BEN ANNIS POND
Hermon Twp., Penobscot Co.
U.S.G.S. Hermon, Me. (7.5')

Fishes

- White perch
- Yellow perch
- Chain pickerel
- White sucker

- Hornpout (bullhead)
- Pumpkinseed sunfish
- Black crappie
- American eel

Physical Characteristics

Area - 25 acres
Maximum depth - 9 feet

Temperatures:
Surface - 76°F
8 feet - 71°F

Principal fisheries: White perch, chain pickerel, black crappie

Ben Annis Pond contains mostly bog habitat with abundant aquatic vegetation. The pond is shallow with warm water throughout the summer and no habitat to support coldwater fish species. The majority of the fishing pressure occurs during the winter months when access is the easiest. The pond offers an excellent opportunity for families to enjoy winter fishing. The summer angler has the feeling of remoteness while fishing for the scrappy black crappie. Access in the summer to Ben Annis Pond is via small boat or canoe up the outlet stream a short distance from Hermon Pond.

Surveyed - August, 1966
