Smelt
White sucker
Minnows
Sunfish

Physical Characteristics

Area - 461 acres
Maximum depth - 65 feet

Temperature
Surface - 78°F
58 feet - 46°F

Suggested Management

Crystal Lake has a tremendously large population of smallmouth bass and since good fishing is enjoyed, continued management for this species is recommended.

A satisfactory toge fishery justifies continued management of this species.

Surveyed - July, 1939
