BIRCH HARBOR POND
Winter Harbor Twp., Hancock Co.
U. S. G. S. Bar Harbor, Me.

Fishes

- Eel
- White sucker
- Minnows
  - Golden shiner
  - Banded killifish
  - Threespine stickelback
  - Pumpkinseed sunfish

Physical Characteristics

- Area - 19 acres
- Maximum depth - 36 feet
- Temperatures
  - Surface - 73° F.
  - 34 feet - 42° F.

Suggested Management

Birch Harbor Pond provides excellent cold-water game fish habitat. Brook trout do well in the smaller ponds and would provide the most satisfactory fishery.

No suitable spawning areas exist, so annual trout stocking will be necessary.

Closure to ice fishing, a five-fish bag limit and the prohibiting of live fish as bait would help distribute the catch and guard against introductions of undesirable species.
