HORNE POND (PEQUAWKET LAKE)
Limington Twp., York Co.
U.S.G.S. Steep Falls, Me. (7.5')

Fishes

Brown trout
Brook trout
Rainbow smelt
Smallmouth bass
White perch
Yellow perch
Chain pickerel

Minnows
Golden shiner
Fallfish
White sucker
Hornpout (bullhead)
Banded killifish
Pumkinsed sunfish
Redbreast sunfish
American eel

Physical Characteristics

Area - 166 acres
Maximum depth - 58 feet
Principal fisheries: Brown trout, brook trout, smallmouth bass, chain pickerel

Temperatures:

Surface - 74°F
35 feet - 41°F

Brown and brook trout fisheries are sustained through an annual maintenance stocking program. There is insufficient spawning and nursery habitat to allow either species of trout to become self-sustaining. The presence of competing warmwater fish and somewhat limited water quality compromise trout management efforts.

Boat access is available at a privately owned camp ground located off the North Road. Public access accommodations are tentative and could be terminated in the future. There is a need to secure permanent public access provisions to this pond.

Surveyed - August 1951, 1959, 1972
