White perch            White sucker
Yellow perch           Minnows
Chain pickerel         Sunfish

Physical Characteristics

Area - 1146 acres
Maximum depth - 24 feet

Temperatures
Surface - 74°F
24 feet - 70°F

Suggested Management

Chemo Pond is a shallow, warm-water pond
that should be managed for the bass, white perch,
and pickerel fishing. The production of bass food
is high and suitable spawning areas are present.
Occasional trout are taken.

No stocking of any kind is recommended.
