PENNESSEEWASSEE LAKE
Norway Twp., Oxford Co.
U.S.G.S. Norway, Me.

Fishes

Brook trout (squaretail)
Brown trout
Smallmouth bass
Largemouth bass
White perch
Yellow perch

Chain pickerel
Hornpout (bullhead)
Smelt
Eel
White sucker
Minnows
Sunfish

Physical Characteristics

Area - 922 acres
Maximum depth - 48 feet

Temperatures
Surface - 74°F
47 feet - 51°F

Suggested Management

Since there is an abundance of smallmouth bass and white perch already present in Pennesseewassee Lake, management should be primarily concerned with these two species. However, reports indicate that some fishing is enjoyed for brown trout and brook trout. These two species should also be considered in the management of the lake.

Liberalized fishing for bass and perch might produce more trout fishing by controlling the populations of warm-water species.
