## **ANNUAL REPORT**

**Year: 2022-2024**

**Unit: 201J**

### **DEPARTMENT OF CORRECTIONS, JUVENILE JUSTICE ADVISORY GROUP**

#### **PURPOSE:**

The Juvenile Justice Advisory Group (JJAG) was created in response to the federal Juvenile Justice and Delinquency Prevention Act of 1974, as reauthorized in 2018, (JJDPA). The JJDPA creates a voluntary partnership between states and the federal government for the purpose of improving the administration of juvenile justice. In order to receive an annual formula grant award, based on the state's juvenile population, each state must demonstrate compliance with four congressionally defined standards ("Core Requirements") for the management of juvenile offenders. These Core Requirements include:

- 1) Deinstitutionalization of status offenders: Ensure that non-offending youth, and those alleged to have committed only a status offense, i.e., conduct that would not be illegal if committed by an adult, are not securely confined.
- 2) Sight and Sound Separation from Adult Inmates: Ensure separation of juveniles from adults who have been charged with or convicted of criminal conduct in secure facilities.
- 3) Removal of all persons under the age of 18, including those being prosecuted as adults from adult jails, lockups, and prisons; and
- 4) Identify and Reduce Racial and Ethnic Disparities (R/ED) within the juvenile justice system: Compile and analyze data on race and ethnicity of youth at decision points in State, local, or tribal juvenile justice systems to determine which such points create racial and ethnic disparities and develop and implement a work plan that includes measurable objectives for policy, practice, or other system changes, based on the needs identified.

The JJAG operates as the supervisory board for all planning, administrative, and funding functions under the Act.

#### **ORGANIZATION:**

The JJAG was first established as a committee of the Maine Criminal Justice Planning and Assistance Agency. It was formalized by Executive Order 4 FY80 on October 5, 1979, and authorized by statute in 1983 (34-A MRSA,
