Indian Pond
Lexington Twp., Somerset County
U.S.G.S. New Portland, Maine (7¾')

Fishes

Chain pickerel
Minnows
Blacknose dace
Redbreast sunfish
Pumpkinseed sunfish

Physical Characteristics

Area - 53 acres
Maximum depth - 22 feet

Temperatures
Surface - 76°F
20 feet - 54°F

Principal fisheries: Chain pickerel

Indian Pond is located west of Gilman Pond Mountain. A small inlet enters the south shore of the pond. Its outlet, Indian Stream, flows southwest through Little Indian Pond into the Carrabassett River. The pond's shoreline is undeveloped.

Water quality in Indian Pond is marginal for coldwater gamefish. A well-established pickerel population precludes the possibility of maintaining a satisfactory coldwater fishery. The pond is not stocked. However, pickerel thrive in the warm, shallow pond and provide an attractive fishery.
