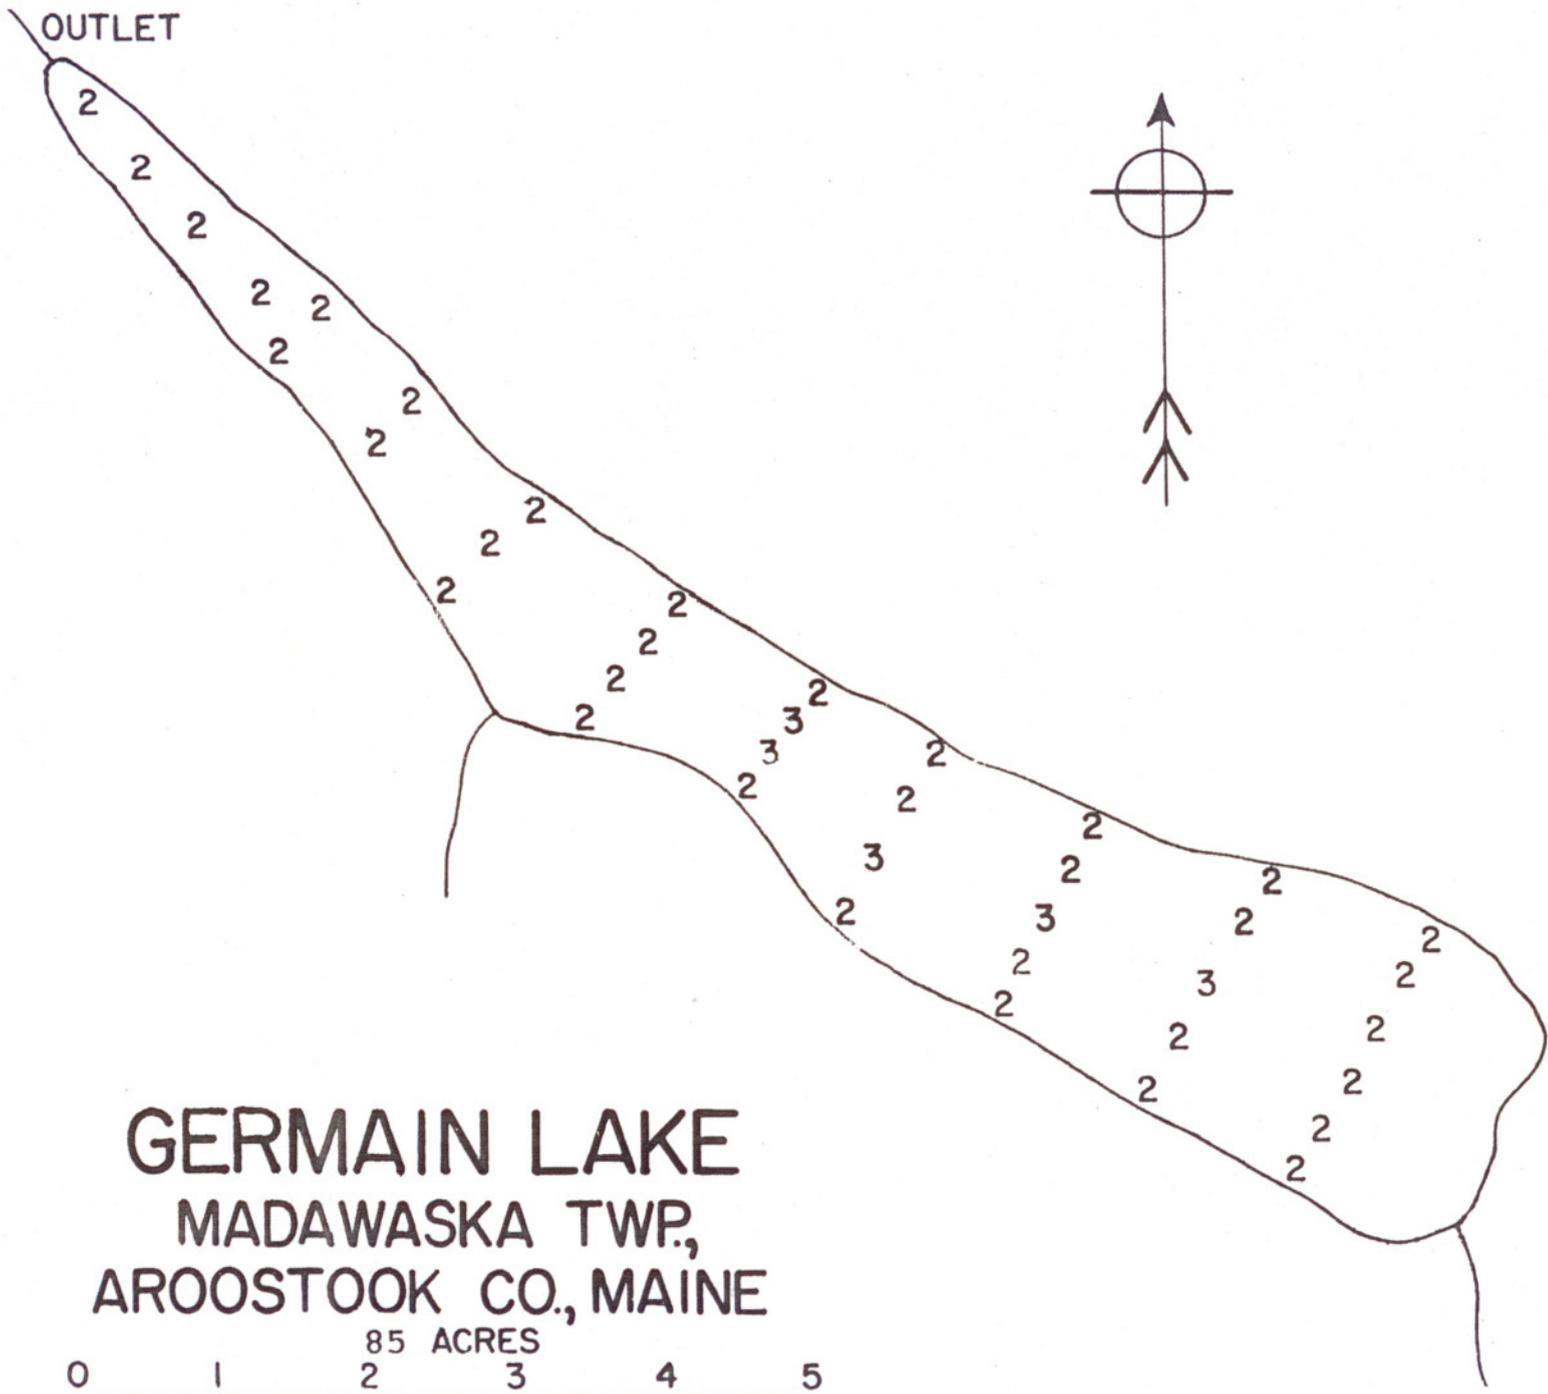

Principal fishery: Baitfish

Germain Lake is extremely shallow with a heavy growth of aquatic plants, and is almost entirely fringed by a heath bog.

Germain Lake is too shallow and warm to support a significant trout population, although several spring trickles enter the lake, and occasional trout are taken.

The lake supports large populations of several kinds of minnows, and has potential as a bait pond.

Surveyed - August, 1962
