NORTH LITTLE BLACK POND

T15 R9, Aroostook Co.
U.S.G.S. Deboullie Pond, Maine (7 1/2')

Fishes

Brook trout

Minnows
Creek chub

Physical Characteristics

Area - 6 acres
Average depth - 7 feet
Maximum depth - 12 feet

Temperatures:
Surface - 72⁰F
11 feet - 68⁰F

Principal fishery: Brook trout

North Little Black Pond is a small coldwater pond and is ideal habitat for brook trout. The trout fishery in the pond is maintained entirely by natural spawning in spring seepages and gravel areas within the pond.

Conservative fishing regulations have been implemented to maintain and enhance the sport fishery.

North Little Black Pond is one of many ponds situated in close proximity in T15 R9, a township owned by the State of Maine. Access to the pond is via a 1-mile hike over an unimproved road from Deboullie Lake. Two-wheel drive access to Deboullie Lake is available over improved gravel roads, however, it is necessary to ford the Red River.
