Formation Name **Northeastern Upland Forest**

Macrogroup Name Northern Hardwood & Conifer

Stressors Assigned to A Stonefly:

No Stressors Currently Assigned to A Stonefly or other Priority 3 SGCN.

Species Level Conservation Actions Assigned to A Stonefly:

No Species Specific Conservation Actions Currently Assigned to A Stonefly or other Priority 3 SGCN.

Guild Level Conservation Actions:

This Species is currently not attributed to a guild.

Broad Taxonomic Group Conservation Actions:

Relevant conservation actions for this species are assigned within broader taxonomic groups in Maine's 2015 Wildlife Action Plan: Element 4, Table 4-1.

Alloperla voinae (A Stonefly)

Priority 3 Species of Greatest Conservation Need (SGCN)

Class: *Insecta* (Insects)

Order: *Plecoptera* (Stoneflies)

Family: *Chloroperlidae* (Green Stoneflies)

Habitat Based Conservation Actions:

Additional conservation actions that may benefit habitat(s) associated with this species can be found in Maine's 2015 Wildlife Action Plan: Element 4, Table 4-15. Click on the Habitat Grouping of interest to launch a habitat based report summarizing relevant conservation actions and associated SGCN.

The Wildlife Action Plan was developed through a lengthy participatory process with state agencies, targeted conservation partners, and the general public. The Plan is non-regulatory. The species, stressors, and voluntary conservation actions identified in the Plan complement, but do not replace, existing work programs and priorities by state agencies and partners.
