TURNER POND (Mirror Lake)
Newfield Twp., York Co.
U. S. G. S. Newfield, Me.

Fishes

- Smallmouth bass
- Yellow perch
- Chain pickerel
- Hornpout (bullhead)
- Eel
- White sucker
- Minnows
- Golden shiner
- Pumpkinseed sunfish

Physical Characteristics

- Area - 32 acres
- Maximum depth - 14 feet

Temperatures

- Surface - 81°F
- 13 feet - 78°F

Turner Pond supports a good population of pickerel and a limited number of smallmouth bass. A lack of suitable spawning gravel and the small size of the pond result in a limited bass fishery. The major fishery will be for pickerel.

The extremely high summer water temperatures are enough to prevent the establishing of either trout or salmon.

Surveyed - August, 1959
Maine Department of Inland Fisheries and Game
