PROVINCE LAKE
Parsonfield Twp., York Co., Maine
Effingham Twp., Carrol Co., N.H.
Effingham Twp., York Co., Maine
U.S.G.S. Wolfeboro, N.H. and West Newfield, Me. (7.5’)

Fishes

- Smallmouth bass
- Largemouth bass
- Yellow perch
- Chain pickerel
- Minnows
- Golden shiners
- White sucker
- Hornpout (bullhead)
- Pumpkinseed sunfish
- American eel

Physical Characteristics

Area - 1008 acres

Surface - 80°F
15 feet - 73°F

Maximum depth - 15 feet

Principal fisheries: Largemouth bass, smallmouth bass, yellow perch, and chain pickerel

Less than 3 percent of this border lake occurs in the State of Maine. This shallow sandy pond supports relatively sparse beds of aquatic vegetation, which predominantly located in the northwestern portion of the lake. The lack of aquatic plants and other types of fish structure limit the abundance of above listed principle fish species. Furthermore, the lack of suitable coldwater habitat significantly reduces opportunities to manage for coldwater fisheries. Province Lake is best managed for warmwater fisheries.

Traditional boat access occurs at a gravel launch located off Route 153 in New Hampshire, just beyond the Maine State line.

Surveyed - August 1968
