ALLEN POND
T35 MD, Hancock Co.
U. S. G. S. Lead Mountain, Me.

Fishes

Brook trout (squaretail)
Yellow perch
Chain pickerel
Alewife
Eel

White sucker
Minnows
Fallfish
Pumpkinseed sunfish

Physical Characteristics

Area - 83 acres
Maximum depth - 27 feet

Temperatures
Surface - 71° F.
27 feet - 52° F.

Suggested Management

Management of Allen Pond at the present time should emphasize chain pickerel and yellow perch. It is unlikely that stocked brook trout would co-exist satisfactorily with the well-established pickerel and perch. No stocking is recommended.

A brook trout fishery could probably be established by chemical reclamation and subsequent stocking. However, the pond is isolated and the light fishing pressure it receives makes reclamation impractical.
