

WHITEHEAD LAKE
Bridgewater Twp., Aroostook Co.
U. S. G. S. Bridgewater, Me.

Fishes

Brook trout (squaretail)	Minnows (Cont'd)
Minnows	Blacknose shiner
Creek chub	Lake chub
Redbelly dace	Banded killifish
Finescale dace	

Physical Characteristics

Area - 21 acres	Temperatures
	Surface - 70° F.
Maximum depth - 14 feet	12 feet - 70° F.

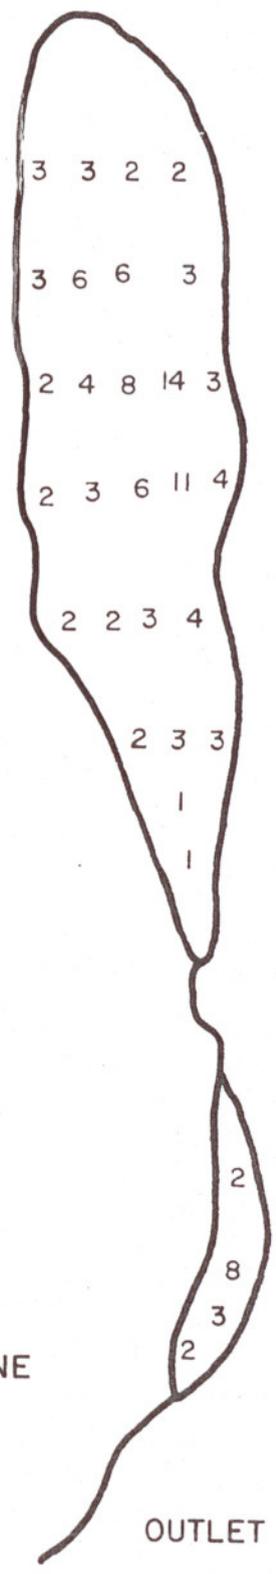

Suggested Management

Whitehead Lake is shallow with equal temperatures at all depths during the summer months. Several small springs enter along the shoreline. Habitat conditions for brook trout are limited.

The pond supports populations of banded killifish and several species of minnows. Occasional brook trout are taken.

Chemical reclamation is not believed to be justified because of limiting habitat conditions.

No stocking of any kind is recommended.
