Physical Characteristics

Area - 20 feet

Temperatures

Maximum depth - 5 feet

Surface - 53°F

4 feet - 52°F

Principal fisheries: Brook trout

Cloutman Pond is located in the northwest corner of Rangeley. It has no major inlets and its short outlet flows south into the Kennebago River.

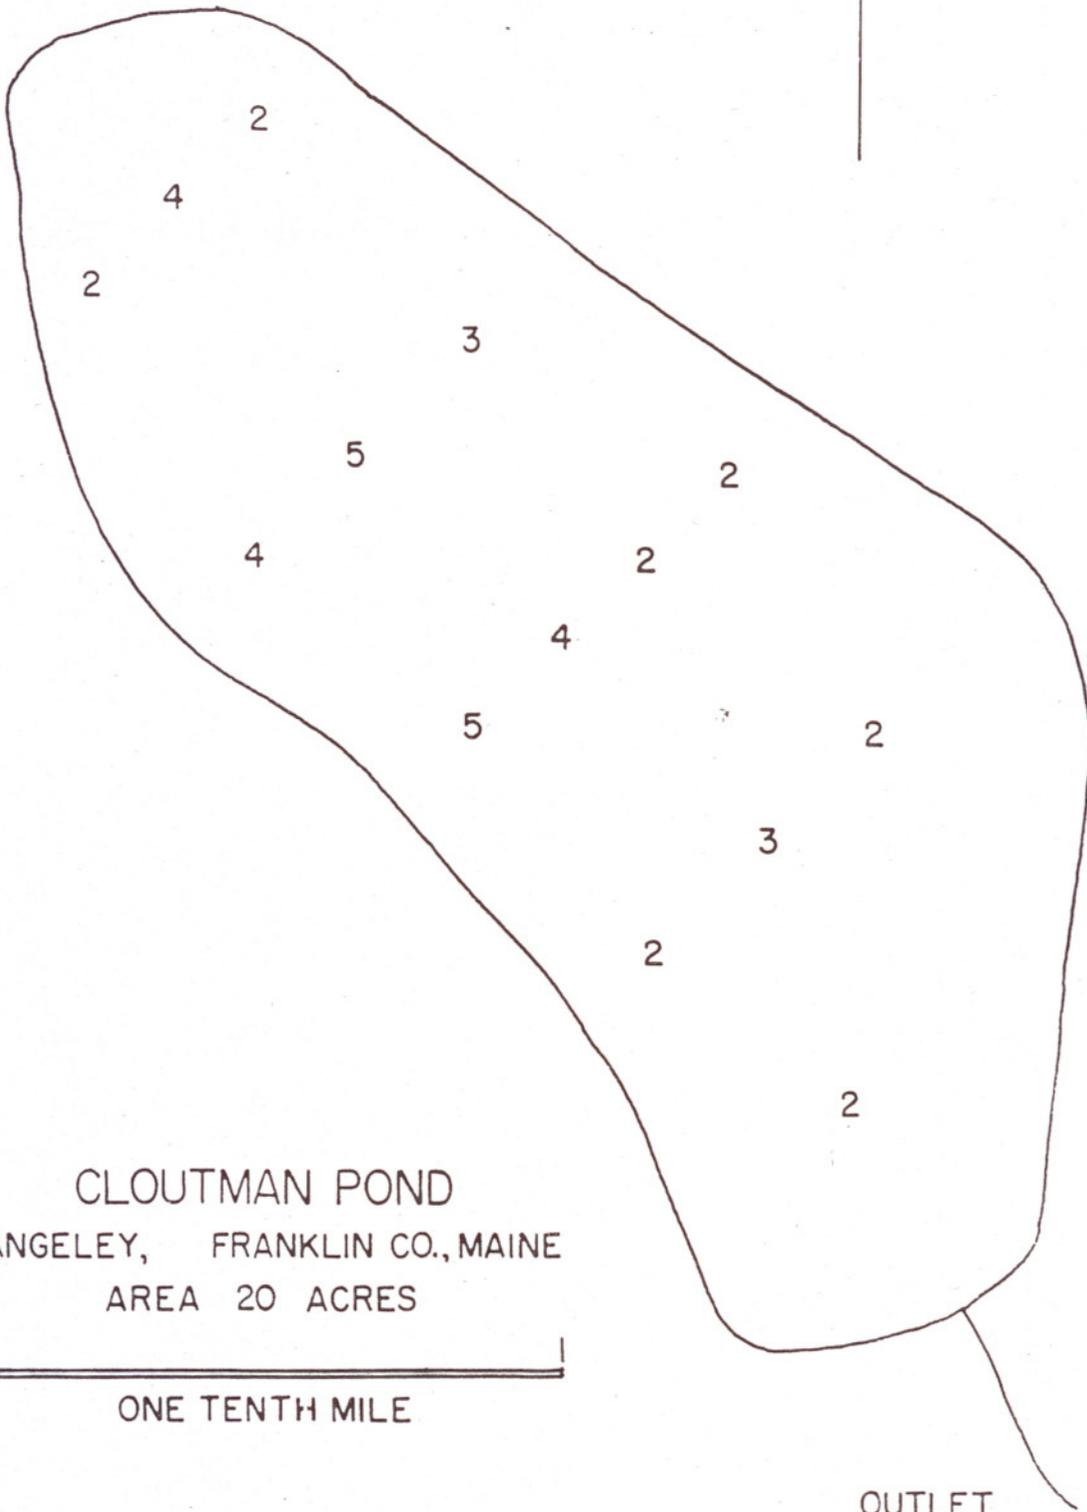

Cloutman Pond is shallow and subject to warm summer water temperatures. Yellow perch are abundant and water quality for brook trout is marginal.

The pond is accessible by foot from Rt. 16 or from the Kennebago River. Cloutman Pond is open to general law fishing.

Surveyed - August, 1981
