

# Disadvantaged Business Enterprise Goal Setting Methodology for Federally Assisted Highway Projects

Federal Fiscal Year 2022-2024

Sherry Y. Tompkins, Director, Civil Rights Office Department of Transportation State of Maine Submitted: August 1, 2021

In compliance with Title 49, Part 26 of the Code of Federal Regulations (49 CFR Part 26)

# Introduction

# MaineDOT's Annual DBE Goal for FFY 2022-2024

Pursuant to 49 CFR 26, the Maine Department of Transportation (MaineDOT) has analyzed data and determined that, for federal fiscal years (FFY) 2022-2024 the overall annual Disadvantaged Business Enterprise (DBE) attainment on Federal Highway Administration (FHWA) funded projects is **1.84%**.

The MaineDOT DBE Goal Setting Methodology for FFY 2022-2024 explains the Department's goal-setting process and methods, public outreach process, and administration of the goal. The Department's overall goal must be based on demonstrable evidence of the availability of ready, willing and able DBEs relative to all businesses that are ready, willing and able to participate in DOT assisted contracts. 49 CFR §26.45 dictates a two-step process. The first step is to determine a base figure for the relative availability of DBEs. Once the base figure is determined, it is necessary to examine all of the evidence available in the Department's jurisdiction to determine what adjustment to the base figure, if any, is necessary. As an extension of this process, Section 26.45 requires that state DOT's meet the "maximum feasible portion" of its overall DBE utilization goal through race-neutral means of facilitating race-neutral DBE participation.

## Federally-Assisted Contracting Opportunities for FFY 2022-2024

The Department evaluated all available FHWA contracting opportunities for FFY 2022-2024, which are provided in detail in Appendix 1. The total value of such projected opportunities is \$358,954,676.38.\*

# **Goal Methodology**

# Step 1 – Determination of a Base Figure

To establish the Department's base figure of the relative availability of DBEs to all comparable firms (DBE and Non-DBEs) available to propose on federally assisted contracting opportunities projected to be solicited during the goal period, the Department followed the two-step process federally prescribed for goal-setting in accordance with 49 CFR Part 26.45.

At the outset, the Department must determine the local market area in which it will search for DBEs and non-DBEs and in which the substantial majority of its contractors and subcontractors exist. MaineDOT has defined its local market area as the geographical boundary of the state of Maine, where the Department distributes its federally-assisted

<sup>\*</sup> For purposes of FAA DBE goal setting and methodology for FFY2022-2024, please see the projecting contracting opportunities identified in Appendix 2, totaling \$6,283,000.

contracting dollars, and where the majority of bidders within each North American Industrial Classification System (NAICS) code are located.

Having determined its local market area, the Department projected the contracting opportunities that it will have during this goal period and defined the corresponding NAICS codes. The Department projects that the anticipated contracting opportunities for this goal period will fall within the NAICS code categories identified in Table 1.

The Department then searched for DBE and Non-DBE firms that perform the work associated with the relevant NAICS codes. This was accomplished by accessing the MaineDOT Unified Certification Program (UCP) Directory of Certified DBE Firms and the 2019 U.S. Census Bureau County Business Patterns (CBP) Database. All efforts were made to use as close to identical NAICS codes as possible to ensure a "like-to-like" comparison. Although several DBEs have more than one NAICS code, we used only one such code per firm to avoid duplication.

NAICS Code	Description	Number of Maine Firms Per CBP Database	Number of Maine DBE Firms
212321	Construction sand and gravel mining	6	2
237310*	Highway, street, and bridge construction	77	6
237990	Other heavy and civil engineering construction	45	0
238110*	Poured concrete foundation and structure contractors	157	0
238140	Masonry contractors	133	3
238910*	Site preparation contractors	558	4
238990*	All other specialty trade contractors	185	1
423840	Industrial supplies merchant wholesalers	39	0
484110	General freight trucking, local	122	1
484210	Used household and office goods moving	33	0
484220	Specialized freight (except used goods) trucking, local	306	0
488490	Other support activities for road transportation	19	0
541320	Landscape architectural services	25	4
541330*	Engineering services	294	9
541340	Drafting services	22	1
541370*	Surveying and mapping (except geophysical) services	91	1
541380*	Testing laboratories	35	0
541430	Graphic design services	69	3

 

 Table 1: Projected Contracting Opportunities, NAICS Codes, and Relative Availability of Ready Willing and Able DBE Firms to All Firms

561110	Office administrative services	97	0
541613	Marketing consulting services	119	1
541620*	Environmental consulting services	80	0
541690	Other scientific and technical consulting services	76	0
541820	Public relations agencies	30	0
561320	Temporary help services	132	1
561720	Janitorial services	366	1
561730	Landscaping services	899	0
	Totals:	4,015	38

\*NAICS codes with FAA component

To determine the relative availability of DBEs, the Department created a ratio wherein the numerator represents the number of ready, willing and able DBE firms and the denominator represents all firms, both DBEs and Non-DBEs, available in each work category.

For the numerator:	MaineDOT UCP DBE Database of Certified Firms
For the denominator:	2019 U.S. Census Bureau's County Business Pattern Database (CBP)

As noted in Table 1, the Department identified 4,015 ready, willing and able firms in the NAICS codes for the projected federally-assisted contracting opportunities. In the federally prescribed formula below, this number is used as the denominator. The numerator was found by determining the number of ready, willing and able DBE certified firms within the same NAICS sub-sectors. For the purposes of this goal setting methodology, 38 firms currently DBE certified in Maine are considered ready, willing and able DBE certified firms, divided by the 4,015 total number of all ready, willing, and able firms (DBEs and non-DBEs), yields a base figure of 0.95%.

Formula DBE (38) ------ = 0.00946 x 100 = 0.95% CBP (4,015)

# Step 2 – Adjustment to Base Figure

Once the base figure is determined, MaineDOT is required to examine all of the evidence available to determine what adjustment, if any, is necessary. Step 2 requires the Department to incorporate any available evidence that will improve the accuracy of the Step 1 base line goal calculations in order to determine the level of DBE participation that would occur absent the effects of discrimination. The Department assessed the impact of specific factors requiring narrow tailoring of the DBE Program. The following factors were considered in making the decision to adjust the overall DBE goal:

#### 1. Past Participation

The volume of work that DBEs have performed in recent years can be useful to increase the accuracy of the DBE goal. Past participation is particularly useful if the contracting opportunities that are projected for the next three years are similar to those of the previous goal period. The Department analyzed the projected contracting opportunities in resources such as the State Transportation Improvement Plan and determined that the projected opportunities are substantially similar to those in the prior three years and that therefore adjusting the base figure using past participation was logical. FHWA requires that the previous three years be used to determine the historical median for past participation. This requires the Department to evaluate DBE participation on FHWA assisted contracts during FFY 2018-2020 The following table shows the DBE participation obtained during this time period.

		DBE
FFY	DBE Goal	Participation
2018	2.40%	3.98%
2019	2.40%	2.73%
2020	2.40%	1.92%

DBE participation during those federal fiscal years was 3.98% for FFY18, 2.73% for FFY19 and 1.92% for FFY20. To adjust the base figure using past participation, MaineDOT adds the median participation from the relevant three -year period to the base figure and divides that sum by two. The median participation during this time period was 2.73%.

Median 2.73% + Base Figure 0.95% = 3.68%

### 3.68% / 2 = 1.84%

Accordingly, after adjusting the base figure due to the similarity of federally-assisted procurement opportunities during the previous 3 years, MaineDOT's adjusted DBE Goal is 1.84%.

#### 2. Disparity Studies

As discussed previously, MaineDOT has not conducted any disparity studies in the past three federal fiscal years. We contacted the State's Metropolitan Planning Organizations and its major airports, and none of them conducted disparity studies or comparable studies that may have provided information relative to the local market area. Therefore, no disparity studies were considered.

# 3. Other Related Evidence

No other evidence of the kind described in the regulations at 49 CFR 26.45(d)(2) was available to consider in determining whether an adjustment to the base figure is warranted.

# Use of Race Conscious and Race Neutral Measures

The Department's DBE Program goal of **1.84%** for FFYs 2022-2024 was exceeded in each of the last three years on a solely race neutral basis. Accordingly, the Department anticipates that the current goal will be achieved entirely through race and gender-neutral means. Contract goals will not be necessary for additional attainment. If we determine that we will not achieve the stated goal, we will take measures to do so, which may include targeted project goals.

# Use of Supportive Services Program in Race-neutral Efforts

For the MaineDOT to meet its goal through race neutral means, it has contracted an agency to provide Disadvantaged Business Enterprises Supportive Services (DBE SS) Program in accordance with 23 CFR 230.204. This business development program aims to assist minority, women and disadvantaged owned firms to build strong businesses able to successfully compete when bidding for federally funded transportation projects and consultant contracts, thus increasing equal opportunity, competition and diversity in Maine's bridge and highway construction industry.

The following services are offered though MaineDOT's DBE SS Consultant with specific programs targeted for instruction. Tuition reimbursement for successfully completed classes taken by small business owners to grow and/or improve their business in the Federal-aid bridge and highway construction industry will also be allowed. This program:

- Provides technical and resource assistance with financial and business planning including accounting, invoicing and auditing practices, business planning, marketing/networking, and setting and achieving goals. Assists with bonding, financial assistance, lease agreements, taxes, fringe benefits, and payroll. Assures capability to comply with all FHWA requirements and paperwork regarding personnel, EEO, Title VI, DBE, AA, training and Davis Bacon and related Acts.
- Provides technical and general assistance with locating, processing, estimating, and submitting quotes for MaineDOT federal aid contracts. Surveys and reports the bid items DBEs can complete and shares this information on the web and with prime contractors. Offers guidance to DBEs regarding MaineDOT project plans and website to keep DBEs up to date with contract opportunities in their business areas.
- Provides technical support for computer systems, particularly CADD translation to Micro-station to be compatible with MaineDOT files and electronic bidding

assistance (using the web and using BIDEX). Also, provides hardware/software technical support and webpage development as related to bridge and highway construction.

- Provides technical support and education regarding partnering with other consultants/contractors/agencies and how to create and deliver products or services under a joint venture. Gives participating small businesses new tools to improve or expand their business capabilities.
- Provides technical assistance and education regarding reading, writing and understanding construction contracts and subcontracts; assistance in ensuring that contracts and subcontracts protect the interest of the DBE, including all phases of the work, and contain all needed language for compliance when working on a FHWA funded projects.
- Distributes a brochure regarding the DBE program and continues to educate contractors and consultants, as well as MaineDOT personnel, about the purpose of the program and their obligations under federally funded contracts. Develop ongoing opportunities for workshops, briefings and training sessions statewide. Educates the SBA's Small Business Development counselors and other entities about the DBE program.
- Holds networking/conferences in conjunction with the Maine SBA Office and other partners and offers matchmaking session between DBEs and prime consultants and contractors. Creates networking opportunities and other activities to promote DBE growth and quality including educational seminars.

In addition, the MaineDOT DBE SS Consultant uses a variety of methods to provide business development services and assess a firm's current qualifications. These include, but are not limited to:

- Documentation of a DBE's skills, experience and needs through development of a Business Needs Assessment, along with a practiced interview technique to successfully glean necessary information from clients;
- Individual Business Management Assistance to DBEs in the form of technical and resource assistance for financial and business planning, as well as public procurement specifically related to MaineDOT opportunities. Includes both inhouse and external specialist resources to provide a wide range of advice and education.
- A rigorous two-year Business Development Program for those DBEs that have the potential and desire to participate.
- Computer and technical assistance to educate DBEs on electronic bidding and how to utilize technology, including providing website development for interested firms.
- Tuition reimbursement providing educational opportunities for DBEs.
- Feedback from primes and from MaineDOT staff providing assistance to firms.

The MaineDOT DBE SS Consultant uses industry business standards and MaineDOT prequalification standards as well as feedback from the primes and others to determine the comparable skills and qualifications that each DBE should attain. This is done on a case-by-case basis as each company delivers a unique set of products and services.

#### Public Process [To be updated with feedback obtained]

Pursuant to 49 CFR 26.45 (g)(i), MaineDOT: "must consult with minority, women's and general contractor groups, community organizations, and other officials or organizations which could be expected to have information concerning the availability of disadvantaged and non-disadvantaged businesses, the effects of discrimination on opportunities for DBEs, and your efforts to establish a level playing field for the participation of DBEs."

MaineDOT works closely with our DBE SS Consultant and regularly discusses concerns and successes with DBE firms in Maine. The DBE SS consultant works directly with DBEs and assists firms addressing their concerns and challenges. The DBE SS Consultant is a conduit to MaineDOT for DBEs.

On June 18, 2021, MaineDOT held a public meeting via zoom at 2:00 PM Eastern Time (US and Canada). General contractor associations, DBEs, the DBE Supportive Services consultant, Associated General Contractors of Maine, Inc. (AGC), National Association of Women in Construction (NAWIC), the Maine Better Transportation Association (MBTA), the Women's Business Center the National Association for the Advancement of Colored People (NAACP) Maine Chapter, the American Council of Engineering Companies in Maine (ACEC) were sent emails to participate in a discussion of our Goal Methodology, to obtain information relevant to our goal setting process and to express any concerns about MaineDOT's DBE program. Advance copies of the draft Goal Methodology were provided to invitees prior to the meeting. The draft was available at the Civil Rights Office website: <a href="http://www.maine.gov/mdot/civilrights/dbe">http://www.maine.gov/mdot/civilrights/dbe</a>

At the meeting, the draft Goal Methodology was presented and representatives of MaineDOT's Civil Rights Office listened to concerns, received comments and answered questions. Other than some minor corrections to the document, there were no comments on the draft methodology.
