284 STATE STREET, 41 STATE HOUSE STATION
AUGUSTA, MAINE 04333-0411**

Tel: 207-287-5261 Fax: 207-287-6395

**APPLICATION TO TAKE YELLOW PERCH IN THE STATE OF
MAINE**

Individual Fee: \$44.00 _____ OR Crew Fee: \$102.00 _____

Applicant Name _____ Date of Birth _____
First Middle Last (Month/Day/Year)

Address _____

Town _____ State _____ Zip Code _____

Daytime Phone (____) _____

List of Crew Members (only if crew permit):

Name _____ Town _____

Name _____ Town _____

Gear to be used: Trap Net _____ Dip Net _____ Spear _____ Seine _____

THIS PERMIT IS SUBJECT TO THE FOLLOWING CONDITIONS:

1. The Permittee and crew members must have a valid Maine fishing license.
2. All unattended gear shall be clearly labeled with permittee's name and address.
3. Species not covered by this permit shall be released immediately upon tending of gear.
4. See additional trapnet conditions on reverse side of this permit.
5. Only four water bodies may be listed on each permit. (A list of waters where yellow perch may be taken with this permit is available from the Department of Inland Fisheries and Wildlife)
6. This permit does not give the permittee the right to use fishing gear on private property against the wishes of the property owner. You should receive permission from tribal authorities and/or appropriate landowner(s) prior to using any gear.

TRAP NET AND SEINE DEFINITIONS AND CONDITIONS FOR OPERATION

For the purpose of this definition a “trap net” means a funnel-shaped net designed to intercept and retain fish in a confined space.

Netting - Netting used in construction of a trap net may be no larger than 3/8 inch bar mesh (3/4 inch stretch mesh).

Coated Wire Material – Trap nets to commercially harvest sucker may also be constructed with coated wire material 1x1 inch square or less. Leads cannot be constructed of coated wire material with mesh sizes larger than 1x1 inch square or netting with mesh sizes larger than the minimum 3/8 inch bar or 3/4 inch stretched mesh.

1. "Seine" means an ordinary commercial-type minnow seine, not exceeding 1,200 square feet, used vertically to enclose baitfish when its ends are brought together or drawn ashore.
2. A trap net may have a box, or area of confinement, no larger than 100 cubic feet.
3. Netting used in construction of a trap net may be no larger than 3/8 inch bar mesh (3/4 inch stretch mesh). Each trap net will be equipped with one or more escape panels with minimum openings of not less than 1" x 5" slots to allow the escapement of fish smaller than six inches (6") in length. These escape panels must be in the cod end of the net and be submerged at all times.
4. No more than two trap nets may be placed in a single water body under this permit.
5. All trap nets shall be clearly marked with one, or more, buoys and the owner's name and address shall be clearly placed on at least one of those buoys.
6. Seasons: Trap nets shall not be immersed prior to April 1 and must be removed by Friday prior to Memorial Day weekend. The use of seines is permitted from July 1 to December 31 and may only be used on the waters listed as open to the harvest of yellow perch (included).
7. All trap nets shall be tended at least every other day and all non-target fish or animals must be released, unharmed back into the water from where they came.
8. Trap nets must be fixed gear and may not be placed in a river, stream or brook in such a manner so as to block, or obstruct, more than 1/3 of the wetted width of the stream channel. Trap nets must be a minimum of 50 feet apart.
9. Trap nets, or any portion of these nets, may not be placed within 150 feet of any dam (including beaver dams or debris dams). They also shall not be placed so as to obstruct boat launch areas, boating channels, swimming areas, or other areas used by recreationists.
10. Any unwanted dead fish must be immediately removed from the area and disposed of in a legal, safe, sanitary manner.
11. All harvested yellow perch must be killed prior to transporting away from the water where captured.
12. Those wishing to harvest yellow perch must only take fish from lakes and ponds on the list issued with this permit.
13. It is illegal to transport aquatic plants or fragments of aquatic plants, fish, or fish eggs. Permittees must remove plants or plant fragments, fish, or fish eggs from all nets and gear before leaving the waterbody.
14. Permittee must follow the Maine Fish and Wildlife Biosecurity Protocols issued with this permit prior to moving from one waterbody to another.
15. All permit holders must return the harvest report included with this application by March 31 of the following year in order to remain eligible to obtain a future Yellow Perch Harvest Permit.
