

FLYING POND

Vienna and Mount Vernon Twp., Kennebec Co.
U.S.G.S. Belgrade Lakes, Me. (7.5')

Fishes

Landlocked salmon	Golden shiner
Brown trout	Common shiner
Lake trout	Fallfish
Brook trout	White sucker
Rainbow smelt	Hornpout (bullhead)
Smallmouth bass	Burbot (cusk)
Largemouth bass	Redbreast sunfish
Yellow perch	Pumpkinseed sunfish
Chain pickerel	Slimy sculpin
Minnows	American eel

Physical Characteristics

Area - 360 acres	Temperatures:
	Surface - 73°F
Maximum depth - 80 feet	75 feet - 43°F
Principal fisheries: Brown trout, brook trout, smallmouth bass, chain pickerel, cusk	

Flying Pond is a beautiful pond nestled among the rolling hills of Central Maine. Like most lakes in Kennebec County the lake has been highly developed, however long stretches of natural shoreline still exist.

Water quality is only marginally suited for cold water species management, since an oxygen deficiency exists in the deepest portions of the lake. Past stockings of salmon and lake trout were not successful in producing a

quality fishery. This Department stocks brown trout annually and this has resulted in a good fishery. More recently, a brook trout stocking program was initiated. A program to bolster the smelt population was very successful and now the lake maintains one of the highest smelt populations in the region.

Fishing for warm water species, principally largemouth and smallmouth bass, and chain pickerel is exceptional.

A Public boat ramp to Flying Pond is located along State Route 41.

Surveyed - August, 1940

Resurveyed - August 1960
